Israel B. Bitton, 2021-10-06 Memory A word so often said often thought of and continuously studied Yet we know relatively so little other than how vast and magnificent it is In Who Will Remember You A Philosophical History and Theory of Memory and Will Israel B Bitton offers an interdisciplinary perspective that unifies philosophy of memory with history neuroscience culture and ethics yielding novel insights into the elusive phenomena of memory namely its universality Bitton posits that the current and typical misunderstanding of memory stems from over specialization in scientific research a compartmentalization that does not support reaching holistic conclusions which are necessary for fully appreciating the totality of memory phenomena No longer should memory be thought of as residing only in the brain for the body is known to have memory too but neither should it be thought of as exclusively human since it inheres in all matter as a physical and biological fact Indeed Bitton extends the philosophical and practical meanings of memory furthest in great detail employing the latest research in neuroscience to support his case In this work Bitton traces the kernels of these ideas from the ancient Egyptians and Israelites all the way through to the modern period in philosophy science and popular culture demonstrating that his philosophical formulation has always been and remains accepted de facto by society as can easily be detected in various social trends Upon offering his holistic account that considers the magnitude of memory phenomena across several disciplines Bitton presents a novel theory that postulates the primary human drive as categorized by a will to significance which because of the universality of memory becomes a will to memorability By placing the individual at the center of their own memory reality they can be empowered to safeguard enhance and extend the universal force of memory within and around them From that vantage point this book provides its audience with ideas meant to provoke and incite the readers own reflections on memory s meaning and import as well as what it takes to be an ethical memory agent in an era of hyper fake news **Women of the Orient** Ross C.
