Grief and Loss Across the Lifespan Carolyn Ambler Walter, Judith L. M. McCoyd, 2009-03-23

Grief and Loss Across the Lifespan represents a significant advance because it looks at the issues from a bio psychosocial perspective. To a social worker who has worked mainly in a medical and nursing environment, this is a great step forward. Bereavement Care Offers valued sensitivities, knowledge, and insights, and most importantly, age appropriate interventions for a range of significant losses. Counselors will want to keep this indispensable work close at hand.

Kenneth J. Doka, PhD, Author, Counseling Individuals With Life Threatening Illness

By taking a lifespan view, this book fills a gap in the literature on loss and grief and takes theory and practice in new and invigorating directions. It will be welcomed by those professionals of all disciplines who daily listen to and help re-write narratives of loss.

Jeffrey S. Applegate, PhD, Professor Emeritus, Graduate School of Social Work, Social Research, Bryn Mawr College

A thorough, thoughtful, sensitive, and up-to-date contribution that may be the best book available today for teaching bereavement, grief, and mourning.

Highly recommended for experienced grief professionals as well as for students.

Jeffrey Kauffman, MA, MS, LCSW, BD, CT, CAS, BCETS, Psychotherapist in private practice, Philadelphia, PA

Walter and McCoyd have written a well-organized and comprehensive examination of grief and bereavement that will be useful to the seasoned professional as well as the student new to grief and loss.

The historical analysis of grief theory from classic to postmodern is interesting reading and essential for a full understanding of grief and loss in modern society.

Paige E. Payne, MS, MSW, LSW, Support Services Manager, PinnacleHealth Home Care and Hospice, Harrisburg, PA

Grief and Loss Across the Lifespan is unique in its treatment of grieving patterns and intervention strategies for different age groups. With this book, students and practitioners will learn how grief is influenced by biological responses to stress, psychological responses to loss, as well as social norms and support networks.

The authors utilize a developmental framework as each level of development from infancy through old age is addressed in four ways:

- Reviews normal developmental issues, abilities, and challenges for the age in question.
- Analyzes how individuals of each age cope with serious loss of a significant other and how they may experience life-threatening illness themselves.
- Examines how significant others react to and mourn the death of someone in that age range.
- Identifies the normative losses a person is likely to experience and addresses protective and risky ways of coping with those losses.

The authors review important grief theories such as postmodern and Dual Process Theory and discuss current topics in grief including continuing bonds, meaning making, ambiguous loss, and disenfranchised loss.

With the help of this book, practitioners and students of grief counseling can learn to help patients of all ages understand that loss is at the heart of life.

and growth      *The Oxford Handbook of Stress, Health, and Coping* Susan Folkman, 2011 Few publications have changed the landscape of contemporary psychology more than Richard Lazarus and Susan Folkman's landmark work *Stress Appraisal and Coping*. Its publication in 1984 set the course for years of research on the dynamic processes of psychological stress and coping in human beings. Now more than a quarter century later *The Oxford Handbook of Stress, Health, and Coping* pushes the field even further with a comprehensive overview of the newest and best work in this dynamic subject. Edited by Susan Folkman and comprising chapters by the field's leading scientists, this new volume details the expanded knowledge base that has emerged from extensive research on stress and coping processes over the last several decades. Featuring 22 topic-based chapters, including two by Folkman, this volume offers unprecedented coverage of the two primary research topics related to stress and coping: mitigating stress-related harms and sustaining well-being in the face of stress. Both topics are addressed within their relevant contexts, including chronic illness, calamity, bereavement, and social hardship. *The Oxford Handbook of Stress, Health, and Coping* is an essential reference work for students, practitioners, and researchers across the fields of health psychology, medicine, and palliative care.

**The Oxford Handbook of Human Development and Culture** Lene Arnett Jensen, 2015 *The Oxford Handbook of Human Development and Culture* provides a comprehensive synopsis of theory and research on human development, with every chapter drawing together findings from cultures around the world. This includes a focus on cultural diversity within nations, cultural change, and globalization. Expertly edited by Lene Arnett Jensen, the Handbook covers the entire lifespan from the prenatal period to old age. It delves deeply into topics such as the development of emotion, language, cognition, morality, creativity, and religion, as well as developmental contexts such as family, friends, civic institutions, school, media, and work. Written by an international group of eminent and cutting-edge experts, the chapters showcase the burgeoning interdisciplinary approach to scholarship that bridges universal and cultural perspectives on human development. This cultural-developmental approach is a multifaceted, flexible, and dynamic way to conceptualize theory and research that is in step with the cultural and global realities of human development in the 21st century.

Techniques of Grief Therapy Robert A. Neimeyer, 2015-09-25 *Techniques of Grief Therapy: Assessment and Intervention* continues where the acclaimed *Techniques of Grief Therapy: Creative Practices for Counseling the Bereaved* left off, offering a whole new set of innovative approaches to grief therapy to address the needs of the bereaved. This new volume includes a variety of specific and practical therapeutic techniques, each conveyed in concrete detail and anchored in an illustrative case study. *Techniques of Grief Therapy: Assessment and Intervention* also features an entire new section on assessment of various challenges in coping with loss, with inclusion of the actual scales and scoring keys to facilitate their use by practitioners and researchers. Providing both an orientation to bereavement work and an indispensable toolkit for counseling survivors of losses of many kinds, this book belongs on the shelf of both experienced clinicians and those just beginning to delve into the field of grief therapy.

**Stress Processes across the Life Course** Heather A. Turner, Scott Schieman, 2008-07-22 Stress researchers

have become increasingly aware of the ways in which structural and psychosocial variations in the life course shape exposure and vulnerability to social stress. This volume of *Advances in Life Course Research* explores theoretically and empirically stress processes both within and across specific life stages. Chapters within this volume incorporate several areas of research including: How physical and mental health trajectories are shaped by life course variations in stressors and resources; Stress associated with social role transitions and the significance of different role trajectories for stress exposure and outcomes; Life course variations in the quality and content of institutional contexts such as school work and family and their significance for stress processes; Differences in types, levels, and effects of different stress moderating resources within and across life course stages; Ways in which race, gender, and social class influence or condition stress processes over the life course; The relevance of linked lives within families and across generations for stress exposure and vulnerability; Historical variations in stress-related conditions and cohort differences in stress experiences; Methodological and theoretical advances in studying stress processes across the life course.

**Key Concepts in Social Gerontology** Judith E. Phillips, Kristine J. Ajrouch, Sarah Hillcoat-Nallemann, 2010-03-31. Social gerontology is a new and dynamic field reflecting the increasing interest in aging across the world. This book provides a readily accessible guide to well-established and contested issues as well as new concepts emerging through cutting edge research in the discipline. The entries give concise, lucid knowledge on what constitutes the building blocks of social gerontology and sets out a clear review of the core concepts both classic and emerging in this subject area. Each concept is explored in terms of its history, application, usefulness to theory and research, and significance in practice.

**Handbook of the Psychology of Aging**, 2015-08-19. *Handbook of the Psychology of Aging*, Eighth Edition, tackles the biological and environmental influences on behavior as well as the reciprocal interface between changes in the brain and behavior during the course of the adult life span. The psychology of aging is important to many features of daily life, from workplace and the family to public policy matters. It is complex and new questions are continually raised about how behavior changes with age. Providing perspectives on the behavioral science of aging for diverse disciplines, the handbook explains how the role of behavior is organized and how it changes over time. Along with parallel advances in research methodology, it explicates in great detail patterns and sub patterns of behavior over the lifespan and how they are affected by biological health and social interactions. New topics to the eighth edition include: preclinical neuropathology, audition and language comprehension in adult aging, cognitive interventions and neural processes, social interrelations, age differences in the connection of mood and cognition, cross cultural issues, financial decision making and capacity, technology, gaming, social networking, and more. Tackles the biological and environmental influences on behavior as well as the reciprocal interface between changes in the brain and behavior during the course of the adult life span. Covers the key areas in psychological gerontology research in one volume. Explains how the role of behavior is organized and how it changes over time. Completely revised from the previous edition. New chapter on gender and aging process.
