Beginning Power BI With Excel 2013 Self Service Business Intelligence Using Power Pivot Power View Power Query And Power Map:

Beginning Power BI with Excel 2013 Dan Clark, 2014-10-09 Understanding your company's data has never been easier than with Microsoft's new Power BI package for Excel 2013. Consisting of four powerful tools: Power Pivot, Power View, Power Query, and Power Maps, Power BI makes self-service business intelligence a reality for a wide range of users, bridging the traditional gap between Excel users, business analysts, and IT experts, and making it easier for everyone to work together to build the data models that can give you game-changing insights into your business. *Beginning Power BI with Excel 2013* guides you step by step through the process of analyzing and visualizing your data. Daniel R. Clark, an expert in BI training and a regular speaker on these topics, takes you through each tool in turn, using hands-on activities to consolidate what you've learned in each chapter. Starting with Power Pivot, you will create robust, scalable data models which will serve as the foundation of your data analysis. Once you have mastered creating suitable data models, you will use them to build compelling, interactive visualizations in Power View. It's often necessary to combine data from disparate sources into a data model. Power Query allows you to easily discover, combine, and refine data from a variety of sources so you can make accurate judgments with all the available information. Geographical awareness is another common requirement of data analysis. Using Power Maps, you will create captivating visualizations that map your data in space and time. *Beginning Power BI with Excel 2013* is your practical guide to getting maximum insight from your data and presenting it with impact. *High Impact Data Visualization with Power View, Power Map, and Power BI* Adam Aspin, 2014-06-24 High Impact Data Visualization with Power View, Power Map, and Power BI helps you take business intelligence delivery to a new level that is interactive, engaging, even fun, all while driving commercial success through sound decision making. Learn to harness the power of Microsoft's flagship self-service business intelligence suite to deliver compelling and interactive insight with remarkable ease. Learn the essential techniques needed to enhance the look and feel of reports and dashboards so that you can seize your audience's attention and provide them with clear and accurate information. Also learn to integrate data from a variety of sources and create coherent data models displaying clear metrics and attributes. Power View is Microsoft's ground-breaking tool for ad hoc data visualization and analysis. It's designed to produce elegant and visually arresting output. It's also built to enhance user experience through polished interactivity. Power Map is a similarly powerful mechanism for analyzing data across geographic and political units. Power Query lets you load, shape, and streamline data from multiple sources. PowerPivot can extend and develop data into a dynamic model. Power BI allows you to share your findings with colleagues and present your insights to clients. *High Impact Data Visualization with Power View, Power Map, and Power BI* helps you master this suite of powerful tools from Microsoft. You'll learn to identify data sources and to save time by preparing your underlying data correctly. You'll also learn to deliver your powerful visualizations and analyses through the cloud to PCs, tablets, and smartphones. Simple

techniques take raw data and convert it into information Slicing and dicing metrics delivers interactive insight Visually arresting output grabs and focuses attention on key indicators
