Criminological Theory Anthony Walsh, 2014-09-19 Criminologists can benefit from questioning the underlying assumptions upon which they rest their work Philosophy has the ability to clarify our thoughts inform us of why we think about things the way we do solve contradictions in our thinking we never knew existed and even dissolve some dichotomies we thought were cast in stone One of those dichotomies is free will vs determinism Criminology must reckon with both free will and agency as posited by some theories and determinism as posited by others including the ever more influential fields of genetics and biosocial criminology **Criminological Theory Assessing Philosophical Assumptions** examines philosophical concepts such as these in the context of important criminological theories or issues that are foundational but not generally considered in the literature on this topic The uniqueness of this treatment of criminological theory is that rather than reporting what this person or that has said about a particular theory Walsh exposes the philosophical assumptions underlying the theory Students and scholars learn to clarify their own biases and better analyze the implications of a broad range of theories of crime and justice

New Directions in Criminological Theory Steve Hall, Simon Winlow, 2012-06-25 This edited collection brings together established global scholars and new thinkers to outline fresh concepts and theoretical perspectives for criminological research and analysis in the 21st century Criminologists from the UK USA Canada and Australia evaluate the current condition of criminological theory and present students and researchers with new and revised ideas from the realms of politics culture and subjectivity to unpack crime and violence in the precarious age of global neoliberalism These ideas range from the micro realm of the personality disorder to the macro realm of global power crime Rejecting or modifying the orthodox notion that crime and harm are largely the products of criminalisation and control systems these scholars bring causes and conditions back into play in an eclectic yet thematic way that should inspire students and researchers to once again investigate the reasons why some individuals and groups elect to harm others rather than seek sociability This collection will inspire new criminologists to both look outside their discipline for new ideas to import and to create new ideas within their discipline to reinvigorate it and further strengthen its ability to explain the crimes and harms that we see around us today This book will be of particular interest to academics and both undergraduate and postgraduate students in the field of criminology especially to those looking for theoretical concepts and frameworks for dissertations theses and research reports
