The kit will include 6 months of free cellular data service, pre-activated and ready to go right out of the box, allowing developers to immediately focus on their primary goal: developing great products without the hassle of setting up data plan, ordering and provisioning a SIM from the carrier.

This kit is designed for anyone interested in getting started in the world of embedded cellular. Hardware and software engineers, corporate technologists, or educators and students can quickly learn more about cellular integration using the hands-on examples included in the kit.

With the full suite of standard XBee API frames and AT commands, existing XBee customers can seamlessly transition to this new embedded modem with only minor software
