*People of Anatolia* Benjamin Irvine, Yılmaz Selim Erdal, Lutgarde Vandepuit, 2024-06-30 People of Anatolia Past Current and Future Research in the Biological Anthropology of Türkiye brings together in one complete volume some of the current research foci and trends of biological anthropology in Türkiye The papers within this edited volume cover a multitude of topics many of which complement and enhance each other helping to demonstrate the strength and variety of research currently being performed in Türkiye by both domestic and foreign researchers Furthermore several of these papers examine large scale diachronic changes and highlight the importance of such holistic approaches and methodological considerations and new trends in modern research by considering large scale patterns through time and space and the bigger picture For example the application of multiple more traditional macroscopic biological anthropological analyses in conjunction with more modern techniques such as biomolecular analyses Biological anthropology in Türkiye has developed markedly since the days of primarily analyzing skeletal and dental morphometrics of the skeleton and investigating race This is particularly true since the 1990s when studies have examined skeletal remains from Anatolia within wider bioarchaeological contexts and research questions Research agendas have accelerated particularly in the last decade with the introduction and application of new methodologies including quantifiable scientific techniques which has increased the ability to not only tackle existing and earlier research questions with more specificity and in more depth but also enables us to tackle a greater variety of research questions as well as stimulating new ones This volume demonstrates how complementary as well as large scale diachronic studies enhance our knowledge not only of changes in human behavior and human environment interactions through time but also how these changes affected people at the individual population regional and pan regional levels One of the key messages from this edited volume as a whole is that multi faceted and holistic approaches to exploring particular research agendas are both important and essential While the individual papers in this volume may not necessarily always employ a multi faceted or holistic approach the combined reading of them does so The types of data and information contained in the papers of this edited volume therefore will be of great interest and importance to the wider archaeological community in general But particularly to Turkish students of archaeology as well as Turkish Türkiye based and research focused archaeologists and specialists of biological anthropology

and bioarchaeology and its sub disciplines

**Rethinking Sustainable Tourism in Geographical Environments** Alina Zajadacz, 2024-11-28 This book covers the current escalation of social problems related to the unstable political situation economic crisis as well as growing problems related to the state of the natural environment existential climate crisis pollution of land oceans and the atmosphere severe declines in biodiversity which requires a new rethinking of the sustainable tourism paradigm in relation to the realities of the modern world based on the practices observed in the tourist services sector Tourism is like fire you can cook food on it you can also burn down your house says the proverb On the

one hand it allows for the regeneration of physical and mental strength of visitors as well as provides funds for the economic development of the destination but on the other hand it contributes to a lot of damage to the geographical environment The period of stopping of tourism during the lockdown caused by the COVID 19 pandemic allowed many areas to be relieved of the tourist traffic which resulted in the observed revitalization of the natural environment but also huge social and economic problems in destinations that are largely dependent on income from tourism The rapid resurgence of tourism after the pandemic restored revenues but also caused many social tensions The problem of overtourism returned and residents protested calling for tourists to go home The entire tourism system requires a thorough analysis of the complex consequences of its development This book presents many challenges facing contemporary tourism Its theoretical and practical aspects provide a useful knowledge base for both researchers studying changes in tourism and practitioners in the tourism services sector The content also serves as an inspiration to search for optimal solutions aimed at the sustainable development of contemporary and future tourism

**The Oxford Handbook of Care in Music Education** Karin S. Hendricks, 2023-08-29 The notion of care is at times misunderstood in the context of music education equated simply with kindness or associated with lowered expectations and is often dismissed without consideration of its full value to music learning When viewed through a student deficit perspective concepts of care might evoke unnecessary pity or a sense of rescue thereby positioning teachers and learners in a superior inferior relationship that may be unhealthy and unhelpful to either person Furthermore many well meaning approaches to care emphasize a unidirectional relationship from teacher to student discounting the ways in which a teacher also continues to learn and develop A more empowering conceptualization of care in music education involves sharing experience sharing passion sharing excitement sharing goals and sharing humanness The Oxford Handbook of Care in Music Education addresses ways in which music teachers and students interact as co learners and forge authentic relationships with one another through shared music making Concepts of care addressed in the handbook stem from philosophies of relationship feminist ethics musical meaningfulness and compassionate music teaching These essays highlight the essence of authentic relationships and shared experiences between teachers and learners extending previous conceptions of care to meet the needs of contemporary music learners and the teachers who care for about and with them

**European Port Cities and Urban Regeneration** Enrico Tommarchi, 2022-07-29 Culture and event led regeneration have been catalysts for the transformation of redundant urban port areas and for the reframing of the image of many port cities which notably feature among mega event bidding and host cities However there is little understanding of the impacts of these processes on port city relationships as well as of how port city cultures shape mega events and the related regeneration strategies The book examines the underexplored mutual links between on the one hand urban and socio economic regeneration driven by cultural and sporting mega events and on the other hand the spatial political and symbolic ties between cities and their ports By adopting a cross national comparative perspective with in depth

case studies Hull Rotterdam Genoa and Valencia and examples from other port cities across the world where mega events were held the book engages with issues such as the tension between port and cultural uses reactions and opposition to mega events in port cities clashing urban imaginaries drawing on port activity and culture the role of port authorities and companies in the city s cultural life the spectacularisation and commodification of local maritime culture and heritage processes of cultural demaritimisation and remaritimisation of port cities The book is therefore a contribution towards the bridging of port city and mega event studies and it provides insights for port city policy makers and mega event promoters drawing from a range of international experiences The book also shows how societal and political change in the current ontologically insecure times may undermine the very paradigm of culture and event led regeneration in the years to come
