Research in Information Studies W.

Bernard Lukenbill, 2012-04-11 Research is integrated into the whole fabric of modern day society and culture. It affects our lives in so many ways from finding a job to knowing how to manage our health. Information studies designed to understand this array of information encompasses a wide expanse of disciplines. Many of these areas draw their philosophical and research bases from a mixture of disciplines within the social sciences and the humanities. This book takes a holistic view of these diverse areas and shows how they are united through the common thread of enhancing our knowledge of and understanding the world in which we all live.

Handbook of Research on Global Issues in Next-Generation Teacher Education Keengwe, Jared, Mbae, Justus G., Onchwari, Grace, 2016-02-17 There is no question that all aspects of modern life have been imbued with technology. In education, students are becoming increasingly savvy in their use of the myriad technologies and virtual tools and must be taught adequate complimentary skills to be effective in the 21st century workforce. To answer this call, teachers' education must reflect modern demands by integrating the use of these tools as part of their teaching practices. The Handbook of Research on Global Issues in Next Generation Teacher Education addresses this need with precise comprehensive research and case studies. With strategies and emerging research on the empowerment of tomorrow's inspirational educational leaders, this handbook of research outlines the challenges, benefits, and opportunities of engaging teachers with the 21st century skills their students require. Teachers, students of education, administrators, and policy makers will find this publication offers a number of innovative solutions.

More Statistical and Methodological Myths and Urban Legends Charles E. Lance, Robert J. Vandenberg, 2014-11-05 This book provides an up-to-date review of commonly undertaken methodological and statistical practices that are based partially in sound scientific rationale and partially in unfounded lore. Some examples of these methodological urban legends are characterized by manuscript critiques such as: a) your self-report measures suffer from common method bias; b) your item to subject ratios are too low; c) you can't generalize these findings to the real world; or d) your effect sizes are too low. What do these critiques mean and what is their historical basis? More Statistical and Methodological Myths and Urban Legends catalogs several of these quirky practices and outlines proper research techniques. Topics covered include sample size requirements, missing data, bias in correlation matrices, negative wording in survey research, and much more.
