**Global Financial Stability Report, April 2021** International Monetary Fund, 2021-04-06 Extraordinary policy measures have eased

financial conditions and supported the economy helping to contain financial stability risks Chapter 1 warns that there is a pressing need to act to avoid a legacy of vulnerabilities while avoiding a broad tightening of financial conditions Actions taken during the pandemic may have unintended consequences such as stretched valuations and rising financial vulnerabilities The recovery is also expected to be asynchronous and divergent between advanced and emerging market economies Given large external financing needs several emerging markets face challenges especially if a persistent rise in US rates brings about a repricing of risk and tighter financial conditions The corporate sector in many countries is emerging from the pandemic overindebted with notable differences depending on firm size and sector Concerns about the credit quality of hard hit borrowers and profitability are likely to weigh on the risk appetite of banks Chapter 2 studies leverage in the nonfinancial private sector before and during the COVID 19 crisis pointing out that policymakers face a trade off between boosting growth in the short term by facilitating an easing of financial conditions and containing future downside risks This trade off may be amplified by the existing high and rapidly building leverage increasing downside risks to future growth The appropriate timing for deployment of macroprudential tools should be country specific depending on the pace of recovery vulnerabilities and policy tools available Chapter 3 turns to the impact of the COVID 19 crisis on the commercial real estate sector While there is little evidence of large price misalignments at the onset of the pandemic signs of overvaluation have now emerged in some economies Misalignments in commercial real estate prices especially if they interact with other vulnerabilities increase downside risks to future growth due to the possibility of sharp price corrections
