Zhuangzi and Early Chinese Philosophy Steve Coutinho, 2017-03-02 The Daoist philosopher Zhuangzi also known as Chuang Tzu along with Confucius Lao Tzu and the Buddha ranks among the most influential thinkers in the development of East Asian thought His literary style is humorous and entertaining yet the philosophical content is extraordinarily subtle and profound This book introduces key topics in early Daoist philosophy Drawing on several issues and methods in Western philosophy from analytical philosophy to semiotics and hermeneutics the author throws new light on the ancient Zhuangzi text Engaging Daoism and contemporary Western philosophical logic and drawing on new developments in our understanding of early Chinese culture Coutinho challenges the interpretation of Zhuangzi as either a skeptic or a relativist and instead seeks to explore his philosophy as emphasizing the ineradicable vagueness of language thought and reality This new interpretation of the Zhuangzi offers an important development in the understanding of Daoist philosophy describing a world in flux in which things themselves are vague and inconsistent and tries to show us a Way a Dao to negotiate through the shadows of a chaotic world

characterizes a neglected communal mode of philosophy the philosophical community by describing the constellation of metaethical principles general axiological cultural and dialectical that cultivates its values The book draws on examples from across the globe and history including interviews of adherents of living philosophical communities *Dao Companion to Daoist Philosophy* Xiaogan Liu,2014-10-27 This is the first comprehensive companion to the study of Daoism as a philosophical tradition It provides a general overview of Daoist philosophy in various thinkers and texts from 6th century BCE to 5th century CE and reflects the latest academic developments in the field It discusses theoretical and philosophical issues based on rigorous textual and historical investigations and examinations reflecting both the ancient scholarship and modern approaches and methodologies The themes include debates on the origin of the Daoism the authorship and dating of the Laozi the authorship and classification of chapters in the Zhuangzi the themes and philosophical arguments in the Laozi and Zhuangzi their transformations and developments in Pre Qin Han and Wei Jin periods by Huang Lao school Heguanzi Wenzi Huainanzi Wang Bi Guo Xiang and Worthies in bamboo grove among others Each chapter is written by expert s and specialist s on the topic discussed **Death and Philosophy** J.E Malpas,Robert C. Leung,2019-07-18 History mattered to the political elite in ancient China Leung explores why it was so important and to what end **The Great Transformation** Karen Armstrong,2009-02-24 From one of the world s leading writers on religion and the highly acclaimed author of the bestselling A History of God The Battle for God and The Spiral Staircase comes a major new work a chronicle of one of the most important intellectual revolutions in world history and its relevance to our own time In one astonishing short period the ninth century BCE the peoples of four distinct regions of the civilized world created the religious and philosophical traditions that have continued to nourish humanity into the present day Confucianism and Daoism in China Hinduism and Buddhism in India monotheism in Israel and philosophical rationalism in Greece Historians call this the Axial Age because of its central importance to humanity s spiritual development Now Karen Armstrong traces the rise and development of this transformative moment in history examining the brilliant contributions to these traditions made by such figures as the Buddha Socrates Confucius and Ezekiel Armstrong makes clear that despite some differences of emphasis there was remarkable consensus among these religions and philosophies each insisted on the primacy of compassion over hatred and violence She illuminates what this family resemblance reveals about the religious impulse and quest of humankind And she goes beyond spiritual archaeology delving into the ways in which

these Axial Age beliefs can present an instructive and thought provoking challenge to the ways we think about and practice religion today A revelation of humankind s early shared imperatives yearnings and inspired solutions as salutary as it is fascinating Excerpt from The Great Transformation In our global world we can no longer afford a parochial or exclusive vision We must learn to live and behave as though people in remote parts of the globe were as important as ourselves The sages of the Axial Age did not create their compassionate ethic in idyllic circumstances Each tradition developed in societies like our own that were torn apart by violence and warfare as never before indeed the first catalyst of religious change was usually a visceral rejection of the aggression that the sages witnessed all around them All the great traditions that were created at this time are in agreement about the supreme importance of charity and benevolence and this tells us something important about our humanity

Grassroots Activism of Ancient China Hung-yok Ip,2022-02-24 This book examines Mohism as a movement in early China focusing on the Mohists pursuit of power Fashioning themselves as grassroots activists the Mohists hoped to impact the elite by gaining entry in its community and influencing it from within To create a less violent world they deployed strategies of persuasion and negotiation but did not discard counterviolence in their dealings with the ruling class In executing their activism the Mohists produced knowledge that allowed them to hone their nonviolent strategies as well as to mount armed resistance to aggression In addition the Mohists paid significant attention to the issue of personhood constructing a self cultivation tradition unsparing in its demands for overcoming human conditions that would impede their performance as activists This book situates Mohism in the history of nonviolent activism and in that of negotiation and conflict resolution

The Culture of Sex in Ancient China Paul R. Goldin,2001-10-31 The subject of sex was central to early Chinese thought Discussed openly and seriously as a fundamental topic of human speculation it was an important source of imagery and terminology that informed the classical Chinese conception of social and political relationships This sophisticated and long standing tradition however has been all but neglected by modern historians In The Culture of Sex in Ancient China Paul Rakita Goldin addresses central issues in the history of Chinese attitudes toward sex and gender from 500 B C to A D 400 A survey of major pre imperial sources including some of the most revered and influential texts in the Chinese tradition reveals the use of the image of copulation as a metaphor for various human relations such as those between a worshiper and his or her deity or a ruler and his subjects In his examination of early Confucian views of women Goldin notes that while contradictions and ambiguities existed in the articulation of these views women were nevertheless regarded as full participants in the Confucian project of self transformation He goes on to show how assumptions concerning the relationship of sexual behavior to political activity assumptions reinforced by the habitual use of various literary tropes discussed earlier in the book led to increasing attempts to regulate sexual behavior throughout the Han dynasty Following the fall of the Han this ideology was rejected by the aristocracy who continually resisted claims of sovereignty made by impotent emperors in a succession of short lived dynasties Erudite and immensely entertaining this

study of intellectual conceptions of sex and sexuality in China will be welcomed by students and scholars of early China and by those with an interest in the comparative development of ancient cultures *Early China* Li Feng,2013-11-14 Early China refers to the period from the beginning of human history in China to the end of the Han Dynasty in AD 220 The roots of modern Chinese society and culture are all to be found in this formative period of Chinese civilization Li Feng's new critical interpretation draws on the most recent scholarship and archaeological discoveries from the past thirty years This fluent and engaging overview of early Chinese civilization explores key topics including the origins of the written language the rise of the state the Shang and Zhou religions bureaucracy law and governance the evolving nature of war the creation of empire the changing image of art and the philosophical search for social order Beautifully illustrated with a wide range of new images this book is essential reading for all those wanting to know more about the foundations of Chinese history and civilization *Mediation of Legitimacy in Early China* Yegor Grebnev,2022-07-12 Scholarship on early China has traditionally focused on a core group of canonical texts However understudied sources have the potential to shift perspectives on fundamental aspects of Chinese intellectual religious and political history Yegor Grebnev examines crucial noncanonical texts preserved in the Yi Zhou shu Neglected Zhou Scriptures and the Grand Duke traditions which represent scriptural traditions influential during the Warring States period but sidelined in later history He develops an innovative framework for the study and interpretation of these texts focusing on their role in the mediation of royal legitimacy and their formative impact on early Daoism Grebnev demonstrates the centrality of the Yi Zhou shu in Chinese intellectual history by highlighting its simultaneous connections to canonical traditions and esoteric Daoism He also shows that the Daoist rituals of textual transmission embedded in the Grand Duke traditions bear an imprint of the courtly environment of the Warring States period where early Daoists strove for prestige and power offering legitimacy through texts ascribed to the mythical sage rulers These rituals appear to have emerged at the same period as the core Daoist philosophical texts and not several centuries later as conventionally believed which calls for a reassessment of the history of Daoism's interrelated religious and philosophical strands Offering a far reaching reconsideration of early Chinese intellectual and religious history *Mediation of Legitimacy in Early China* sheds new light on the foundations of the Chinese textual tradition **Life, Liberty, and the Pursuit of Dao** ,2013-08-08 This highly original work introduces the ideas and arguments of the ancient Chinese philosophies of Confucianism and Daoism to some of the most intractable social issues of modern American life including abortion gay marriage and assisted suicide Introduces the precepts of ancient Chinese philosophers to issues they could not have anticipated Relates Daoist and Confucian ideas to problems across the arc of modern human life from birth to death Provides general readers with a fascinating introduction to Chinese philosophy and its continued relevance Offers a fresh perspective on highly controversial American debates including abortion stem cell research and assisted suicide **The Routledge Companion to Chinese Philosophy** Brook Ziporyn,Stephen C. Walker,2025-10-21 The Routledge Companion to

Chinese Philosophy features more than 40 chapter length introductions to the concepts claims and arguments that animate the Chinese philosophical tradition Taking a topic by topic rather than text by text approach this Companion aims at helping contemporary Anglophone readers access the philosophical riches of the Chinese tradition by balancing close analysis with broad contextualization The book is divided into four Acts that reflect system level changes in how the Chinese philosophical conversation has been conducted Act I draws primarily on pre imperial texts foregrounding competition among persuaders in the absence of a geographical or canonical center of gravity Act II focuses on the early imperial centralization of intellectual culture around the corpus of Confucian classics Act III restructures the conversation space according to the radically innovative priorities of Buddhism Act IV focuses on Neo Confucianism which combines some of the priorities of Act II with the ongoing legacy of Act III Within each Act contributors focus on topics like religious and political thought ethics and self cultivation philosophical anthropology and theory of agency language epistemology metaphysics hermeneutics and debate This volume is essential reading for students academics and philosophers with an interest in Chinese philosophy

The Emotions in Early Chinese Philosophy Curie Virág, 2017-02-13 In China the debate over the moral status of emotions began around the fourth century BCE when early philosophers first began to invoke psychological categories such as the mind xin human nature xing and emotions qing to explain the sources of ethical authority and the foundations of knowledge about the world Although some thinkers during this period proposed that human emotions and desires were temporary physiological disturbances in the mind caused by the impact of things in the world this was not the account that would eventually gain currency The consensus among those thinkers who would come to be recognized as the foundational figures of the Confucian and Daoist philosophical traditions was that the emotions represented the underlying dispositional constitution of a person and that they embodied the patterned workings of the cosmos itself Curie Vir g sets out to explain why the emotions were such a central preoccupation among early thinkers situating the entire debate within developments in conceptions of the self the cosmos and the political order She shows that the mainstream account of emotions as patterned reality emerged as part of a major conceptual shift towards the recognition of natural reality as intelligible orderly and coherent The mainstream account of emotions helped to summon the very idea of the human being as a universal category and to establish the cognitive and practical agency of human beings This book the first intensive study of the subject traces the genealogy of these early Chinese philosophical conceptions and examines their crucial role in the formation of ethical political and cultural values in China
