**Upwave** John Montgomery, 2016-02-17 Countering the many claims that the best days of capitalism are over following the economic meltdown of 2008 onwards this book provocatively argues that a new golden age of capitalism or upwave began around 2002 and despite the unstable markets in the western world of the past few years this upwave will produce previously unseen levels of wealth creation during the next twenty years Basing this theory on the commercialisation of new technologies and the growth of new markets the author claims that these positive trends are key to economic recovery in the US UK and Europe It argues that the most serious problem facing some countries in the west is government debt and that macroeconomic policy is of limited use in flexible and adaptive economies where innovation entrepreneurship and private investment should be encouraged in a range of cities and city regions This highly original book will interest those concerned with national economies nation states and urban policy

services work for customers in real life Greene explains how Porsche pit its designers against each other to create its bestselling Cayenne SUV Clif listened intently to customers resulting in the industry changing Luna energy bar OXO paid meticulous attention to the details turned its LiquiSeal mug from an abysmal failure into one of its greatest successes LEGO started saying no to its designers saving its brick business in the process Greene shows how important it is to build a culture in which design is more than an after the fact concern it s part of your company s DNA Design matters at every stage of the process It isn t easy and it increases costs but it also boosts profits sometimes to a massive extent In an increasingly competitive marketplace design represents the best chance you have of transcending your competitors

**The Big Idea** Robert Jones, 2011-05-26 Today s marketplace is a war of ideas Unless you stand for something you won t stand out Nowadays anyone can copy your product or even your business model What they can t copy is your worldview your attitude your special way of doing things So the war in the marketplace will be a war of ideas The Big Idea maps this new territory and shows how big ideas make great companies Unlike business models or the catchphrases of management gurus a big idea is emotional And unlike corporate ideologies vision or brand it is shared between customers and employees alike Companies who have distinguished themselves with a big idea include Virgin not British Airways John Lewis not Debenhams Apple not IBM Ikea not MFI Orange not Cellnet Customers don t just buy from these companies they buy into them they choose them not through economic logic but emotional logic As products and services become more and more similar emotional logic will become the single most important business driver The benefits of appealing to it can already be seen Orange has a much lower turnover of customers than Cellnet and Ikea operates in over 23 countries while MFI only does business in Britain A big idea isn t just a cute thing to have it s the spark that makes places thrive while others just exist
