**Cultures of Intoxication** Fiona Hutton, 2020-01-25 This book considers the global discourses and debates about intoxication engaging in critical academic discussion around this concept The problems in defining intoxication are considered alongside the meanings of intoxication and how these meanings often differ across diverse drug using populations The way that intoxication has been engaged with over the centuries has affected how particular groups are perceived and responded to resulting in punitive responses such as drug prohibition alongside harsh treatment of those who are seen to transgress societal norms and values Therefore this collection seeks to unsettle dominant discourses about intoxication and to consider this concept in new critical ways Ways of being intoxicated are also defined in this book in their broadest sense from energy drinks and other legal drugs to recreational use of illicit drugs such as ecstasy to problematic drug use *The History of Problem Gambling* Peter Ferentzy, Nigel Turner, 2013-03-26 This book documents the history of ideas about problem gambling and its link to addictive disorders The book uses a combination of literature review and conceptual and linguistic analysis to explore the way ideas about problem gambling have changed over time It examines the religious socio cultural and medical influences on the development of the concept of problem gambling as a disease along with the ways in which such ideas were influenced by attitudes about substance abuse The history of mental illness notably as it pertains to themes such as loss of control over behavior is also addressed The book ends with a discussion of the current status and future prospects with an eye to which ideas about problem gambling and addictions seem most promising and which should perhaps be left behind *Reducing School Shootings* William H. Jaynes, 2021-02-01 This book calls for a multidimensional and comprehensive approach to reduce the number of school shootings rather than the simplistic unidimensional strategy that is commonly advocated Based on meta analyses examining which variables are most often related to positive changes in violent student behavior it also integrates other research and historical trends in order to formulate recommendations regarding how to reduce school shootings The topic of school shootings is one of the most vital issues in society today because 1 schools should be the safest places on Earth for children 2 if students do not feel safe they are not going to learn very well in school and 3 it is of such great concern to parents and society at large as evinced by the degree of news coverage that school shooting incidents receive Sadly despite the gravity of the problem many people tend to either respond in an emotional way or propose simplistic solutions Gun control legislation alone will not solve the problem instead it calls for a multi disciplinary and multifaceted approach involving parents teachers schools and healthcare This book investigates the status quo goals and solutions pursuing a fact based approach This book is of special interest to the academic community national leaders and other policymakers It is also suitable for courses on education psychology sociology criminal justice and other areas of law It will also appeal to the general audience **Drug Use for Grown-Ups** Dr. Carl L. Hart, 2021-01-12 Hart's argument that we need to drastically revise our current view of illegal drugs is both powerful and timely when it comes to the legacy of this country's war on drugs we should all share his outrage The New York Times Book Review From one of the

world's foremost experts on the subject a powerful argument that the greatest damage from drugs flows from their being illegal and a hopeful reckoning with the possibility of their use as part of a responsible and happy life Dr Carl L Hart Ziff Professor at Columbia University and former chair of the Department of Psychology is one of the world's preeminent experts on the effects of so-called recreational drugs on the human mind and body Dr Hart is open about the fact that he uses drugs himself in a happy balance with the rest of his full and productive life as a researcher and professor husband father and friend In *Drug Use for Grown Ups* he draws on decades of research and his own personal experience to argue definitively that the criminalization and demonization of drug use not drugs themselves have been a tremendous scourge on America not least in reinforcing this country's enduring structural racism Dr Hart did not always have this view He came of age in one of Miami's most troubled neighborhoods at a time when many ills were being laid at the door of crack cocaine His initial work as a researcher was aimed at proving that drug use caused bad outcomes But one problem kept cropping up the evidence from his research did not support his hypothesis From inside the massively well-funded research arm of the American war on drugs he saw how the facts did not support the ideology The truth was dismissed and distorted in order to keep fear and outrage stoked the funds rolling in and Black and brown bodies behind bars *Drug Use for Grown Ups* will be controversial to be sure the propaganda war Dr Hart argues has been tremendously effective Imagine if the only subject of any discussion about driving automobiles was fatal car crashes *Drug Use for Grown Ups* offers a radically different vision when used responsibly drugs can enrich and enhance our lives We have a long way to go but the vital conversation this book will generate is an extraordinarily important step
