Psychonephrology Ana Hategan, James A. Bourgeois, Azim S. Gangji, Tricia K.W. Woo, 2022-01-01 The book focuses on pharmacological and non pharmacological approaches of psychiatric syndromes that commonly occur in patients with kidney disease It specifically reviews principles of psychotherapy and psychopharmacology with an emphasis on organ impairment and drug drug interactions specific to nephrology This book also covers issues with medication nonadherence in patients

with chronic kidney disease and psychiatric comorbidity as well as the associated issues in dialysis and renal transplantation. Additionally, chapters cover various other topics addressing an active stance towards health promotion in chronically ill patients, including the critical role of the diet and physical activity. Such advice is often complex and changing depending on the stage of chronic kidney disease and the individual needs of the patient. Written by specialists in the field, *Psychonephrology: A Guide to Principles and Practice* serves as a valuable reference and teaching tool that provides an opportunity for learning across a rapidly evolving medical field.

Operational Intelligence for Health, Wellness, and Leadership Gamaliel Baer, David Schary, 2023-10-16. *Operational Intelligence for Health, Wellness, and Leadership* (OIHWL) addresses human behavior and the impact of lifestyle on the Big Three health outcomes of heart attack, cancer, and suicide. It weaves together the concepts of resilience, physical wellness, nutritional wellness, mental wellness, and leadership. OIHWL's model for behavior change is built using Aristotle's philosophy of responsibility. OIHWL is designed to show the application of the behavioral change model throughout the book. The result is a logically consistent and easy-to-follow framework that any firefighter can apply to their life and that any fire department can adopt and implement as education for its members. This remains the case even if some or all of the hundreds of citations eventually age out because the model is true. The final chapter presents an objective and thus assessable definition of leadership. It aims to displace the decades of leadership theory that is subjective in nature and often indistinguishable from management theory. Just as NFPA outlines categorically that certain fire apparatus are aerials and not engines, there is a way to distinguish categorically between leadership and management. OIHWL is the comprehensive guide for learning how to optimize behavior that is within your control.

Caring for Caregivers to Be Jonathan Ripp, Larissa R. Thomas, 2023. Medicine as a profession has been considered a challenging career choice throughout the ages. And across time, it has often been considered more than just a profession. For many, it is a calling, a way of life, and for those that do feel called to the work, they may derive greater meaning from it. This level of commitment to career is in effect a contract with society in the interest of caring for the patient. Perhaps describing medicine as a calling is an appropriate characterization since the rewards of being a physician may be greater than the investment. Traditionally, the return on this commitment has included prestige and position in society, financial remuneration, and significant meaning derived from one's career. Some have argued that while the societal position of the physician has declined and relative compensation has been stagnant, steady and significant rises in the cost of education, the potential to experience meaning from the work has remained high. Nonetheless, there is significant current concern that the changing landscape of medicine has tipped the balance for the physician away from being able to

experience the more meaningful aspects of work such as patient interaction towards an increasing burden of more meaning less demands e g clerical work documentation billing etc Furthermore there has developed an understanding that the well being of the health professional workforce is a necessary component of an optimally functioning health care system
