Digital Processing of Synthetic Aperture Radar Data Ian G. Cumming, 2005 **Imaging from Spaceborne and Airborne SARs, Calibration, and Applications** Masanobu Shimada, 2018-10-26 Sixty years after its birth Synthetic Aperture Radar SAR evolved as a key player of earth observation and it is continually upgraded by enhanced hardware functionality and improved overall performance in response to user requirements The basic information gained by SAR includes the backscattering coefficient of targets their phases the truncated distance between SAR and its targets and their polarization dependence The spatiotemporal combination of the multiple data operated on the satellite or aircraft significantly increases its sensitivity to detect changes on earth including temporal variations of the planet in amplitude and the interferometric change for monitoring disasters deformations caused by earthquakes volcanic activity and landslides environmental changes ship detection and so on Earth orbiting satellites with the appropriate sensors can detect environmental changes because of their large spatial coverage and availability Imaging from Spaceborne and Airborne SARs Calibration and Applications provides A to Z information regarding SAR researches through 15 chapters that focus on the JAXA L band SAR including hardware description principles of SAR imaging theoretical description of SAR imaging and error ScanSAR imaging polarimetric calibration inflight antenna pattern SAR geometry and ortho rectification SAR calibration defocusing for moving targets large scale SAR imaging and mosaic interferometric SAR processing irregularities application and forest estimation Sample data are created by using L band SAR JERS 1 PALSAR PALSAR 2 and Pi SAR L2 This book is based on the author s experience as a principal researcher at JAXA with responsibilities for L band SAR operation and researches It reveals the inside of SAR processing and application researches performed at JAXA which makes this book a valuable reference for a wide range of SAR researchers professionals and students **American Book Publishing Record**, 2003 **SYNTHETIC APERTURE RADAR**, 1978 **Implementation of a Synthetic Aperture Radar Processing Algorithm Using Actual Raw Data** Vickie Faulkner, 2009 **Processing of Synthetic Aperture Radar (SAR) Images**

Henri Maître, 2013-05-10 Synthetic aperture radar provides broad area imaging at high resolutions which is used in applications such as environmental monitoring earth resource mapping and military systems This book presents the tools required for the digital processing of synthetic aperture radar images They are of three types a the elements of physics b mathematical models and c image processing methods adapted to particular applications *On the Convergence of the Phase Gradient Autofocus Algorithm for Synthetic Aperture Radar Imaging*, 1996 Synthetic Aperture Radar SAR imaging is a class of coherent range and Doppler signal processing techniques applied to remote sensing The aperture is synthesized by recording and processing coherent signals at known positions along the flight path Demands for greater image resolution put an extreme burden on requirements for inertial measurement units that are used to maintain accurate pulse to pulse position information The recently developed Phase Gradient Autofocus algorithm relieves this burden by taking a data driven digital signal processing approach to estimating the range invariant phase aberrations due to either uncompensated motions of the SAR platform or to atmospheric turbulence Although the performance of this four step algorithm has been demonstrated its convergence has not been modeled mathematically A new sensitivity study of algorithm performance is a necessary step towards this model Insights that are significant to the application of this algorithm to both SAR and to other coherent imaging applications are developed New details on algorithm implementation identify an easily avoided biased phase estimate A new algorithm for defining support of the point spread function is proposed which promises to reduce the number of iterations required even for rural scenes with low signal to clutter ratios *Processing of Synthetic Aperture Radar Images* Henri Maître, 2008 First published in France in 2001 by Hermes Science Publications entitled Traitement des images de RSO T p verso **Algorithms for Synthetic Aperture Radar Imagery**, 2000 **Synthetic Aperture Radar Processing** Giorgio Franceschetti, Riccardo Lanari, 2018-02-06 Synthetic Aperture Radar Processing simply and methodically presents principles and techniques of Synthetic Aperture Radar SAR image generation by analyzing its system transfer function The text considers the full array of operation modes from strip to scan emphasizes processing techniques enabling the design of operational SAR codes A simple example then follows This book will be invaluable to all SAR scientists and engineers working in the field It may be used as the basis for a course on SAR image generation or as a reference book on remote sensing It contains a wide spectrum of information presented with clarity and rigor *Synthetic aperture radar* J.
