variable affordances of each form in such contexts Hereby the focus lies on prescriptive forms that is on poetic forms which are defined by or at least associated with specific metrical stanzaic or overall structures or the absence of such rather than poetic genres that are primarily characterised by similarities in subject matter like the elegy or the ode While this Handbook should be accessible to students its aim is not to offer basic introductions but rather to broaden a historical and functional understanding of the poetic forms it covers and to engage with poetic forms not as givens but as historically contingent processes of formation Above all this Handbook s formalism is new formalist in emphasising historical awareness and contextualisation
