Supply Chain Governance for Social Sustainability Nandita Farhad, 2019-08-15 This PhD thesis approaches the phenomenon of supply chain governance for social sustainability in the ready made garment industry in Bangladesh This research is based on a study of eight large multinational corporations e g clothing brands and retailers and their ready made garment suppliers The purpose of this research is to understand how supply chain governance mechanisms and governance structures improve social sustainability performance when stakeholders are engaged The study identifies four main governance systems namely market based hierarchical controlbased collaborative multi stakeholder based and relational cross sectoral based These governance systems are employed in the supply chain by the multinational corporations in combination with different stakeholders such as suppliers multi stakeholder initiatives and non government organisations The study focuses on the challenges faced by the multinational corporations to ensure social sustainability whilst at the same time incorporating suppliers viewpoints on the consequences of different governance systems for social sustainability This research shows the choice of governance structures from market based hierarchy based collaboration based and relational based depend on the

cost of managing relationships with the stakeholders and potential risks of governance in a given situation An effective governance structure for a multinational corporation in a particular context is determined by how well the structure supports governance mechanisms to reduce associated transaction risks that results from potential opportunistic behaviour of the suppliers In this research it is argued that governance structure provides the platform for practicing a set of governance mechanisms The study claims that social sustainability governance incorporates three mechanisms with separate outcomes one consists of buyer driven control based mechanisms which include codes of conduct supplier assessment and monitoring and supplier training for regular social compliance the second consists of multi stakeholder based governance mechanisms for structural compliance when unexpected problems occur for example building collapse electrical and fire safety risks emerge and the third comprises cross sectoral governance mechanisms when the multinational corporations involve with non government organisations for social development of the garment workers and community by facilitating drinking water health hygiene education and so on This thesis contributes to the Sustainable Supply Chain Management literature by expanding knowledge of supply chain governance through bringing an understanding of governance mechanisms governance structures and stakeholder engagements for social sustainability As the demand for supply chain governance for social sustainability are growing this thesis can help responsible corporate sourcing managers to develop a deeper understanding of how supply chain governance can affect social sustainability Denna doktorsavhandling tar sig an fenomenet leverantörsstyrning för social hållbarhet i kläddindustrin i Bangladesh Forskningen baseras på en studie av två stora multinationella företag tillika utförelsen av kvalitets och världsmärken Syftet med studien är att förstå hur leverantörsstyrningsmekanismer och styrstrukturer kan förbättra socialt hållbarhetsarbete när flera aktörer är engagerade och samverkar Resultatet av studien indikerar att multinationella företag de facto engagerar sig med andra aktörer för att förbättra sin förmåga att bedriva socialt hållbarhetsarbete Studien identifierar fyra olika typer av leverantörsstyrssystem ett marknadsbaserat ett hierarkiskt kontrollbaserat ett kollaborativt multi intressentbaserat samt ett relationellt sektorsvergränsande system Dessa styrningssystem tillämpas i leverantörskedjan av de multinationella företagen i samarbete med andra aktörer såsom leverantörer multi intressentinitiativ och icke statliga organisationer Studien fokuserar dels på de utmaningar som föreligger för de multinationella företagen när det gäller att säkerställa social hållbarhet dels på hur leverantörer uppfattar konsekvenserna av de olika styrningssystemen för social hållbarhet Denna forskning visar att valet av styrstruktur främst marknadsbaserad hierarkibaserad kollaborativ och relationell beror dels av kostnaden för att hantera och upprätthålla relationer med de olika aktörerna dels av de potentiella riskerna som föreligger i en viss situation Vad som utgör en effektiv styrstruktur för ett multinationellt företag i en viss given kontext avgörs av hur väl strukturen stödjer styrningsmekanismer för att reducera transaktionsrisker som bottnar i ett potentiellt opportunistiskt beteende hos leverantörerna I denna forskning argumenteras det för att struktur ger en plattform för att tillämpa ett antal styrningsmekanismer Studien visar att styrning av socialt hållbarhet

llbarhet omfattar tre typer av mekanismer med olika utgång En består av k parstyrda styrningsmekanismer som omfattar uppförandekoder leverantörskontroll och leverantörsutbildning Den andra består av multi initiativbaserade styrningsmekanismer av hur det strukturella arbetet för att hantera oönskade problem t ex byggfel och brandskadehärskersrisker efterföljs Det tredje omfattar sektors övergripande styrningsmekanismer där de multinationella företagen samverkar med lokala icke statliga organisationer i projekt som syftar till social utveckling tillgång till rent vatten h hso utbildningsinsatser etc för fabriksarbetarna och det omgivande samhället Denna avhandling bidrar till Sustainable Supply Chain Management litteraturen där den utvidgar kunskapen om leverantörsstyrning för social hållbarhet genom en analys av de rådande styrningsmekanismer styrstrukturer och olika aktörers engagemang för social hållbarhet I takt med att behovet av leverantörsstyrning för social hållbarhet ökar kan denna avhandling hjälpa ansvariga corporate sourcing managers att utveckla en förbättrad förståelse för hur leverantörsstyrning kan påverka social hållbarhet

Achieving Workers' Rights in the Global Economy Richard Appelbaum, Nelson Lichtenstein, 2016-05-19 The world was shocked in April 2013 when more than 1 100 garment workers lost their lives in the collapse of the Rana Plaza factory complex in Dhaka It was the worst industrial tragedy in the two hundred year history of mass apparel manufacture This so

called accident was in fact just waiting to happen and not merely because of the corruption and exploitation of workers so common in the garment industry In *Achieving Workers Rights in the Global Economy* Richard P Appelbaum and Nelson Lichtenstein argue that such tragic events as well as the low wages poor working conditions and voicelessness endemic to the vast majority of workers who labor in the export industries of the global South arise from the very nature of world trade and production Given their enormous power to squeeze prices and wages northern brands and retailers today occupy the commanding heights of global capitalism Retail dominated supply chains such as those with Walmart Apple and Nike at their heads generate at least half of all world trade and include hundreds of millions of workers at thousands of contract manufacturers from Shenzhen and Shanghai to Sao Paulo and San Pedro Sula This book offers an incisive analysis of this pernicious system along with essays that outline a set of practical guides to its radical reform Contributors Mark Anner Penn State University Richard P Appelbaum University of California Santa Barbara Jennifer Bair University of Colorado Boulder Renato Bignami labor inspector Brazil Jeremy Blasi UNITE HERE Local 11 Los Angeles and Penn State Anita Chan Australian National University Jenny Chan University of Oxford Jill Esbenshade San Diego State University Gary Gereffi Duke University Jeff Hermanson International Union League for Brand Responsibility Jason Kibbey Sustainable Apparel Coalition Nelson Lichtenstein University of California Santa Barbara Xubei Luo World Bank Anne Caroline Posthuma International Labour Organization Scott Nova Worker Rights Consortium Ngai Pun Hong Kong Polytechnic University Katie Quan University of California Berkeley Brishen Rogers Temple University Robert J S Ross Clark University Mark Selden Cornell University and New York University Chris Wegemer Santa Barbara California
