baik "ECEG2016-Proceedings of 16th European Conference on e-Government ECEG 2016 " Mitja De Man,Tina Juki,2016-06-02 **Fuzzy Logic-Based Modeling in Collaborative and Blended Learning** Hadjileontiadou, Sofia J.,Dias, Sofia B.,Diniz, José A.,Hadjileontiadis, Leontios J.,2015-07-31 Technology has dramatically changed the way in which knowledge is shared within and outside of traditional classroom settings The application of fuzzy logic to new forms of technology centered education has presented new opportunities for analyzing and modeling learner behavior Fuzzy Logic Based Modeling in Collaborative and Blended Learning explores the application of the fuzzy set theory to educational settings in order to analyze the learning process gauge student feedback and enable quality learning outcomes Focusing on educational data analysis and modeling in collaborative and blended learning environments this publication is an essential reference source for educators researchers educational administrators and designers and IT specialists This premier reference monograph presents key research on educational data analysis and modeling through the integration of research on advanced modeling techniques educational technologies fuzzy concept maps hybrid modeling neuro fuzzy learning management systems and quality of interaction Data Mining for the Social Sciences Paul Attewell,David Monaghan,2015-05 The amount of information collected on human behavior every day is staggering and exponentially greater than at any time in the past At the same time we are inundated by stories of powerful algorithms capable of churning through this sea of data and uncovering patterns These techniques go by many names data mining predictive analytics machine learning and they are being used by governments as they spy on citizens and by huge corporations are they fine tune their advertising strategies And yet social scientists continue mainly to employ a set of analytical tools developed in an earlier era when data was sparse and difficult to come by In this timely book Paul Attewell and David Monaghan provide a simple and accessible introduction to Data Mining geared towards social scientists They discuss how the data mining approach differs substantially and in some ways radically from that of conventional statistical modeling familiar to most social scientists They demystify data mining describing the diverse set of techniques that the term covers and discussing the strengths and weaknesses of the various approaches Finally they give practical demonstrations of how to carry out analyses using data mining tools in a number of statistical software packages It is the hope of the authors that this book will empower social scientists to consider incorporating data mining methodologies in their analytical toolkits Provided by publisher

Cause and Effect Business Analytics and Data Science Dominique Haughton,Jonathan Haughton,Victor S. Y. Lo,2025-07-15 Among the most important questions that businesses ask are some very simple ones If I decide to do something will it work And if so how large are the effects To answer these predictive questions and later base decisions on them we need to establish causal relationships Establishing and measuring causality can be difficult This book explains the most useful techniques for discerning causality and illustrates the principles with numerous examples from business It discusses randomized experiments aka A B testing and techniques such as propensity score matching synthetic controls

double differences and instrumental variables There is a chapter on the powerful AI approach of Directed Acyclic Graphs aka Bayesian Networks another on structural equation models and one on time series techniques including Granger causality At the heart of the book are four chapters on uplift modeling where the goal is to help firms determine how best to deploy their resources for marketing or other interventions We start by modeling uplift discuss the test and learn process and provide an overview of the prescriptive analytics of uplift The book is written in an accessible style and will be of interest to data analysts and strategists in business to students and instructors of business and analytics who have a solid foundation in statistics and to data scientists who recognize the need to take seriously the need for causality as an essential input into effective decision making   **Data Mining and Exploration** Chong Ho Alex Yu,2022-10-27 This book introduces both conceptual and procedural aspects of cutting edge data science methods such as dynamic data visualization artificial neural networks ensemble methods and text mining There are at least two unique elements that can set the book apart from its rivals First most students in social sciences engineering and business took at least one class in introductory statistics before learning data science However usually these courses do not discuss the similarities and differences between traditional statistics and modern data science as a result learners are disoriented by this seemingly drastic paradigm shift In reaction some traditionalists reject data science altogether while some beginning data analysts employ data mining tools as a black box without a comprehensive view of the foundational differences between traditional and modern methods e g dichotomous thinking vs pattern recognition confirmation vs exploration single method vs triangulation single sample vs cross validation etc This book delineates the transition between classical methods and data science e g from p value to Log Worth from resampling to ensemble methods from content analysis to text mining etc Second this book aims to widen the learner s horizon by covering a plethora of software tools When a technician has a hammer every problem seems to be a nail By the same token many textbooks focus on a single software package only and consequently the learner tends to fit the problem with the tool but not the other way around To rectify the situation a competent analyst should be equipped with a tool set rather than a single tool For example when the analyst works with crucial data in a highly regulated industry such as pharmaceutical and banking commercial software modules e g SAS are indispensable For a mid size and small company open source packages such as Python would come in handy If the research goal is to create an executive summary quickly the logical choice is rapid model comparison If the analyst would like to explore the data by asking what if questions then dynamic graphing in JMP Pro is a better option This book uses concrete examples to explain the pros and cons of various software applications   *Ethical Data Mining Applications for Socio-Economic Development* Rahman, Hakikur,Ramos, Isabel,2013-05-31 This book provides an overview of data mining techniques under an ethical lens investigating developments in research best practices and examining experimental cases to identify potential ethical dilemmas in the information and communications technology sector Provided by publisher   *Big Data Management, Technologies, and*

Applications Hu, Wen-Chen,Kaabouch, Naima,2013-10-31 This book discusses the exponential growth of information size and the innovative methods for data capture storage sharing and analysis for big data Provided by publisher *Private International Law and the Internet* Dan Jerker B. Svantesson,2021-08-05 In this the fourth edition of Private International Law and the Internet Professor Dan Svantesson provides a detailed and insightful account of what has emerged as the most crucial current issue in private international law that is how the Internet affects and is affected by the five fundamental questions When should a lawsuit be entertained by the courts Which state s law should be applied When should a court that can entertain a lawsuit decline to do so How wide scope of jurisdiction should be afforded to a court with jurisdiction over a dispute And will a judgment rendered in one country be recognized and enforced in another Professor Svantesson identifies and investigates twelve characteristics of Internet communication that are relevant to these questions and then proceeds with a detailed discussion of what is required of modern private international law rules Focus is placed on several issues that have far reaching practical consequences in the Internet context including the following cross border defamation cross border business contracts cross border consumer contracts and cross border intellectual property issues A wide survey of private international law solutions encompasses insightful and timely analyses of relevant laws adopted in a variety of jurisdictions including Australia England Hong Kong SAR the United States Germany Sweden and China as well as in a range of international instruments There is also a chapter on advances in geo identification technologies and their special value for legal practice The book concludes with two model international conventions one on cross border defamation and one on cross border contracts as well as a set of practical checklists to guide legal practitioners faced with cross border matters within the discussed fields Professor Svantesson s book brings together a wealth of research findings in the overlapping disciplines of law and technology that will be of particular utility to practitioners and academics working in this complex and rapidly changing field His thoughtful analysis of the interplay of the developing Internet and private international law will also be of great value as will the tools he offers with which to anticipate the future Private International Law and the Internet provides a remarkable stimulus to continue working towards globally acceptable private international law rules for communication via the Internet **eHealth** Thomas F. Heston,2018-08-01 eHealth has revolutionized health care and the practice of medicine Internet technologies have given the most rural communities access to healthcare services and automated computer algorithms are improving medical diagnoses and speeding up the delivery of care Handheld apps wearable devices and artificial intelligence lead the way creating a global healthcare solution that is smarter and more accessible Read what leaders in the field are doing to advance the use of electronic technology to improve global health **Cyber Security and Threats: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2018-05-04 Cyber security has become a topic of concern over the past decade as private industry public administration commerce and communication have gained a greater online presence As many individual and organizational

activities continue to evolve in the digital sphere new vulnerabilities arise Cyber Security and Threats Concepts Methodologies Tools and Applications contains a compendium of the latest academic material on new methodologies and applications in the areas of digital security and threats Including innovative studies on cloud security online threat protection and cryptography this multi volume book is an ideal source for IT specialists administrators researchers and students interested in uncovering new ways to thwart cyber breaches and protect sensitive digital information *Recognised and Harmed* Georgios Bouchagiar,2023-11-25 Private face recognition technologies are increasingly entering the private and public sphere with no adequate checks and balances This comprehensive and important new reference work explores crucial regulatory challenges stemming from the use of private face recognition technologies in Europe After detecting technological neutrality in law legal uncertainty in case law and the risk of over surveillance it recommends an ex ante and targeted classification approach with a view to minimising privacy harms Under the proposed scheme an expert agency can scrutinise a given technology balance conflicting stakes classify that technological use and finally give a go no go or go in condition decision before its actual implementation in the real world Recommended for legal and technology researchers and scholars focusing on surveillance and privacy as well as government regulatory and civil rights agencies **Discovering Statistics / Tables and Formula Card** Daniel T.
