

# SPINOSAUR

SPECIES: *Spinosaurus Pauciserratus*  
 TIME: Cretaceous  
 DIRT: Common  
 Temperament: Territorial

Also  
 Among the few  
 creatures on the  
 island that can match  
 T-Rex in size,  
 Spinosaurus Pauciserratus  
 has not quite won  
 its territory.

Spinosaurus' first loss  
 has made him more  
 wary than he was,  
 but nothing else is  
 true.

The sad, comforting fact about Spinosaurus is that it seems  
 more at home when water than away from it. While the  
 creature is certainly more at home, it tends to believe  
 more so as it gets farther from it. On one occasion, I  
 may escape a Spinosaurus by getting far enough from its  
 land home to make it simply not interested.

Spinosaurus is an extremely  
 well-matched apex predator.  
 Farther than a T-Rex in size,  
 and to make an even  
 more a T-Rex, but closer  
 than a Carnotaurus, its all-  
 new structure and its  
 feet structure and the  
 well-matched mouth, Spinosaurus  
 may be the most ideal one  
 they can become and.

**Science and Earth History** Arthur Newell Strahler, 1999 In this comprehensive treatment of the ongoing conflict between creationists and evolutionary scientists well known geomorphologist Arthur Strahler carefully examines creationists' claims of scientific evidence for the six day divine creation of the universe followed by the catastrophic flood of Noah as claimed in Genesis The creationists' arguments are examined and evaluated against the findings of mainstream science in the fields of cosmology astronomy geophysics geology paleontology and evolutionary biology Updated with a new preface and responses to recent attacks on evolutionary theory Science and Earth History can serve as both a popular overview of earth history and as a scholarly anecdote to the fictions of creationism once again finding their way into classrooms and universities Strahler illuminates the controversy by reviewing the philosophy methodology and sociology of empirical science as contrasted with the belief systems of religion and pseudoscience The author also includes lucid criteria for distinguishing science from pseudoscience and reviews the great discoveries and developments in science that point to the evolution of life over the earth's three billion year history

**The Scientific Case Against Scientific Creationism** Jon P. Alston, 2003-09 Sociologist Jon P. Alston offers a unique and clear analysis of the weaknesses of scientific creationism and intelligent design by identifying what creationists say when they reject evidence for evolution He demonstrates how scientific creationists accept non scientific statements that contradict established scientific knowledge Acceptance of anti evolutionary knowledge also demands acceptance of a literal six day creation and other statements contradicting scientific findings Few persons have read so closely the writings of scientific creationists to illustrate how anti scientific anti evolutionists become when they criticize the fact of evolution Creationists are forced to develop just so stories to defend their literal interpretations of Biblical scripture Alston finds creationists cannot defend their religious beliefs using established scientific methodologies and principles
