**Nutrition in Lifestyle Medicine** James M. Rippe, 2016-12-29 This newest addition to the Nutrition and Health series focuses on nutrition's key role in lifestyle interventions to prevent and manage diseases. The book pays particular attention to nutritional considerations related to obesity, diabetes, and cardiovascular disease. Edited by cardiologist Dr James Rippe, a well-known expert in the nascent specialty of Lifestyle Medicine, *Nutrition in Lifestyle Medicine* will also focus on a variety of specialized areas such as nutrition for athletes and physically active individuals, hydration and nutrition throughout the life cycle spanning from children to individuals over the age of 60. In addition, chapters will be included on controversies in nutrition such as health effects of added sugars and saturated fatty acids in the diet. Finally, specialized chapters will be included in such areas as nutrition for women, nutrition for men, nutrition for Latinos, the use of supplements, communication about nutrition, public policy issues, and the interface between nutrition and physical activity. *Lifestyle Medicine* supported by the American Journal of Lifestyle Medicine. Dr Rippe's textbook *Lifestyle Medicine* CRC Press 2013 and American College of Lifestyle Medicine ACLM is a new national medicine specialty that stresses the use of lifestyle interventions in the treatment and management of disease. Its practitioners effectively manage medical treatments alongside the lifestyle interventions, for example, lowering insulin treatment for patients with diabetes, reducing the dose of anti-hypertension medications for people with hypertension, and prescribing certain medical interventions that aid in smoking cessation.

***Foods, Nutrients and Food Ingredients with Authorised EU Health Claims*** Michele Sadler, 2015-05-28 The second volume of *Foods, nutrients and food ingredients with authorised EU health claims* continues from Volume 1, which provided a comprehensive overview of many of the permitted health claims for foods and nutrients approved under European Regulation EC 1924/2006. This new volume discusses more of the health claims authorised to date for use in the EU. The chapters cover details of various permitted claims such as the approved wording, conditions of use, the target group for the claims, the evidence for the claimed health benefits, and where appropriate, details of other relevant legislation, consumer-related issues, and future trends. The book opens with an overview of regulatory developments relating to health claims. Part One reviews authorised disease risk reduction claims and proprietary claims. The second part investigates ingredients with permitted general function claims, with chapters examining ingredients such as red yeast rice, glucomannan, and guar gum. The final section of the book explores foods and nutrients with permitted health claims, including chapters on authorised EU health claims for prunes, foods with low or reduced sodium or saturated fatty acids, and claims for essential and long-chain polyunsaturated fatty acids. Building on volume 1, this title ensures that the area of EU health claims in food is comprehensively covered. Chapters are devoted to individual food ingredients and substances covering the range of issues related to health claims. Health-promoting products are an increasing consumer trend in product development, and this book provides key information on these advances.
