First Edition Amir Khorram-Manesh,2017-10-10 We propose here a comprehensive educational program based on the best available evidence to date drawn from recent publications intended to impart the knowledge skills and abilities necessary for the role of crisis manager We expect this program to enhance the intercultural

and interagency performance across the Disaster Management DM cycle Here Intercultural does not refer to different nations and cultural backgrounds but rather to working cultures within diverse agencies Since communication and information shortcomings are the most common reason for failed DM this educational program focuses heavily on collaboration and interoperability between trained professionals involved in disaster response to ensure that they understand the need for collaboration and are aware of each other's limitations and possibilities The aim of programs such as this is not to re educate people in respect to their profession area of expertise but rather to train them in elements specific to DM and ways in which they can apply their existing knowledge and professional expertise in the disaster context Such multidisciplinary programs cover all disaster phases accommodate the needs of each organization and offer a safe environment where participants are able to learn by doing in an interactive environment vertically within their own organization and horizontally together with other organizations by focusing on shared training cooperation and intercultural understanding Such programs bring some degree of standardization and offer a thorough evaluation of participants and the program by using evidence based scientific methods One important part of the program is to offer a standardized handbook in which all necessary information is gathered This is not intended as a substitute for reference books but it is intended to make the information accessible and easy to learn so that the information can be combined with the practical parts of the education

Risk Management at Board Level Vinay Kalia,Roland Müller,2019-01-14 Risk Management today has moved from being the topic of top level conferences and media discussions to being a permanent issue in the board and top management agenda Several new directives and regulations in Switzerland Germany and EU make it obligatory for the firms to have a risk management strategy and transparently disclose the risk management process to their stakeholders Shareholders insurance providers banks media analysts employees suppliers and other stakeholders expect the board members to be pro active in knowing the critical risks facing their organization and provide them with a reasonable assurance vis vis the management of those risks In this environment however the lack of standards and training opportunities makes this task difficult for board members This book with the help of real life examples analysis of drivers interpretation of the Swiss legal requirements and information based on international benchmarks tries to reach out to the forward looking leaders of today s businesses The authors have collectively brought their years of scientific and practical experience in risk management Swiss law and board memberships together to provide the board members practical solutions in risk management The desire is that this book will clear the fear regarding risk management from the minds of the company leadership and help them in making risk savvy decisions in quest to achieve their strategic objectives

Social Vulnerability to Disasters, Second Edition Deborah S.K. Thomas,Brenda D. Phillips,William E. Lovekamp,Alice Fothergill,2013-05-09 The 2010 Haiti and Chili earthquakes the 2010 BP oil spill in the Gulf of Mexico and the 2011 Fukushima earthquake and tsunami in Japan are but a few examples of recent catastrophic events that continue to reveal how social structure and roles produce extensive human suffering and differential impacts on individuals and communities These events bring social vulnerability to the forefront in considering how disasters unfold clearly revealing that disasters are not created from the physical event alone Equally important people even those considered vulnerable respond in innovative and resilient ways that unveil the strength of human ingenuity and spirit It is not a foregone conclusion that a hazard event even a large one will result in catastrophic loss This updated second edition of Social Vulnerability to Disasters focuses on the social construction of disasters demonstrating how the characteristics of an event are not the only reason that tragedies unfurl By carefully examining and documenting social vulnerabilities throughout the disaster management cycle the book remains essential to emergency management professionals the independent volunteer sector homeland security and related social science fields including public policy sociology geography political science urban and regional planning and

public health The new edition is fully updated more international in scope and incorporates significant recent disaster events It also includes new case studies to illustrate important concepts By understanding the nuances of social vulnerability and how these vulnerabilities compound one another we can take steps to reduce the danger to at risk populations and strengthen community resilience overall Features and Highlights from the Second Edition Contains contributions from leading scholars professionals and academics who draw on their areas of expertise to examine vulnerable populations Incorporates disaster case studies to illustrate concepts relevant and seminal literature and the most recent data available In addition to highlighting the U S context integrates a global approach and includes numerous international case studies Highlights recent policy changes and current disaster management approaches Infuses the concept of community resilience and building capacity throughout the text Includes new chapters that incorporate additional perspectives on social vulnerability Instructor s guide PowerPoint slides and test bank available with qualifying course adoption
