Journal of Developmental Education ,2010 **Topological Modular Forms** Christopher L. Douglas, John Francis, André G. Henriques, Michael A. Hill,2014-12-04 The theory of topological modular forms is an intricate blend of classical algebraic modular forms and stable homotopy groups of spheres The construction of this theory combines an algebro geometric perspective on elliptic curves over finite fields with techniques from algebraic topology particularly stable homotopy theory It has applications to and connections with manifold topology number theory and string theory This book provides a careful accessible introduction to topological modular forms After a brief history and an extended overview of the subject the book proper commences with an exposition of classical aspects of elliptic cohomology including background material on elliptic curves and modular forms a description of the moduli stack of elliptic curves an explanation of the exact functor theorem for constructing cohomology theories and an exploration of sheaves in stable homotopy theory There follows a treatment of more specialized topics including localization of spectra the deformation theory of formal groups and Goerss Hopkins obstruction theory for multiplicative structures on spectra The book then proceeds to more advanced material including discussions of the string orientation the sheaf of spectra on the moduli stack of elliptic curves the homotopy of topological modular forms and an extensive account of the construction of the spectrum of topological modular forms The book concludes with the three original pioneering and enormously influential manuscripts on the subject by Hopkins Miller and Mahowald **The SAGE Encyclopedia of Online Education** Steven L. Danver,2016-09-20 Online education both by for profit institutions and within traditional universities has seen recent tremendous growth and appeal but online education has many aspects that are not well understood The SAGE Encyclopedia of Online Education provides a thorough and engaging reference on all aspects of this field from the theoretical dimensions of teaching online to the technological aspects of implementing online courses with a central focus on the effective education of students Key topics explored through over 350 entries include Technology used in the online classroom Institutions that have contributed to the growth of online education Pedagogical basis and strategies of online education Effectiveness and assessment Different types of online education and best practices The changing role of online education in the global education system *Catalog of Copyright Entries. appropriate scaffolding and encouragement all students can learn a rhetorical approach to argument and gain access to rigorous academic content Teaching Arguments opens the door and helps them pay closer attention to the acts of meaning around them to notice persuasive strategies that might not be apparent at first glance When we analyze and develop arguments we have to consider more than just the printed words on the page We have to evaluate multiple perspectives the tension between belief and doubt the interplay of reason character and emotion the dynamics of occasion audience and purpose and how our own identities shape what we read and write Rhetoric teaches us how to do these things Teaching Arguments will help students learn to move beyond a superficial response to texts so they can analyze and craft sophisticated persuasive arguments a major cornerstone for being not just college and career ready but ready for the challenges of the world
