course as humans spread and despoil the planet these fearsome predators may only survive on the other side of glass barriers and chain link fences Their gradual disappearance is changing the nature of our own existence We no longer occupy an intermediate position on the food chain instead we survey it invulnerably from above so far above that we are in danger of forgetting that we even belong to an ecosystem David Quammen's enthralling new book covers the four corners of the globe as he explores the fate of lions in India's Gir forest saltwater crocodiles in Northern Australia brown bears in the mountains of Romania and Siberian tigers Tracking these great and terrible beasts through the toughest terrain in the world Quammen is equally intrigued by the traditional relationship between the great predators and the people who live among them and weaves into his story the fears and myths that have haunted humankind for 3000 years **Perseus** Paul D.
