How Can Development and Plasticity Contribute to Understanding Evolution of the Human Brain? Roberto Lent,Fernanda Tovar-Moll,2016-07-19 Humans usually attribute themselves the prerogative of being the pinnacle of evolution They have large brains with many billion neurons and glial cells trillions of synapses and besides all a plastic hardware that may change either subtly or strongly in response to the external environment and internal mental commands With this hypercomplex apparatus they are capable of very sophisticated inward computations and outward behaviors that include self recognition metacognition different forms of language expression and reception prediction of future events planning and performing long streams of motor acts subtle emotional feelings and many other surprising almost unbelievable properties The main challenge for research is how do we explain this gigantic achievement of evolution Is it a direct consequence of having acquired a brain larger than our primate ancestors with huge numbers of computational units Would it be determined by a particular way these units came to relate to each other building up logic circuits of powerful capacities What along development has made the difference for the construction of such a complex brain machine How much of this complexity is innate how much is sculpted by influence of

the external world by social interaction with our human fellows and by the history of our own mental trajectory along life. Many specific questions can be asked albeit not necessarily answered so far to this purpose: 1 which genomic characteristics make us unique among primates? 2 which of developmental events during and beyond embryogenesis define our brain? prolonged neurogenesis, permanent circuit reformation, dynamic synaptogenesis, regressive sculpting of the hardware: all of them? 3 is there anything special about plasticity of the human brain that allows us to build the exquisite individual variability characteristic of our brains? Neuroscience is in need of a synthesis. Perhaps associating concepts derived from developmental neurobiology with evolutionary morphology and physiology together with those that photograph the human brain in action under influence of the external world would turn on a light at the end of the tunnel and we would be able to understand what humans do have that is special if anything to explain our success in the Earth.

síndromes epilépticos en lactantes, niños y adolescentes Michèle Bureau, Roberto H. Caraballo, Juan Pociécha, Javier Salas-Puig, Pierre Genton, Charlotte Dravet, Antonio Delgado-Escueta, Carlo Alberto Tassinari, Pierre Thomas, Peter Wolf, Natalio Fejerman, Marco Tulio Medina, 2016-01-30. La primera edición de Los Síndromes Epilépticos de la Niñez y la Adolescencia más conocido actualmente como la Guía Azul apareció en 1984 presentando la diversidad de síndromes epilépticos que se habían individualizado recientemente. La mayoría de estos síndromes que constituyen un enfoque original y práctico de las epilepsias se integran en la Clasificación Internacional de Epilepsias en 1989. Esta Clasificación con numerosas actualizaciones y a pesar de los numerosos retos sigue siendo oficial y útil en 2011. Cambios en la epileptología. El enfoque sindrómico se completa con un enfoque etiológico basado en los grandes avances de la genética y la genética funcional. Nuevas entidades han encontrado su lugar y un enfoque puramente descriptivo electroclínico ha dejado de ser adecuado en numerosas circunstancias. La 5ª edición de la Guía Azul incluye los avances más recientes. Era necesario justificar los enfoques fisiológicos, epidemiológicos, genéticos y terapéuticos y considerarlos bajo el prisma de las nuevas iniciativas de clasificación que todavía se encuentra en ciernes. No obstante la descripción de los síndromes epilépticos tanto clásica como reciente sigue siendo el núcleo de este libro. La diversidad de contribuyentes tanto editores como autores garantiza la objetividad y la calidad de los distintos capítulos. Un éxito internacional también disponible en Inglés y en Francés.
