Governance and e Democracy are to some extent promising big changes in public administration The demand now is not only simply delivering a service line It is to deliver complex and new services which are all citizen centric Another important demand is related to the improvement of citizen s participation in governmental processes and decisions so that the governments transparency and legitimacy are enforced In order to fulfill these new demands a lot of research has been done over the recent years see Section 3 but many challenges are still to be faced not only in the technological field but also in the political and social aspects
