Textiles, Identity and Innovation: Design the Future Gianni Montagna, Cristina Carvalho, 2018-10-03 *D_TEX* presents itself as a starting point at a crossroads of ideas and debates around the complex universe of Textile Design in all its forms manifestations and dimensions The textile universe allied to mankind since its beginnings is increasingly far from being an area of exhausted possibilities each moment proposing important innovations that need a presentation discussion and maturation space that is comprehensive and above all inter and transdisciplinary

Presently the disciplinary areas where the textile area is present are increasing and important such as fashion home textiles technical clothing and accessories but also construction and health among others and can provide new possibilities and different disciplinary areas and allowing the production of new knowledge D_TEX proposes to join the thinking of design with technologies tradition techniques and related areas in a single space where ideas are combined with the technique and with the projectual and research capacity thus providing for the creation of concepts opinions associations of ideas links and connections that allow the conception of ideas products and services The interdisciplinary nature of design is a reality that fully reaches the textile material in its essence and its practical application through the synergy and contamination by the different interventions that make up the multidisciplinary teams of research The generic theme of D_TEX Textile Design Conference 2017 held at Lisbon School of Architecture of the University of Lisbon Portugal on November 2 4 2017 is Design the Future starting from the crossroads of ideas and debates a new starting point for the exploration of textile materials their identities and innovations in all their dimensions The Design Experience Mike Press, Rachel Cooper, 2017-03-02 How are we to understand the changing role of design and designers in the new age of consumer experience Drawing on perspectives from cultural studies design management marketing new product development and communications theory The Design Experience explores the contexts practices and roles of designers in today's world providing an accessible introduction to the key issues reshaping design The book begins by analysing how consumers acquire meaning and identity from product and other experiences made possible by design It then explores issues of competitiveness innovation and management in the context of industry and commerce If designers are creators of human experiences what does this mean for their future role in culture and commerce Subsequent chapters look at new ways in which designers conduct user research and how designers should communicate about design and decision making with key stakeholders The authors conclude with a discussion of the design profession will that label be a help or hindrance for tomorrow's designer Written for students of design design management cultural and business studies The Design Experience is also of interest to practitioners of design marketing and management Illustrated case study material is integrated into the text and the book also includes a glossary and extensive references Textiles, Identity and Innovation: In Touch Gianni Montagna, Manuela Cristina Paulo Carvalho Figueiredo, 2020-05-19 D_Tex is proposed as a hub around which it is possible to look at textiles in their different forms in order to better understand study adapt and project them for the future It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and concepts and work them in their own way adapting them to their objectives and research D_Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations Present in all areas of knowledge the textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge D_Tex proposes to promote discussion and knowledge in the

different areas where textiles with all their characteristics can ensure an important contribution combining material and immaterial knowledge innovative and traditional techniques technological and innovative materials and methods but also new organization and service models different concepts and views on teaching With the renewed idea of the intrinsic interdisciplinarity of design and sharing with different areas that support each other the research and practice of textiles was proposed by the D_TEX Textile Design Conference 2019 held June 19 21 2019 at the Lisbon School of Architecture of the University of Lisbon Portugal under the theme In Touch where as broadly understood as possible different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and consumers

Nature: New Sustainable Design Scenarios Claudio Gambardella, 2024-05-03 This volume contributes to the construction of a multi-voice mosaic on the theme of Nature and the relationship between Man understood as designer and Nature by emphasizing the innovative and sustainable proposals coming from the discipline of design in its many facets and interdisciplinary contributions. Since it isn't discussed, the creative and economic effort that designers, institutions and companies have been leading for years to improve human living conditions, preference will be given to scientific contributions, unpublished or not yet fully known case studies, projects of strategies, products, systems and services, theoretical contributions, communication that are an expression of a new approach to Nature seen as our ally and object of an ethics of care. The focus is the design both in its role as innovation driver and interpreter of social evolution that must be considered within the human-nature relationship. The topics identify some of the most relevant fields of development in which Design-Driven Innovation can be developed in the respect of perspective of a new relationship with nature. **Teaching Design and Technology in Secondary Schools** Gwyneth Owen-Jackson, 2013-09-13 *Teaching Design and Technology in Secondary Schools* begins by providing information on the nature, purpose and development of design and technology in schools.
