Low Code Development with Mendix Erwin 't Hoen, 2024-11-15

DESCRIPTION This book offers a comprehensive overview of the Mendix platform from a developer's perspective. This powerful technology breaks down barriers, allowing anyone with or without coding experience to build custom applications quickly and efficiently with a solid foundation for platform evaluation. Key topics include Mendix's database design, page designer, and visual tools for creating functionality through microflows and nanoflows. You will also learn about security best practices and automated performance enhancements. Integration with other applications via REST, SOAP, and OData is explored, as well as the creation of web, progressive, and native mobile apps, all using the same low-code approach. By the end, you will be ready to begin your Mendix certification journey. You will have a thorough understanding of Mendix and, through hands-on exercises, you will gain practical experience by developing a cloud-deployed Mendix application, positioning you for success in the fast-evolving low-code development landscape.

KEY FEATURES Step-by-step instructions for creating Mendix applications from scratch with practical exercises to build hands-on experience. Tips and tricks to optimize performance and maintainability of Mendix applications. Real-world examples, case studies, and optimization tips to enhance Mendix application performance and maintainability.

WHAT YOU WILL LEARN Grasp the essentials of low-code development and discover how it speeds up application creation. Build robust data models that mirror real-world structures for effective data representation. Create intuitive and reusable user-friendly interfaces using Mendix's drag-and-drop tools, enhancing user experience. To automate business processes with microflows, including complex decision-making and data manipulation. To integrate Mendix applications with external systems using REST, SOAP, and OData APIs. Advanced topics like security integration and mobile development.

WHO THIS BOOK IS FOR This book is intended for new and seasoned developers that are starting their journey into low-code development and business users evaluating low-code software development. A programming background is helpful but not required to understand the content of the book.

Innovations in Applied Artificial Intelligence Floriana Esposito, 2005-06-16

Intelligent systems are those which produce intelligent outputs. AI researchers have been focusing on developing and employing strong methods that are capable of solving complex real-life problems. The 18th International Conference on Industrial Engineering Applications of Artificial Intelligence Expert Systems (IEA/AIE 2005) held in Bari, Italy, presented such work performed by many scientists worldwide. The Program Committee selected long papers from contributions presenting more complete work and posters from those reporting ongoing research. The Committee enforced

the rule that only original and unpublished work could be considered for inclusion in these proceedings The Program Committee selected 116 contributions from the 271 submitted papers which cover the following topics artificial systems search engines intelligent interfaces knowledge discovery knowledge based technologies natural language processing machine learning applications reasoning technologies uncertainty management applied data mining and technologies for knowledge management The contributions oriented to the technological aspects of AI and the quality of the papers are witness to a research activity clearly aimed at consolidating the theoretical results that have already been achieved The conference program also included two invited lectures by Katharina Morik and Roberto Pieraccini Many people contributed in different ways to the success of the conference and to this volume The authors who continue to show their enthusiastic interest in applied intelligence research are a very important part of our success We highly appreciate the contribution of the members of the Program Committee as well as others who reviewed all the submitted papers with efficiency and dedication
