## **Contrasting Languages The Scope Of Contrastive Linguistics:**

Contrasting Languages Tomasz P. Krzeszowski, 2011-06-01 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Contrasting Languages Tomasz P. Krzeszowski, 1990      **Contrasting Languages** Tomasz P. Krzeszowski, 1990      Languages in Contact and Contrast Vladimir Ivir, Damir Kalogjera, 2011-04-20. The papers in this collection throw fresh light on the relation between language contact and contrastive linguistics. The book focuses equally on the mutual influence of linguistic systems in contact and on the language contrasts that govern the linguistic behaviour of the bilingual speaker.

Current Trends in Contrastive Linguistics María de los Ángeles Gómez González, J. Lachlan Mackenzie, Elsa M. González Álvarez, 2008-12-17. This book examines the contribution of various recent developments in linguistics to contrastive analysis. The articles range across a broad gamut of languages with most attention going to the languages of Europe. They show how advances in theory and computer technology are together impacting the field of contrastive linguistics. Part I focuses from a broadly functional cognitive viewpoint on the close link with typology stressing the importance of embedding the treatment of grammatical categories in their contexts of use. Part II turns to methodological issues exploring the enormous potential offered by parallel computer accessible corpora to contrastive linguistics and to enhancing the testability, authenticity and empirical adequacy of cross linguistic studies. Part III is concerned with contrastive semantics ranging from individual items to entire grammatical constructions and shows how meanings are coupled to language specific cognitive strategies and even to cultural differences in subjective awareness and the fashioning of personal identity.

**Advances in Corpus-Based Contrastive Linguistics** Karin Aijmer, Bengt Altenberg, 2013. Contrastive studies have experienced a dramatic revival in the last decades. By combining the methodological advantages of computer corpus linguistics and the possibility of contrasting texts in two or more languages, the structure and use of languages can be explored with greater accuracy, detail and empirical strength than before. The approach has also proved to have fruitful practical applications in a number of areas such as language teaching, lexicography, translation studies and computer aided translation. This volume contains twelve studies comparing linguistic phenomena in English and seven other languages. The

topics range from comparisons of specific lexical categories and word combinations to syntactic constructions and discourse phenomena such as cohesion and thematic structure The studies highlight similarities and differences in the use semantics and functions of the compared items as well as the emergence of new meanings and language change The emphasis varies from purely linguistic studies to those focusing on practical applications *Multilingualism and Applied Comparative Linguistics (Volume II)* Frank Boers, Jeroen Darquennes, Koen Kerremans, 2009-10-02 In February 2006 the first international conference on Multilingualism and Applied Comparative Linguistics MACL was held in Brussels Belgium The aim of the MACL conference was to bring together scholars from various branches of applied linguistics with a shared interest in cross linguistic and cross cultural communication The conference thus fostered an exchange of knowledge and expertise among researchers from various disciplines including educational linguistics cultural linguistics terminography translation studies and studies of specialised languages The present book is the second of two volumes containing a selection from the approximately 120 papers that were presented at that three day event The book comprises five chapters reflecting different research perspectives on cross linguistic and cross cultural communication The first chapter covers research articles on metaphors and planned languages The second chapter comprises articles dealing with language attitudes language proficiency and language practices in cross linguistic and cross cultural communicative contexts Chapter three features articles in the field of discourse analysis research In the fourth chapter research is presented that pertains to terminology and specialised languages Finally chapter five deals with translation studies **Cross-linguistic Correspondences**

Thomas Egan, Hildegunn Dirdal, 2017-11-15 Contrastive Linguistics is an expanding field as witnessed by the publication in recent years of an increasing number of monographs collected volumes and journal articles The present volume which comprises an introduction and ten chapters dealing with lexical contrasts between English and other languages shows advances within the well established lexical work in the field Each of the chapters takes lexical items as its starting point and compares English with one or more languages The languages represented are Spanish Lithuanian Swedish German Norwegian and Czech Furthermore they emphasise the link between lexis and grammar not only within the same language but also across languages Finally several studies represent one of the more recent developments of contrastive linguistics namely a growing focus on genre and register comparisons The book should appeal to both established scholars and advanced students with an interest in lexis genre corpus linguistics and or contrastive linguistics **Routledge**

**Encyclopedia of Language Teaching and Learning** Michael Byram, 2004 This handbook deals with all aspects of contemporary language teaching and its history Produced for language teaching professionals it is also useful as a reference work for academic studies at postgraduate level **Kontrast und Äquivalenz** Wolfgang Börner, 1998 **The category of definiteness in language pair German-Macedonian** Biljana Ivanovska, 2015-09 The monograph The category of definiteness in the language pair German and Macedonian focuses on the contrastive analysis of German and Macedonian

Untersuchungen zur Verbalsyntax der Liviusübersetzungen in die romanischen Sprachen Peter Stein, 2014-10-15 Die vorliegende Arbeit geht von der Überlegung aus, da zu den Charakteristika einer Sprache auch die Häufigkeit der syntaktischen Konstruktionen gehört und da sich syntaktischer Wandel folglich weniger im Ersatz alter Konstruktionen durch neue äußert als vielmehr in einem Wandel der Vorkommenshäufigkeit der miteinander konkurrierenden Konstruktionen, daß syntaktischer Wandel erfolgt primär nicht auf der Ebene der Sprache sondern auf der Ebene der Norm Gegenstand der Untersuchung sind 42 romanische Übersetzungen der ersten vierzehn Kapitel von Titus Livius *Ab Urbe condita* in sechs Sprachen und aus sieben Jahrhunderten 1323 bis heute denn Übersetzungen bieten auf Grund des immer gleichen Textes die beste Grundlage für vergleichende Untersuchungen zur

Vorkommenshäufigkeit bestimmter Phänomene Die Untersuchung ist diachron und synchron sprachvergleichend ausgerichtet und gilt der Konkurrenz zwischen finiten und infiniten Konstruktionen in den verschiedenen Satzfunktionen Für zwei repräsentative Texte werden die quantitativen Daten in Tabellen zusammengestellt und analysiert die Ergebnisse werden durch die Interpretation ausgewählter Sätze auf der Grundlage aller Übersetzungen illustriert kritisch bewertet und vertieft Diesem Hauptteil der Arbeit gehen theoretisch methodologische Überlegungen Kapitel 1 und eine Vorstellung der Übersetzungen Kapitel 2 voraus Eine Synopse von 42 romanischen Übersetzungen der Kapitel 1-14 des ersten Buchs der ersten Dekade von *Ab Urbe condita* beschließt die Arbeit

Reviewing Linguistic Thought Sophia Marmaridou, Kiki Nikiforidou, Eleni Antonopoulou, 2011-05-12 The volume focuses on the interaction of different levels of linguistic analysis syntax semantics pragmatics and the interfaces between them on the convergence of different theoretical models in explaining linguistic phenomena and on recent interdisciplinary approaches to linguistic analysis Its theoretical importance lies in bringing out and highlighting some of the common trends and directions found in recent theoretical frameworks which focus on themes traditionally downplayed by mainstream 20th century linguistics It further familiarizes the reader with the methodology used in such frameworks and shows how methodology developed in different theoretical perspectives can often converge in yielding similar results While representing different traditions all papers in this volume assume a necessity for the study of language to be paired with the study of cognition and for linguistics to develop more substantive links to other disciplines thereby creating converging trends into the new century The structure of this volume reflects this assumption along a cline of theoretical models and methodologies starting from those that view language as part of cognition and ending with those that consider the language faculty to be distinct from general cognition Thus the volume is divided into five parts I relaxing level boundaries II focusing on level interaction III drawing on different theories IV exploring field interaction and V interdisciplinary perspectives on modularity The volume is of particular relevance to scholars and students who are interested in an in depth overview of 20th century linguistics outside beyond the generative paradigm and in exploring the development of 20th century legacy into current work

**Space and Time in Languages and Cultures** Luna Filipović, Kasia M. Jaszczolt, Katarzyna Jaszczolt, 2012 This volume offers novel insights into linguistic diversity in the domains of spatial and temporal reference searching for uniformity amongst diversity A number of authors discuss expression of dynamic spatial relations cross linguistically in a vast range of typologically different languages such as Bezhta French Hinuq Italian Japanese Polish Serbian and Spanish among others The contributions on linguistic expression of time all shed new light on pertinent questions regarding this cognitive domain such as the hotly debated relationship between cross linguistic differences in talking about time and universal principles of utterance interpretation modelling temporal inference through aspectual interactions as well as the complexity of the acquisition of tense aspect relations in a second language The topic of space and time in language and culture is also represented from a different point of view in the sister volume Space and Time in Languages and Cultures Language Culture and Cognition HCP 37 which discusses spatial and temporal constructs in human language cognition and culture in order to come closer to a better understanding of the interaction between shared and individual characteristics of language and culture that shape the way people interact with each other and exchange information about the spatio-temporal constructs that underlie their cognitive social and linguistic foundations
