, 1986 *Before the Big Bang* Brian Clegg, 2009-08-04 A fascinating read that explores theories for the origin of the universe from throughout history New Scientist Los Angeles Times Summer Reading Pick Clegg follows the footsteps of Carl Sagan's Cosmos Steven Hawking's A Brief History of Time and Timothy Ferris's Coming of Age in the Milky Way He shares his predecessors enthusiasm eloquence and ability to explain complex ideas but provides a bonus by covering startling developments of the past decade Anyone looking for an introduction to or a refresher course in cosmology need look no further Kirkus Reviews starred review Since astrophysicist Fred Hoyle coined Big Bang as a term of abuse for a theory that he despised it has become everyday usage Although few of us really understand what the Big Bang was and it's certainly a misnomer for an event that was both extremely small and wasn't an explosion it is now accepted wisdom that this was how the universe began But the idea of Big Bang doesn't so much answer questions as raise new ones If the universe as we know it originated in the Big Bang what came before it At one time a taboo subject science is now prepared to look back past the beginning to answer the ultimate question of life the universe and everything with something more satisfying than Douglas

Adams's cryptic forty-two It's an incredible journey through mind bending theories into the deepest past Clegg's relatively jargon free style makes for a good introduction for general readers Publishers Weekly **Big Bang Pb Poster** Singh Simon Staff,2005-07-01 It Started with a Big Bang Floor Bal,2019-10-01 An accessible and engaging primer on the history of the universe and life on Earth In this delightful book kids can follow the fascinating story of how we got from the beginning of the universe to life today on the bright blue ball floating in space called Earth They'll learn about the big bang theory how our solar system and planet were formed how life on Earth began in the oceans and moved to land what happened to the dinosaurs and how humans evolved from apes to build communities all over the planet and even travel to space Kids will be enthralled by this out of this world look at how the universe began **The Big Bang** Joseph Silk,1989 Describes the Big Bang scientific theory of creation of the universe Big Bang.
