High-performance Construction

Materials Caijun Shi, 2008 This book describes a number of high performance construction materials including concrete steel fiber reinforced cement fiber reinforced plastics polymeric materials geosynthetics masonry materials and coatings It discusses the scientific bases for the manufacture and use of these high performance materials Testing and application examples are also included in particular the application of relatively new high performance construction materials to design practice Most books dealing with construction materials typically address traditional materials only rather than high performance materials and as a consequence do not satisfy the increasing demands of today's society On the other hand books dealing with materials science are not engineering oriented with limited coverage of the application to engineering

practice This book is thus unique in reflecting the great advances made on high performance construction materials in recent years This book is appropriate for use as a textbook for courses in engineering materials structural materials and civil engineering materials at the senior undergraduate and graduate levels It is also suitable for use by practice engineers including construction materials mechanical and civil engineers Handbook of Precast Segmental Tunnel Lining Systems Verya Nasri,David Klug,Brian Fulcher,James A.
