Environmental Studies Anindita Basak, 2009 **ENVIRONMENTAL SCIENCE FOR BEGINNERS** Dr. Yerramsetty Abbulu & Dr. Chandan Kumar P., 2023-10-13 Environment is everything that is around us. It can be living or non-living things. It includes physical, chemical, and other natural forces. Living things live in their environment. They constantly interact with it and change in response to conditions in their environment. In the environment, there are interactions between animals, plants, soil, water, and other living and non-living things.

A Text Book of Environmental Studies (As per UGC Syllabus) Dr. Shanta Satyanarayan, Dr. Suresh Zade, Dr. Shashikant Sitre, Dr. Pravin Meshram, 2009-07-14 This book is written in accordance with the syllabus framed by the University Grants Commission (UGC) as per the directives of the Supreme Court of India to cater to the exhaustive subject of Environmental Studies. All the affiliated colleges of Indian Universities have incorporated the subject Environmental Studies at the undergraduate level based on this directive recently. So keeping this in mind, the present book is prepared in depth to fulfill the needs of students.

Environmental Biotechnology Roberto Adkins &, 2019-11-02 The application of Biotechnology to solve the environmental problems in the environment and in the ecosystems is called Environmental Biotechnology. It is applied and it is used to study the natural environment. According to the International Society for Environmental Biotechnology, the environmental Biotechnology is defined as an environment that helps to develop, efficiently use, and regulate the biological systems and prevent the environment from pollution or from contamination of land, air, and water. We have worked efficiently to sustain an environment-friendly Society. Environmental biotechnology, in particular, is the application of processes for the protection and restoration of the quality of the environment. Environmental biotechnology can be used to detect, prevent, and remediate the emission of pollutants into the environment in a number of ways. Biotechnology stands on the understanding of the molecular basis of biological cell functions and the ability of mankind to alter cell functions to make it produce products required by society. New techniques available with biotechnology hold potentials for developing products and processes in various sectors of agriculture, horticulture, floriculture, forestry, animal husbandry, healthcare, energy generation, and environmental protection. This book is useful to the students pursuing advanced and specialized courses, academicians, researchers, scientists, administrators, industrialists, environmental lawyers, rural technologists, and the interested people in general.

Biodiversity and Environmental Conservation Justice Ross & Roberto Adkins, 2018-10-09 Biodiversity is the variety of all the genes, species, and ecosystems which are found on our planet. It provides humanity with the cornucopia of goods and services from food, energy, and materials to the genes which protect our crops and cure our diseases. The loss of the earth's biological diversity is one of the most pressing environmental and development issues. Sustainability highlights the idea that the current use of natural resources should not diminish the options of future generations, and maintaining biodiversity is clearly one of the requirements for meeting this goal. Biodiversity conservation addresses the remarkable growth in concern at all levels for living things and the environment and

increased appreciation of the links between the state of ecosystems and the state of humankind Building on a wealth of research and analysis by the conservation community worldwide this book provides a comprehensive and accessible view of key global issues in biodiversity It outlines some of the broad ecological relationships between humans and the rest of the material world and summaries information on the health of the planet Biodiversity is beneficial to the local environment and can also be a natural form of crop protection In conventional agriculture biodiversity is often eliminated by planting large tracts of fields with a single crop and killing other species with herbicides insecticides pesticides and fungicides In the absence of biodiversity the arrival of a single species can significantly affect crop production and conventional farmers counter this with chemical killing agents that damage the environmental health of the area Conservation is the protection preservation management or restoration of wildlife and natural resources such as forests and water Through the conservation of biodiversity and the survival of many species and habitats which are threatened due to human activities can be ensured There is an urgent need not only to manage and conserve the biotic wealth but also restore the degraded ecosystems This book will definitely serve as an excellent reference material and practical guide for teachers research workers students and environmentalists

Cass R. Sunstein, 2020-04-14 An illuminating study that reveals the different ways social change occurs for readers of Freakonomics and Thinking Fast and Slow The New York Times How does social change happen When do social movements take off Sexual harassment was once something that women had to endure now a movement has risen up against it White nationalist sentiments on the other hand were largely kept out of mainstream discourse now there is no shortage of media outlets for them In this book with the help of behavioral economics psychology and other fields Cass Sunstein casts a bright new light on how change happens Sunstein focuses on the crucial role of social norms and on their frequent collapse When norms lead people to silence themselves even an unpopular status quo can persist Then one day someone challenges the norm a child who exclaims that the emperor has no clothes a woman who says me too Sometimes suppressed outrage is unleashed and long standing practices fall Sometimes change is more gradual as nudges help produce new and different decisions apps that count calories texted reminders of deadlines automatic enrollment in green energy or pension plans Sunstein explores what kinds of nudges are effective and shows why nudges sometimes give way to bans and mandates Finally he considers social divisions social cascades and partyism when identification with a political party creates a strong bias against all members of an opposing party which can both fuel and block social change **Ecology, Environment and Pollution**

Felix Sweeney & Riley Mitchell, 2019-01-01 Ecology is the scientific study of the distributions abundance and relations of organisms and their interactions with the environment Ecology includes the study of plant and animal populations plant and animal communities and ecosystems Ecosystems describe the web or network of relations among organisms at different scales of organization An ecosystem is a self contained dynamic system made of a population of species in its physical environment This concept is used to study the complex interactions between the organisms plants animals bacteria and fungi that make up the community There are many different ways in which the community of organisms interacts Environment means everything around to a living being Especially the circumstances of life of people or society in their life conditions It comprises the set of natural social and cultural values existing in a place and at a particular time that influence in the life of the human being and in the generations to come Pollution is anything that makes the earth dirty and unhealthy Land air and water are all affected by pollution Pollution takes up space on our land Many of the things people use every day come in packages like food games school supplies and electronics Environmental science is the systematic study of our environment and our proper place in it A relatively new field environmental science is highly interdisciplinary integrating natural sciences social sciences and humanities in a broad holistic study of the world around us The aim of the present book is to provide its readers an acquaintance with the recent research trends in the area of ecology environmental science and pollution **Intellectual Property and Traditional Knowledge in the Global Economy** Teshager W. Dagne, 2014-09-04

Arising from recent developments at the international level many developing countries indigenous peoples and local

communities are considering using geographical indications GIs to protect traditional knowledge and to promote trade and overall economic development Despite the considerable enthusiasm over GIs in diverse quarters there is an appreciable lack of research on how far and in what context GIs can be used as a protection model for traditional knowledge based resources This book critically examines the potential uses of geographical indications as models for protecting traditional knowledge based products and resources in national and international intellectual property legal frameworks By analysing the reception towards GIs from developing countries and advocates of development in the various legal and non legal regimes including the World Trade Organization World Intellectual Property Organization and the Convention on Biological Diversity and the Food and Agricultural Organization the book evaluates the development potential of GIs in relation to ensuing changes in international intellectual property law in accommodating traditional knowledge Teshager W Dagne argues for a degree of balance in the approach to the implementation of global intellectual property rights in a manner that gives developing countries an opportunity to protect traditional knowledge based products The book will be of great interest and use to scholars and students of intellectual property law public international law traditional knowledge and global governance

Aktive Mobilität im ländlichen und städtischen Raum Christina Bürkert, 2019-10-11 Christina Bürkert beschäftigt sich mit der Frage welche psychosozialen Faktoren und Umweltdeterminanten die Häufigkeit aktiver Mobilität beeinflussen Mittels einer quantitativen Studie mit Menschen der Babyboomer Generation identifiziert sie Unterschiede zwischen Stadt und ländlichem Raum Darüber hinaus untersucht die Autorin den Einfluss von Straßen auf die Erholung der menschlichen Aufmerksamkeitskapazität Sie greift hierfür auf ein computergeneriertes Modell zurück mit welchem die Probanden und Probandinnen virtuelle Spaziergänge durch eine ländliche Kleinstadt unternehmen Die Erholung der Aufmerksamkeit erfasst sie zum einen subjektiv über Fragebögen und zum anderen objektiv über psychophysiologische Stressparameter **Air**

Pollution Riley Mitchell & Felix Sweeney, 2018-11-11 Air pollution occurs in many forms but can generally be thought of as gaseous and particulate contaminants that are present in the earth's atmosphere Gaseous pollutants include sulfur dioxide SO₂ nitrogen oxides NO₂ ozone O₃ carbon monoxide CO volatile organic compounds VOC hydrogen sulfide H₂S hydrogen fluoride HF and various gaseous forms of metals These pollutants are emitted from large stationary sources such as fossil fuel fired power plants smelters industrial boilers petroleum refineries and manufacturing facilities as well as from area and mobile sources They are corrosive to various materials which causes damage to cultural resources can cause injury to ecosystems and organisms aggravate respiratory diseases and reduce visibility Air pollution injury to plants can be evident in several ways Injury to foliage may be visible in a short time and appear as necrotic lesions dead tissue or it can develop slowly as a yellowing or chlorosis of the leaf There may be a reduction in growth of various portions of a plant Plants may be killed outright but they usually do not succumb until they have suffered recurrent injury Today's marketplace is increasingly dependent on satisfying a myriad of local environmental requirements the demands of environmentally aware customers and

the global voluntary environmental initiatives Industry has made great progress in its efforts to protect the environment and has spent hundreds of billions of dollars to decrease the release of toxic substances into the environment while also developing technologies to reduce or eliminate hazardous waste generation Many industries taking initiatives coupled with advances in technology are changing the way of responding to their environmental obligations The book provided information on rational basis for air quality management and green belt development in urban areas *Environmental Studies, 2/e* Benny Joseph, 2008

Supertall: How the World's Tallest Buildings Are Reshaping Our Cities and Our Lives Stefan Al, 2022-04-12 A thoughtful inquiry into the new generations of skyscrapers There is a lot of rich history here well and concisely told Paul Goldberger New York Times Book Review The global boom in skyscrapers why it s happening now how they re made and what they do to cities and people We are living in a new urban age and its most tangible expression is the supertall megastructures that are dramatically bigger higher and more ambitious than any in history Cities around the world are racing to build the first mile high building stretching the limits of engineering and design as never before In this fascinating work of urban history and design TED resident Stefan Al himself an experienced architect explores the factors that have led to this worldwide boom He reveals the marvelous and underappreciated feats of engineering that make today s supertalls a reality from double decker elevators that silently move up to 50 miles per hour to the sophisticated blend of polymers and steel fibers that enables concrete to withstand 8 000 tons of pressure per square meter Taking readers behind the scenes of the building and design of remarkable megastructures both from the past the Empire State Building St Paul s Cathedral the Eiffel Tower and the present Dubai s Burj Khalifa London s Shard Shanghai Tower Al demonstrates the impact of these innovations Yet while the supertall is undoubtedly a testament to great technological victories it can come at an environmental and social cost Focusing on four global cities London New York Hong Kong and Singapore Al examines the risks of wealth inequality carbon emissions and contagion that stem from supertalls And he uncovers the latest innovations in sustainable building from skyscrapers made of wood to tree covered buildings that promise to yield a better urban future Featuring more than thirty architectural drawings Supertall is both a fascinating exploration of our greatest accomplishments and a powerful argument for a more equitable way forward

Cheaponomics Michael Carolan,2014-03-21 Do you really think you are getting a good deal when given that free mobile phone for switching service providers if a multinational retailer undercuts its competitors or by the fact that food is relatively cheaper today in many countries than ever before Think again As Michael Carolan clearly shows in this compelling book cheapness is an illusion The real cost of low prices is alarmingly high It is shown for example that citizens are frequently subsidising low prices through welfare support to poorly paid workers in their own country or relying on the exploitation of workers in poor countries for cheap goods Environmental pollution may not be costed into goods and services but is paid for indirectly by people living away from its source or by future generations Even with private cars when the total costs of this form of mobility are tallied it proves to be an astronomically expensive model of transportation All of these costs need to be accounted for The author captures these issues by the concept of cheaponomics The key point is that costs and risks are socialised we all pay for cheapness but not at the point of purchase Drawing on a wide range of examples and issues from over consumption and waste to over work unemployment inequality and the depersonalising of communities it is convincingly shown that cheapness can no longer be seen as such a bargain Instead we need to refocus for a better sense of well being social justice and a balanced approach to prosperity
