Agriculture , *Prehistory* Colin Renfrew, 2008-08-19 In Prehistory the award winning archaeologist and renowned scholar Colin Renfrew covers human existence before the advent of written records which is to say the overwhelming majority of our time here on earth But Renfrew also opens up to discussion and even debate the term prehistory itself giving an incisive concise and lively survey of the past and how scholars and scientists labor to bring it to light Renfrew begins by looking at prehistory as a discipline particularly how developments of the past century and a half advances in archaeology and geology Darwin s ideas of evolution discoveries of artifacts and fossil evidence of our human ancestors and even more enlightened museum and collection curatorship have fueled continuous growth in our knowledge of prehistory He details how breakthroughs such as radiocarbon dating and DNA analysis have helped us to define humankind s past how things have changed much more clearly than was possible just a half century ago Answers for why things have changed however continue to elude us so Renfrew discusses some of the issues and challenges past and present that confront the study of prehistory and its investigators In the book s second part Renfrew shifts the narrative focus offering a summary of human prehistory from early hominids to the rise of literate civilization that is refreshingly free from conventional wisdom and grand unified theories The author s own case studies encompass a vast

geographical and chronological range the Orkney Islands the Balkans the Indus Valley Peru Ireland and China and help to explain the formation and development of agriculture and centralized societies He concludes with a fascinating chapter on early writing systems From Prehistory to History In this invaluable brief account of human development prior to the last four millennia Colin Renfrew delivers a meticulously researched and passionately argued chronicle about our life on earth and our ongoing quest to understand it

Scott A J Johnson, 2016-09-19 Ideas abound as to why certain complex societies collapsed in the past including environmental change subsistence failure fluctuating social structure and lack of adaptability *Why Did Ancient Civilizations Fail* evaluates the current theories in this important topic and discusses why they offer only partial explanations of the failure of past civilizations This engaging book offers a new theory of collapse that of social hubris Through an examination of Mesopotamian Egyptian Roman Maya Inca and Aztec societies Johnson persuasively argues that hubris blinded many ancient peoples to evidence that would have allowed them to adapt and he further considers how this has implications for contemporary societies Comprehensive and well written this volume serves as an ideal text for undergraduate courses on ancient complex societies as well as appealing to the scholar interested in societal collapse

Introducing Archaeology, Third Edition Robert J. Muckle, Stacey L. Camp, 2020-11-03 Situating archaeology in academic social and political contexts the third edition emphasizes the ethics and the scholarship of women and includes considerable focus on the archaeology of recent and contemporary times

The Right to Be Punished Gabriel Hallevy, 2012-10-12 Does an offender have the right to be punished The right to be punished may sound like an oxymoron but it is not necessarily so With the emergence of modern criminal law the offender gained the right to be punished by rational criminal law rather than being lynched by an angry mob The present day offender may have the right to be punished by doctrinal sentencing rather than being subjected to verdicts based on vague unclear and uncertain principles In modern criminal law the imposition of criminal liability follows accurate and strict rules whereas there are no similar rules for the imposition of punishment The process of sentencing is vague and obscure as are the considerations used for the imposition of punishments The objective of the present book is to propose a comprehensive general and legally sophisticated theory of modern doctrinal sentencing The challenges of such a legal theory are plenty and complex In addition to increasing clarity and certainty modern doctrinal sentencing must deal with modern types of delinquency e g organized crime recidivism corporate offenders high tech offenses etc and modern principles of criminal law Modern doctrinal sentencing must serve to ensure optimal sentencing

The Origins of Religion in the Paleolithic Gregory J. Wightman, 2014-12-18 How did religion emerge and why What are the links between behavior environment and religiosity Diving millions of years into the past to a time when human ancestors began grappling with issues of safety worth identity loss power and meaning in complex and difficult environments Gregory J Wightman explores the significance of goal directed action and the rise of material culture for the advent of religiosity and ritual The book opens by tackling questions of cognitive evolution and group psychology and how these ideas can integrate with archaeological evidence such as stone tools shell beads and graves In turn it focuses on how human ancestors engaged with their environments how those engagements became routine and how eventually certain routines took on a recognizably ritualistic flavor Wightman also critically examines the very real constraints on drawing inferences about prehistoric belief systems solely from limited material residues Nevertheless Wightman argues that symbolic objects are not merely illustrative of religion but also constitutive of it in the continual dance between brain and behavior between internal and external environments lie the seeds of ritual and religion Weaving together insights from archaeology anthropology cognitive and cultural neuroscience history and philosophy of religions and evolutionary social and developmental psychology Wightman provides an intricate evidence based understanding of religion s earliest origins
