Burks, Bob Regan, Mark Urban, 2007-03-19. The power of the Web lies in the fact that anyone and everyone can access it and this should also extend to users with disabilities. Accessibility is about making websites accessible to those with aural visual or physical disabilities or rather constructing websites that don't exclude these people from accessing the content or services provided. This book gives you all you need to know about web accessibility whether you are a web designer or developer who wants your sites to be accessible or a business manager who wants to learn the impact of web accessibility laws on your websites. After an overview of the accessibility law and guidelines and a discussion about accessibility and its implementation in the enterprise the book goes on to show how to implement accessible websites using a combination of concise references and easy to follow examples covering Understanding assistive technologies Creating accessible content using XHTML JavaScript CSS Flash and PDFs Testing against WCAG including 2.0 and Section 508 Retrofitting inaccessible sites where necessary. The book concludes with an in depth analysis of accessibility law around the world. If you're concerned about the legal and moral implications of web accessibility then this book is perfect.
