Hydropolitics Water Policy And Conflict:

European Water Law and Hydropolitics Gábor Baranyai, 2019-06-14 This book provides the first comprehensive assessment of the various issues faced by countries in the European Union where progressing climate change and urbanization pose significant cooperative challenges in a large number of river basins Conducting a thorough analysis of the intricate web of EU water governance it reveals that the hydropolitical stability of the European Union is already at risk Further given the structural nature of the shortcomings in EU water policy e g the rigidity of the EU s founding treaties or the institutional complacency of the European Commission the book argues that these risks are likely to turn into sources of prolonged conflict unless EU decision making bodies take steps to address the new hydrological realities early on Water Policy in Mexico Hilda R. Guerrero García Rojas, 2018-05-23 Mexico is currently facing severe problems with water availability wastage and contamination The most contaminated and over exploited water resources are concentrated in the most populated areas of the country where water is scarcer and its quality makes it unsuitable for a variety of uses including human consumption At the same time it is indisputable that water quality is a determining factor in public health and ecosystems The significant growth in population and industry results in a high demand for water along with contaminating discharges few of which are treated and the impact upon the ecosystems is evident This book addresses all these topics in a single volume taking into account the challenges presented by the economic institutional and environmental considerations in Mexico s water policy framework *Hydropolitics in the Developing World* Anthony Turton, Roland Henwood, 2002 Bringing contributions by a variety of authors together in one volume is part of an attempt to show that hydropolitics is a growing discipline in its own right The prevailing definition of hydropolitics is widened to include the elements of scale and range This is illustrated through a focus on theoretical and legal issues case studies from Southern Africa and a proposed research agenda The book is an important addition to the literature on hydropolitics *Managing and Transforming Water Conflicts* Jerome Delli Priscoli, Aaron T. Wolf, 2010-02-04 What is the one thing that no one can do without Water Where water crosses boundaries be they economic legal political or cultural the stage is set for disputes between different users trying to safeguard access to a vital resource while protecting the natural environment Without strategies to anticipate address and mediate between competing users intractable water conflicts are likely to become more frequent more intense and more disruptive around the world In this book Delli Priscoli and Wolf investigate the dynamics of water conflict and conflict resolution from the local to the international They explore the inexorable links between three facets of conflict management and transformation Alternative Dispute Resolution ADR public participation and institutional capacity This practical guide will be invaluable to water management professionals as well as to researchers and students in engineering economics geography geology and political science who are involved in any aspects of water management **Turkey's Water Policy as Part of the Political Strategy** Hayk Gabrielyan, 2024-03-26 This book investigates water issues in the Euphrates Tigris

basin between Turkey Syria and Iraq Iran It presents the importance of water in the world and especially for the countries of the Euphrates Tigris basin the water resources of the three riparian countries their advantages and disadvantages the amount of reservoir construction in the three riparian countries their water disagreements and conflicts international water law The importance of water in the Ottoman period is presented the evolution of Turkey s water policy in the 20th and 21st centuries the connection and interdependence of Turkey s water policy with its foreign and domestic policies are shown in detail Separate reference is made to non state actors such as the Kurds of Turkey Syria and Iraq The work emphasizes that Turkey is a unique country in the world with its water policy in the Euphrates Tigris basin no other country is able to use water in such a multi purpose way to achieve various goals *Water Conflicts* Mark Zeitoun,Naho Mirumachi,Jeroen Warner,2020 The book breaks from the existing mold by deploying lively concepts and theory that shine a line on the dynamic interactions between states that are obliged to share a water resource whether or not they want to Subnational Hydropolitics Scott Moore,2018 It s often claimed that future wars will be fought over water But while international water conflict is rare it s common between subnational jurisdictions like states and provinces Drawing on cases in the United States China India and France this book explains why these subnational water conflicts occur and how they can be prevented

Transboundary Water Management Anton Earle,Anders Jägerskog,Joakim Öjendal,2013-10-18 The management of water resources across boundaries whether sub national or international is one of the most difficult challenges facing water managers today The upstream exploitation or diversion of groundwater or rivers can have devastating consequences for those living downstream and transboundary rivers can provide a source of conflict between nations or states particularly where water resources are scarce Similarly water based pollution can spread across borders and create disputes and a need for sound governance This book is the first to bring together in a concise and accessible way all of the main topics to be considered when managing transboundary waters It will raise the awareness of practitioners of the various issues needed to be taken into account when making water management decisions and provide a practically based overview for advanced students The authors show clearly how vital it is to cooperate effectively over the management of shared waters to unlock their contribution to regional sustainable development The book is largely based on a long running and tested international training programme run by the Stockholm International Water Institute and Ramboll Natura and supported by the Swedish International Development Co operation Agency Sida where the respective authors have presented modules on the programmes It addresses issues not only of conflict but also of managing power asymmetries benefit sharing stakeholder participation international water law environmental water requirements and regional development It will be particularly useful for those with a background in hydrology or engineering who wish to broaden their management skills **Conflict and the Environment** N.P. Gleditsch,1997-09-30 The end of the Cold War has opened up the arena for increased attention to other lines of conflict both in Europe and globally Environmental disruption by no means a new phenomenon is a chief

beneficiary of the shift in priorities in the public debate The Scientific and Environmental Affairs Division of NATO has moved with the times and has defined environmental security as one of the priority areas for its cooperation with Central and Eastern Europe and countries of the former Soviet Union Research on these issues is now thus very much a collaborative effort across former lines of division in Europe The Introduction by Sverre Stub sets the tone Our Future Common or None at All The book reveals the very real risks associated with environmental degradation whether of the land waters or the oceans and charts out previous disputes and points to the very real danger of violent conflict associated with the drying up of natural resources The book ends with a section on Responses which seeks to provide answers to the threats discussed in the preceding sections

Water Conflicts and Resistance Venkatesh Dutta, 2021-07-29 This book presents a systematic study of transboundary regional and local water conflicts and resistance across several river basins in South Asia Addressing hydro socio economic aspects in competing water sharing and transfer agreements as well as conflicting regimes of legal plurality property rights and policy implementation it discusses themes such as rights over land and natural resources resettlement of dam displaced people urban rural conflicts over water allocation peri urbanisation land use conflicts and water security tradeoffs and constraints in restoration of ecological flows in rivers resilience against water conflicts in a river basin and irrigation projects and sustainability of water resources Bringing together experts professionals lawyers government and the civil society the volume analyses water conflicts at local regional and transboundary scales reviews current debates with case studies and outlines emerging challenges in water policy law governance and institutions in South Asia It also offers alternative tools and frameworks of water sharing mechanisms conflict resolution dialogue and models of cooperation and collaboration for key stakeholders towards possible solutions for effective equitable and strategic water management This book will be useful to scholars and researchers of development studies environment studies water studies public policy political science international relations conflict resolution political economy economics sociology and social anthropology environmental law governance and South Asian studies It will also benefit practitioners water policy thinktanks and associations policymakers diplomats and NGOs

Hydropolitical Vulnerability and Resilience Along International Waters, 2005 In Africa most major rivers freshwater lakes and aquifers are shared by two or more countries These nations are becoming increasingly vulnerable to conflict and their vulnerabilities are made more acute by climatic variations in precipitation increasing urbanization industrialization and environmental degradation The concept of resilience and vulnerability as it relates to water resources is tackled in this report within the framework of sustainability and relates to the ability of the human and bio physical systems to adapt to change

Konfliktlöser oder weitere Quelle potenzieller Konflikte? Patrick Wagner, 2012-12-11 Studienarbeit aus dem Jahr 2012 im Fachbereich Politik Region Naher Osten Vorderer Orient Note 2.00 Universität Passau Lehrstuhl für Politikwissenschaft Veranstaltung PS Innenpolitik Israels Sprache Deutsch Abstract Die vorliegende Arbeit soll Theorie und Praxis der Wasserversorgung in Israel und den Palästinensischen

Autonomiegebieten vergleichen und deren Konfliktpotenzial abschätzen. Hierbei gilt es die Hypothese zu überprüfen, dass die aktuelle Vorgehensweise Israels in der Wasserpolitik in mehrfacher Hinsicht Konfliktpotenzial für die Zukunft in sich birgt. Als theoretischer Rahmen dieser Arbeit soll hierbei die Kategorisierung der Konfliktkategorien in der Wasserpolitik von Kurt R. SPILLMANN dienen, welcher drei Typen von Wasserkonflikten unterscheidet.¹ Dem folgt eine geologische Beschreibung der Wasservorkommen auf israelischem Gebiet² und deren Nutzung durch Israel und die palästinensischen Autonomiegebiete. Anschließend wird die gültige Rechtslage im Umgang mit den Nachbarstaaten und in Bezug auf das Westjordanland und den Gazastreifen erläutert. Im Folgenden die Kennzeichen israelischer Wasserpolitik aufzuzeigen. Darauf aufbauend werden die Folgen des Wassermangels in den palästinensischen Autonomiegebieten für beide Seiten aufgezeigt, um Rückschlüsse vom Wasser auf den Nahostkonflikt zu ziehen. Schlussendlich wird die Gefahr eines Wasserkrieges knapp diskutiert.

Hydropolitics in the Third World Arun P. Elhance, 1999. With more than 50 percent of the world's landmass covered by river basins shared by two or more states, competition over water resources has always had the potential to spark violence. And growing populations and accelerating demands for fresh water are putting ever greater pressures on already scarce water resources. In this wide-ranging study, Arun Elhance explores the hydropolitics of six of the world's largest river basins. In each case, Elhance examines the basin's physical, economic, and political geography, the possibilities for acute conflict, and efforts to develop bilateral and multilateral agreements for sharing water resources. The case studies lead to some sobering conclusions about impediments to cooperation, but also to some encouraging ones among them that it may not be possible for Third World states to solve their water problems by going to war, and that eventually even the strongest riparian states are compelled to seek cooperation with their weaker neighbors. *Water Resource Conflicts and International Security*

Dhirendra K. Vajpeyi, 2012-01-01. *Water Resource Conflicts and International Security: A Global Perspective* is an edited collection by Dhirendra K. Vajpeyi which analyzes the increasing global demand for water in economic and social development and the dire need to efficiently manage this vital natural resource, particularly in water-scarce countries in the Middle East, Asia, and Africa. Several environmental and human-induced factors, such as urbanization, industrialization, climate change, and agricultural needs, have created a near-crisis situation in many countries. Subsequently, there is an increasingly intense competition to utilize available water resources in these most heavily affected regions: transboundary rivers, lakes, and streams, which are shared by more than one country, pose potential for political conflict, armed conflict, and in the best of cases, cooperation. The contributors of *Water Resource Conflicts and International Security* present ten case studies in seven chapters, highlighting the competition between countries in Asia, Africa, and the Middle East. In his conclusion, Dhirendra K. Vajpeyi suggests several policy measures that governments may implement in order to minimize the potential for conflict.

The Nile River System, Africa Bakenaz A. Zeidan, Aly Islam Metwally Aly, 2024-02-17. *The Nile River System: Africa's Ecohydrology and Management from Catchment to Coast*, Volume Two, provides a critical synthesis of knowledge for an

important global region It covers water availability and needs in the Nile basin focusing on socioeconomic hydrological and ecological aspects and the catchment coast continuum also providing the information needed to develop a policy for the river that is less skewed toward immediate human needs and more focused on environmental impacts Readers will find ecological perspectives recent stresses the current status of the basin and more The greater integration of ecological and river management themes is the main strength of this book making it a strong reference for academics and water resources managers as well as fishery experts aquatic scientists and social scientists Provides a basis for improved environmental management of the Nile River basin from its headwaters to the Mediterranean Sea Presents a multidisciplinary approach covering both environmental and societal needs Includes case studies from this diverse river that can be applied globally

Water Politics in the Middle East M. Dolatyar,T. Gray,1999-09-21 Most studies of water scarcity in the Middle East conclude that there is a significant risk of imminent conflict even warfare between states in the region This book demonstrates that the evidence does not support this doom laden prediction Indeed the authors show that although water scarcity has occasionally played a role in disputes in the Middle East it has much more often promoted co existence between adversaries The reasoning behind this hypothesis is that water is too critical to be put at risk by warfare

Water as a Catalyst for Peace Ahmed Abukhater,2013-09-05 Examining international water allocation policies in different parts of the world this book suggests that they can be used as a platform to induce cooperation over larger political issues ultimately settling conflicts The main premise is that water can and should be used as a catalyst for peace and cooperation rather than conflict Evidence is provided to support this claim through detailed case studies from the Middle East and the Lesotho Highlands in Africa These international cases including bilateral water treaties and their development and formation process and aftermath are analyzed to draw conclusions about the outcomes as well as the processes by which these outcomes are achieved It is demonstrated that the perception of a particular treaty as being equitable and fair is mainly shaped by the negotiation process used to reach certain outcomes rather than being determined mechanistically by the quantitative allocation of water to each party The processes and perceptions leading to international water conflict resolutions are emphasized as key issues in advancing cooperation and robust implementation of international water treaties The key messages of the book are therefore relevant to the geo political and hydro political aspects of water resources in the context of bilateral and multilateral conflicts and the trans boundary management of water resources which contributes insights to political ecology geo politics and environmental policy

Challenged Earth: An Overview Of Humanity's Stewardship Of Earth Stephen F Lincoln,2006-01-11 This timely book provides a comprehensive insight into the challenges facing humanity and Earth in the 21st century It opens with a discussion of the domination of all the continents and oceans by a growing human population This is followed by an appraisal of the extent to which water and food supplies will be able to accommodate this population which may reach eleven billion by 2100 The rapidly increasing ability to change biology and

evolution through genomics is considered next and complements a discussion of disease which is viewed largely as an evolutionary struggle between humanity and pathogens A seemingly insatiable demand for energy future energy supplies and the impact of their use on climate and attempts to ameliorate these effects are next examined The book concludes with a discussion of the partial destruction of the ozone layer and the international effort to repair the damage a *Human and Water Security in Israel and Jordan* Philip Jan Schäfer,2012-10-28 The work aims at answering the question as to how far discourses on human security are present in Jordan and Israel if they converge and if political solutions for the issue of water security could be derived The analysis is based on the assumption that from human security perspective common solutions for urgent problems can be derived more easily than out of a perspective of national security Yet it is acknowledged that according to a new security perspective different security threats are being identified by relevant actors An empirical analysis of written statements and utterances of the respective security elites establishes the methodological tool for the identification of human security discourses in Israel and Jordan Subsequently it is estimated how far water is presented as a matter of national security in Israel and Jordan using the theory of securitization **Boundary Issues in Central Asia** Necati Polat,2021-09-06 *Boundary Issues in Central Asia* provides detailed answers to What was the legal framework within which the new states of Central Asia attained statehood How did the administrative divisions of the former Soviet Union evolve almost over night into inter state frontiers and on what legal basis Are Central Asian states content with the post independence border arrangements What outstanding border issues with states adjacent to the former Soviet Central Asia were inherited by Central Asian states from the USSR the predecessor state What became in particular of the perennial border disputes of the predecessor state with China What border issues with the latter have since been settled by Central Asian states and what issues are pending resolution as well as to a host of other boundary related questions such as the minority self determination and ethno border issues with significant bearings on the stability of the existing territorial arrangements the legal regimes for the use of transboundary watercourses in the region including the dispute over the legal status of the Caspian Sea with its vast hydrocarbon resources Published under the Transnational Publishers imprint
