**The Ancient Maya Marketplace** Eleanor M. King,2015-11-12 Trading was the favorite occupation of the Maya according to early Spanish observers such as Fray Diego de Landa 1566 Yet scholars of the Maya have long dismissed trade specifically market exchange as unimportant They argue that the Maya subsisted primarily on agriculture with long distance trade playing a minor role in a largely non commercialized economy The Ancient Maya Marketplace reviews the debate on Maya markets and offers compelling new evidence for the existence and identification of ancient marketplaces in the Maya Lowlands Its authors rethink the prevailing views about Maya economic organization and offer new perspectives They attribute the dearth of Maya market research to two factors persistent assumptions that Maya society and its rainforest environment lacked complexity and an absence of physical evidence for marketplaces a problem that plagues market research around the world Many Mayanists now agree that no site was self sufficient and that from the earliest times robust local and regional exchange existed alongside long distance trade Contributors to this volume suggest that marketplaces the physical spaces signifying the presence of a market economy did not exist for purely economic reasons but served to exchange information and create social ties as well The Ancient Maya Marketplace offers concrete links between Maya archaeology ethnohistory and contemporary cultures Its in depth review of current research will help future investigators to recognize and document marketplaces as a long standing Maya cultural practice The volume also provides detailed comparative data for premodern societies elsewhere in the world

Each chapter presents a brief historical summary of research in the field and discusses topics and issues of current concern to people doing research in linguistic anthropology. The handbook is organized into four parts: Language and Cultural Productions, Language Ideologies and Practices of Learning Language, and the Communication of Identities and Language and Local Global Power, and covers current topics of interest at the intersection of the two fields while also contextualizing them within discussions of fieldwork practice. Chapter titles include: What Anthropologists Look For, Patterns, Thinking Holistically, Thinking Theoretically, Using Science to Think Anthropologically, Thinking about Change, Biological Evolution and Culture Change, Why Do Anthropological Experts Disagree, Thinking and Acting Ethically in Anthropology, Applying Anthropological Knowledge, and How to Take Anthropology Tests. For a clearer and more meaningful understanding of anthropology. *Communicating* Ruth Finnegan, 2023-10-30

Treatments of human communication mostly draw on cognitive and word-centred models to present it as predominantly a matter of words. This Finnegan argues seriously underestimates the far-reaching multi-modal qualities of human interconnecting and the senses of touch, olfaction, and above all, audition and vision that we draw on. In an authoritative and readable account, Ruth Finnegan brings together research from linguistic and sensory anthropology, material culture, non-verbal communication, computer-mediated communication, and strikingly, research on animal communication such as the remarkable gesture systems of great apes. She draws on her background in classical studies and her long anthropological experience to present illuminating examples from throughout the world, past and present. The result is to uncover an amazing array of sounds, sights, smells, gestures, looks, movements, touches, and material objects used by humans and other animals to interconnect both nearby and across space and time. She goes on to first explore the extra-sensory modes of communication.

now being revealed in the extraordinary new science research and then in an incendiary conclusion to deny the long prevailing story of human history by questioning whether orality really came before literacy whether it was really through the acquisition of language that our prehistoric cave painting ancestors made a sudden leap into being true humans and finally astonishingly to ask whether human communicating had its first roots not after all in verbal language but something else Not to be missed this highly original book brings a fresh perspective on among other things that central topic of interest today the dawn of human history and on what being homo sapiens really means This revised and updated edition has additional illustrations updated chapters and a new concluding chapter A provocative and controversial account that will stir worldwide debate this book is an essential transdisciplinary overview for researchers and advanced students in language and communication anthropology and cultural studies
