Exploring Language Pedagogy through Second

Language Acquisition Research Rod Ellis, Natsuko Shintani, 2013-07-31 Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics primarily designed for those beginning postgraduate studies or taking an introductory MA course as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative practice to theory approach with a back to front structure. This leads the reader from real world problems and issues through a discussion of intervention and how to engage with these concerns before finally relating these practical issues to theoretical foundations. Additional features include a glossary of key terms and discussion questions. Following the back to front approach of the series, the book takes problematic issues in language pedagogy as its starting points. These are then examined in terms of second language acquisition. Each chapter begins with a look at the pedagogical proposals found in teacher guides and then asks: Do these proposals accord with what we know about how languages are acquired? Pedagogical topics covered include teaching methods, syllabus design, explicit instruction, comprehension versus production based instruction, task based instruction, authentic materials, the role of the learners' first language in the classroom, error correction and catering for individual differences. Including a glossary of key terms and questions for discussion at the end of each chapter and assuming no prior knowledge of second language acquisition, this is the ideal text for all students studying language teaching methods, language teacher education, English teaching methodology and second language acquisition modules in advanced undergraduate and postgraduate graduate TESOL and Applied Linguistics courses.

Developing Conceptual Knowledge Through Oral and

Written Language Melanie R. Kuhn, Mariam Jean Dreher, 2020-04-06 The development of students' conceptual understanding of the world is vital to their academic success at all grade levels, preschool through high school and across content areas. This professional resource and course text presents expert perspectives on building conceptual knowledge and vocabulary through reading, writing and classroom discussion. Topics include the importance of word study and informational texts in early literacy, discussion practices that boost comprehension, the use of multimodal and appropriately complex texts, engaging digital literacies and discipline specific writing. Ways to strengthen English learners' conceptual skills are highlighted. Each chapter describes current research, explains how to plan and scaffold instruction, distills implications for Professional Learning and offers Questions for Discussion.

Teaching and Learning Second Language Listening
