Older People Siân Wade, 2006-02-22 Intermediate care has become a buzzword within health and social care over the last few years. Seen as the panacea for a number of woes particularly for older people, intermediate care has been held up as a way forward within contemporary health and social care. This text explores in detail what is understood by the concept of intermediate care and in particular ways in which the needs of older people can be best met by this new range of services. Initial discussion centres on the concept of intermediate care and the motives for its development. This is followed by a summary of the range of intermediate care services that have been developed with a discussion of some of the confusion that surrounds the concept. The debate then moves on to centre on older people, discussing first why older people have come to be perceived as one of the main client groups that may benefit from intermediate care and then how intermediate care could be developed to better serve their needs. An overview of ageing and the uniqueness of older people is then provided, followed by an exploration of some of the challenges faced by older people within society and how this has extended into the delivery of health and social care.

*A Comprehensive Guide to Rehabilitation of the Older Patient E-Book* Shane O'Hanlon, Marie Smith, 2020-11-17 This book will help all health professionals involved in the rehabilitation of older people to provide their patients with the highest possible quality of life and autonomy. Expanded and rewritten by a diverse team of authors, the text is suitable for doctors in all specialties that see older patients as well as nurses, physiotherapists, occupational therapists, psychologists, dietitians, speech and language therapists, pathologists, physician associates, assistants, healthcare assistants and many others, including patients, family members and students. The book is written in an accessible, no jargon style and provides a patient-centred perspective on recent advances in the field of rehabilitation, an increasingly important aspect of care for older people. Clear explanations of relevant concepts: ageing, frailty, comprehensive assessment, rehabilitation. Broad coverage of all aspects of rehabilitation, including different settings. Explanations of input from multiple health professionals. Problem-based section that highlights solutions to common issues during rehabilitation. Specialty-specific areas of rehabilitation such as stroke rehabilitation, cancer rehabilitation, post-operative rehabilitation, trauma rehabilitation in the community. Practical section explaining how to plan discharge safely, run a care planning meeting, organize home supports, continue rehabilitation at home. Evidence-based but accessible writing, complemented by practical clinical wisdom. Aimed at a broader audience, applicable to all health professionals who see older patients. Resources for patients and their caregivers. Multiple choice questions to test knowledge.

**Oxford Handbook of Orthopaedic and Trauma Nursing** Rebecca Jester, Julie Santy, Jean Rogers, 2011-04-07 Providing busy practitioners with the information they need to deliver care and nursing students with a clear overview of the field, this handbook is an easily accessible, practical and comprehensive guide to all aspects of practice.

A-Z of Interagency Working Jon Glasby, Helen Dickinson, 2013-11-28 If you are looking for a succinct overview of the ideas and debates that shape the field of interagency working, then this is the book for you.
