moderne Design in den Blick zu nehmen Zwischen Alltagskultur und Design Avantgarden bewegen sich vielfältige interdisziplinäre Strömungen deren theoretische Modelle in Kontextualisierungen und Analysen der Designwissenschaft zusammenlaufen Hier zeigt sich bereits eine geisteswissenschaftliche Durchdringung und Akzeptanz des Designs als epidemisches Gegenstück zur freien Kunst wobei diese Meta-Perspektive letztlich eine Forschung über Design darstellt Design als konkrete Praxis begriffen artikuliert sich jedoch als Relation von Problem Entwurf und Prototyp so dass ein handlungstheoretisches Modell einer Forschung durch Design angesetzt werden kann Designforschung steht damit im Kontrast zur Designwissenschaft denn sie agiert dynamisch empirisch und operativ und bindet zwar Theoriemodelle und konkrete Werkzeuge lässt diese aber innerhalb konkreter Gestaltungsweisen zu pragmatischen Erkenntnissen werden Der Band adressiert konkrete Designfelder arbeitet Aspekte der konkreten und empirischen Designforschung heraus und nimmt gleichzeitig eine Verortung innerhalb der medientheoretischen Bezugsfelder vor Denn Forschung durch Design geschieht immer durch Medien Werke Instrumente und ästhetische Zeichen und Zustände hindurch

Making Design Theory Johan Redstrom, 2017-09-01 A new approach to theory development for practice driven research proposing that theory is something made in and through design Tendencies toward academization of traditionally practice based fields have forced design to articulate itself as an academic discipline in theoretical terms In this book Johan Redstrom offers a new approach to theory development in design research one that is driven by practice experimentation and making Redstrom does not theorize from the outside but explores the idea that just as design research engages in the making of many different kinds of things theory might well be one of those things it is making Redstrom proposes that we consider theory not as stable and constant but as something unfolding something acted as much as articulated inherently fluid and transitional Redstrom describes three ways in which theory in particular formulating basic definitions is made through design the use of combinations of fluid terms to articulate issues the definition of more complex concepts through practice and combining sets of definitions made through design into programs These are the building blocks for creating conceptual structures to support design Design seems to thrive on the complexities arising from dichotomies form and function freedom and method art and science With his idea of transitional theory Redstrom departs from the traditional academic imperative to pick a side theory or practice art or science Doing so he opens up something like a design space for theory development within design research

driven design and the Internet of Things our interactions and interfaces with technology are about to change dramatically incorporating such emerging technologies as shape changing interfaces wearables and movement tracking apps A successful interactive tool will allow the user to engage in a smooth embodied interaction creating an intimate correspondence between users actions and system response And yet as Kristina H k points out current design methods emphasize symbolic language oriented and predominantly visual interactions In *Designing with the Body* H k proposes a qualitative shift in interaction design to an experiential felt aesthetic stance that encompasses the entire design and use cycle H k calls this new approach soma design it is a process that reincorporates body and movement into a design regime that has long privileged language and logic Soma design offers an alternative to the aggressive rapid design processes that dominate commercial interaction design it allows and requires a slow thoughtful process that takes into account fundamental human values She argues that this new approach will yield better products and create healthier more sustainable companies H k outlines the theory underlying soma design and describes motivations methods and tools She offers examples of soma design encounters and an account of her own design process She concludes with A Soma Design Manifesto which challenges interaction designers to restart their field to focus on bodies and perception rather than reasoning and intellect
