Hagopian, 1994 Design of a packed distillation column for use by students **The Design, Construction, and Operation of a Spiral Packed Extractive Distillation Column with Reflux** W. H. Clarke, 1946 **Design of Distillation Column Control Systems** P. Buckley, J. Shunta, W. Luyben, 1986 A distillation column is both multivariable and nonlinear and it consumes immense quantities of energy Yet despite the design challenges it presents it is still the most popular unit operation for refining in industrial plants today Much has been published on the subject of distillation column design but much remains to be explained That is why this book is unique In a departure from the more traditional empirical and theoretical approaches it introduced the reader to the practical realm by presenting quantitative design techniques that have been demonstrated to be useful and valid over the course of hundreds of actual applications The book is divided into three main parts Part I an introduction presents an industrial perspective of control objectives It discusses briefly the relationship between column design features and column controllability It thus provides a short refresher course for chemical engineers and background for those trained in other branches of engineering Part II Concepts and Configurations discusses column overhead and base arrangements typical control schemes and some hardware considerations Part III is dedicated to quantitative design Mathematical models are presented for pressure and differential pressure controls liquid level control and composition control of binary distillation Emphasis on topics of primary

interest to the control engineer Essentially nonmathematical treatment Ideal for those involved in troubleshooting existing columns as well to design engineers **Distillation Column Design by Addition of Column Sections** S. T. Holland,2001

Distillation and Absorption in Packed Columns Thomas H. Chilton,Allan Philip Colburn,1935 Modelling of Packed Bed Distillation Column Anders Karlström,1991 *Distillation Design in Practice* L. M. Rose,1985 All industrial distillation design of any consequence is now done using computer methods Students need to be introduced to these new methods shown the principles behind them and taught how to use them more effectively and intelligently This book is designed for use in a senior course in distillation design for the last undergraduate year or at postgraduate level It is particularly useful for such a course because it integrates various disciplines thermodynamics design control and distillation that the student will have met separately in an earlier part of his course The topics treated are design vapour liquid equilibria data binary distillation multicomponent distillation batch distillation distillation systems column internals safety and control systems pilot experiments and debottlenecking Whereas most senior books on distillation concentrate on solution methods for the algebraic equations defining the separation in the column this book concentrates on those areas which are the real concern of the distillation equipment designer The text provides a link between the theory of distillation and industrial practice **Continuous Operation of a Packed Distillation Column** Matthew J. Engel,1995 Construction of a packed distillation column for use by the Chemical Engineering Department of the university as an educational tool *Continuous Operation and Digital Control of a Pilot-scale Packed Distillation Column* Nikolas A. Process and Mechanical Design for Distillation Column Reliability David A. Freed,2002 *Evaluation of Packed Distillation Columns* Thaine W. Reynolds,1951 The evaluation indicated that of packings used in glass distillation columns Heli Grid was most efficient and of packings used in steel distillation columns steel helices were most efficient **Robust and Reliable Design Method of a Distillation Column** Libin Zhang,2003
