Role of Emotions in Preventative Health Communication* Jessica Gall Myrick,2015-09-17 Health related media permeate our
modern experience from using an online search engine to reading a pamphlet about vaccinations at the doctor s office or
watching a television news report on the dangers of sitting too much This book makes the argument that if prevention
focused health messages are to motivate behavior change they must tug at the heartstrings and researchers need to
understand more precisely how different emotional reactions influence health message effects In making this case this book
takes a quantitative social science based approach to understanding the role of emotions in shaping individual level effects to
preventative health messages disseminated through mass media channels The book focuses on how discrete emotions evoked
by preventative health media messages influence how audiences respond to those messages Are they persuaded to change
their behavior Will they seek more information Will they share information with others Will they support prevention focused

policies While a rich literature exists on the effects of health related fear appeals on audiences researchers have yet to fully explore the role that other discrete emotions play in health communication processes and outcomes This book fills that gap by providing an overview of the role of nine different emotions both positive and negative in various prevention focused health communication settings It also introduces readers to commonly employed emotional theories and concepts and relates them to literature on prevention focused health and policy communication In addition to reviewing and synthesizing the literature this book offers new directions to researchers hoping to improve the effectiveness of prevention focused health messages The Complete Concordance to Shakespeare Mary Cowden Clarke,1886
