Human Rights and the Private Sphere Jorg Fedtke, Dawn Oliver, 2015-01-12 This book is a companion volume to Human Rights and the Private Sphere A Comparative Study Volumes 1 and 2 which analysed the effect of human rights on private relationships in a range of democratic jurisdictions around the world This book looks at a number of additional important jurisdictions in self contained chapters which describe the wider constitutional background of each system the relevant national human rights regime the influence of any international human rights instruments the judicial enforcement of human rights and the effect of human rights thinking in the private sphere This book does not just extend the geographical reach of the first two volumes but also addresses a number of specific questions which the particular experience of these new jurisdictions may help to answer These additional lines of inquiry include the influence of religion the question whether notions of human rights protection can affect private relationships even in an authoritarian public law environment whether local systems of customary law fulfil similar functions as modern constitutional guarantees and how private sphere protection develops in systems experiencing not only rapid constitutional changes but also a fundamental shift in their underlying societal paradigm This volume will be of interest to those working in the fields of human rights public law and comparative law

Transnational Lawmaking Coalitions for Human Rights Nina Reiners, 2021-12-02 Explores how expert bodies and non state empowered professionals come together to shape human rights law      **Transnational Human Rights Litigation** Andrew Novak, 2019-10-14 This book analyzes the role of strategic human rights litigation in the dissemination and migration of transnational constitutional norms and provides a detailed analysis of how transnational human rights advocates and their local partners have used international and foreign law to promote abolition of the death penalty and decriminalization of homosexuality The sharing of human rights jurisprudence among judges across legal systems is currently spreading emerging norms among domestic courts and contributing to the evolution of international law While prior studies have focused on international and foreign citations in judicial decisions this global migration of constitutional norms is driven not by judges but by legal advocates themselves who cite and apply international and foreign law in their pleadings in pursuit of a specific human rights agenda Local and transnational legal advocates form partnerships and networks that transmit legal strategy and comparative doctrine taking advantage of similarities in postcolonial legal and constitutional frameworks Using examples such as the abolition of the death penalty and decriminalization of same sex relations this book traces the transnational networks of human rights lawyers and advocacy groups who engage in constitutional litigation before domestic and supranational tribunals in order to embed international human rights norms in local contexts In turn domestic human rights litigation influences the evolution of international law to reflect state practice in a mutually reinforcing process Accordingly international and foreign legal citations offer transnational human rights advocates powerful tools for legal reform      **Beyond Human Rights** Anne Peters, 2018-06-14 A paradigm change is occurring in the course of which human beings are becoming the primary international legal persons In numerous areas of public international law substantive rights and obligations of individuals arguably flow directly from international law The novel legal status of humans in international

law is now captured with a concept borrowed from constitutional doctrine international rights of the person as opposed to international law protecting persons Combining doctrinal analysis with current practice this book is the most comprehensive contemporary analysis of the legal status of the individual Beyond Human Rights previously published in German and now revised by the author in this English edition not only deals with the individual in international humanitarian law international criminal law and international investment law but it also covers fields such as consular law environmental law protection of individuals against acts of violence and natural disasters refugee law and labour law The Routledge Handbook on

Extraterritorial Human Rights Obligations Mark Gibney, Gamze Erdem Türkelli, Markus Krajewski, Wouter Vandenhoe, 2021-12-24 The Routledge Handbook on Extraterritorial Human Rights Obligations brings international scholarship on transnational human rights obligations into a comprehensive and wide ranging volume Each chapter combines a thorough analysis of a particular issue area and provides a forward looking perspective of how extraterritorial human rights obligations ETOs might come to be more fully recognized outlining shortcomings but also best state practices It builds insights gained from state practice to identify gaps in the literature and points to future avenues of inquiry The Handbook is organized into seven thematic parts conceptualization and theoretical foundations enforcement migration and refugee protection financial assistance and sanctions finance investment and trade peace and security and environment Chapters summarize the cutting edge of current knowledge on key topics as leading experts critically reflect on ETOs and where appropriate engage with the Maastricht Principles to critically evaluate their value 10 years after their adoption The Routledge Handbook on Extraterritorial Human Rights Obligations is an authoritative and essential reference text for scholars and students of human rights and human rights law and more broadly of international law and international relations as well as to those working in international economic law development studies peace and conflict studies environmental law and migration The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license States, Human Rights, and Distant Strangers Angela Müller, 2023-10-24 This book combines legal and philosophical perspectives to address the question of whether states are bound by human rights when they act with effects on people abroad states extraterritorial human rights obligations Taking an innovative approach it begins with a profound legal analysis of the issue at national supranational and international levels and then engages in depth with counterarguments against extraterritorially applying human rights on the basis of which it develops its own ethical justificatory theory of extraterritorial human rights obligations The book closes the circle by showing what the practical implications of this theory for the interpretation and possible evolution of human rights law would be In a world where critiques of and resistance to the general idea of universal human rights are on rise the book contributes to closing the gap between judicial and normative perspectives on extraterritorial human rights obligations by inquiring into the ethical underpinnings of this topical legal challenge This book will be of key interest to scholars and

**The Reach of Human Rights in a Globalising World** Michał Gondek, 2009 In the globalizing world of today the conduct of states often affects the human rights of persons situated outside of those states territories The problem of applying human rights to such state conduct has become increasingly topical as a result of phenomena such as the war on terror foreign military interventions and economic globalization The controversies as regards the applicability of human rights treaty law in such cases stem mainly from the wording of the relevant treaty provisions The principal treaties on civil and political rights require states to guarantee certain human rights to persons within their jurisdiction while treaties on economic social and cultural rights specifically envisage international cooperation of states parties for the purposes of achieving these rights The meaning of jurisdiction and the precise nature and content of the obligation of international cooperation are subject to debate This study explores the question of extraterritorial application of principal universal and regional human rights treaties It covers treaties on civil and political rights as well as those on economic social and cultural rights The study determines to what extent and under which circumstances human rights treaties are applicable to state conduct which affects the human rights of persons situated outside the borders of the state party in question The problem is analyzed by reference to the rules of treaty interpretation and in the conceptual framework of public international law It contains a thorough analysis of preparatory works of the relevant treaties the case law of the International Court of Justice and of human rights courts as well as other output of human rights treaty bodies State practice including the case law of national courts is also explored The study argues for a flexible approach to extraterritorial application of human rights treaties which would make it possible for the human right systems to respond to the challenges posed by the evermore notorious extraterritorial state conduct In 2010 Michał Gondek has won the first prize in the Max van der Stoep Human Rights award for this book He also has won Manfred Lachs Prize for the Best Book Debut in International Law by a Polish Author 20

Human Rights or Global Capitalism Manfred Nowak, 2016-10-26 The fall of communism in the late 1980s and the end of the Cold War seemed to signal a new international social order built on pluralist democracy the rule of law and universal human rights But the window of opportunity for creating this more just more equal and more secure world slammed shut just as quickly as it opened Rather than celebrate the triumph of democracy over autocracy or political freedom over totalitarian rule the West exulted in the victory of capitalism over communism Neoliberal policies of deregulation and privatization that minimized the role of the state were imposed on the transitional societies of Central and Eastern Europe as well as economically weak and politically fragile nations in Africa Asia and Latin America Twenty five years later the world reaps the fruits of that market driven state foundation inequality poverty global economic food financial social and ecological crises transnational organized crime and terrorism proliferating weapons fragile states Human Rights

or Global Capitalism is not simply concerned with the success or failure of neoliberal policies per se or judging whether they are good or bad Rather it examines the application of those policies from a human rights perspective and asks whether states by outsourcing to the private sector many services with a direct impact on human rights education health social security water personal liberty personal security equality abdicate their responsibilities to uphold human rights and thereby violate international human rights law Manfred Nowak explores these examples and outlines the ways in which neoliberal policies contravene the obligations of states to protect the human rights of their people Protecting Human Rights Todd Landman,2005 Includes statistical tables and graphs **Human Rights and the Dark Side of Globalisation** ,2016
