Co-Creating Future Social Services Andrzej Klimczuk,Hilla Dolev,Robin Miller,Carola Orrego,2025-06-19 The European Social Services

Conference ESSC <https://essc.eu.org> is the annual flagship event of the European Social Network ESN <https://www.esn.eu.org> the leading network for public social services in Europe The ESSC is Europe s largest public social welfare policy and practice forum The previous edition was attended by almost 700 delegates in Malm Sweden in 2023 At the 32nd European Social Services Conference Antwerp Belgium 26-28 June 2024 we will discuss how we can co create community based social services with a specific focus on three thematic strands 1 Co creating Cities Social Inclusion 2 Co creating Responses to Manage the Future Workforce and 3 Co creating Digital Solutions for Social Inclusion This Research Topic welcomes papers

that will provide both theoretical insights and explorations as well as empirical evidence. Alongside learning from practice and responding to research findings we also want to understand challenge and refine the theoretical lenses which underpin our assumptions about social inclusion and diversity in relation to social policy and social services. Potential issues include three thematic strands but are not limited to: 1. Co-creating Cities: Social Inclusion, community care models in cities, fighting residential exclusion, neighborhood approaches, managing childhood and youth transitions in areas such as early childcare or child protection, support planning for people with disabilities in aspects related to work and social participation, support programs for ageing populations in fighting loneliness, promoting community support, managing diversity in the community co-production in local social services, planning delivery and evaluation, theories of community development and how these relate to different forms of social capital, recent theories and concepts in urban sociology, sociological practice, social policy and social work, theoretical approaches to social problems, issues and challenges including those underlined by the United Nations Sustainable Development Goals. 2. Co-creating Responses to Manage the Future Workforce: workforce planning and management strategies, training for co-production with people using services and their families, registration and accreditation programs, programs to break down gender stereotypes, innovation and digital programs supporting social care and support such as digital tools or forecasting scenarios, theories of professional motivations and how these can incentivize or deter person-centered and community care. 3. Co-creating Digital Solutions for Social Inclusion: prioritization of person-centered care and relationship-based practice, improvement of services, interaction, addressing digital readiness for practice, enhancing people's autonomy, increasing the data security, addressing ethical concerns and data protection needs, theoretical approaches to the digital divide and social inclusion, theories of leadership and how these translate to virtual contexts. We are looking forward to selecting manuscripts demonstrating a wide range of approaches and forward thinking ideas to enhance personalization in social services. We want to provide an opportunity for presenters involved in the ESSC 2024 program covering both scholars and practitioners from various sectors to publish their papers. We also look forward to including articles from scholars and practitioners who did not present their work during our event. This Research Topic is fully open to practical and theoretical submissions that have not been included for presentation during the ESSC 2024. This Research Topic welcomes submissions of the following article types: Brief Research Report, Community Case Study, Conceptual Analysis, General Commentary, Hypothesis, Theory, Methods, Mini Review, Opinion, Original Research, Perspective, Policy and Practice Reviews, Review, and Study Protocol.

*Security Opportunities in Nano Devices and Emerging Technologies* Mark Tehranipoor, Domenic Forte, Garrett S. Rose, Swarup Bhunia, 2017-11-22. The research community lacks both the capability to explain the effectiveness of existing techniques and the metrics to predict the security properties and vulnerabilities of the next generation of nano devices and systems. This book provides in-depth viewpoints on security issues and explains how nano devices and their unique properties can address the opportunities and challenges of the security community.

manufacturers system integrators and end users This book elevates security as a fundamental design parameter transforming the way new nano devices are developed Part 1 focuses on nano devices and building security primitives Part 2 focuses on emerging technologies and integrations *Product Design and the Role of Representation* Eujin Pei,James Andrew Self,2022-03-16 This book responds to the expression all you always wanted to know about design representation but didn't know where to ask Indeed the book is a thematic guide to design representation and the amount of information about design representations it holds is phenomenal Professor Gabriela Goldschmidt Technion Israel Institute of Technology This book extends understanding of the design process by exploring design representation types and examining them as theoretical constructs It shows how fidelity and ambiguity inform the creative act of design and considers design thinking through the lens of design representation Design thinking is a method that has the potential to stimulate and enhance creativity This book enhances understanding of what constitutes design thinking why it is used and how it can be applied in practice to explore and develop ideas The book positions a particular type of thinking through design representations exploring this from its roots in design history to the types of thinking in action associated with contemporary design practice A taxonomy of design representations as a scaffold to express design intent is applied to real world case studies *Product Design and the Role of Representation* will be of interest to those working in or studying product development engineering design and additive manufacturing
