DEVONthink 4 is an incredibly powerful information management app that can function as anything from a simple snippet keeper and note taker through a massive database for a complex research project. It has a wealth of document processing organization and searching tools that go far beyond the Mac's Finder and it can create many types of documents from scratch as well as importing data in numerous ways. All these features give you unprecedented control over your data. They also mean DEVONthink is a lot to wrap your head around. This book created in partnership with DEVONtechnologies helps you get started with DEVONthink by acquainting you with not only its interface and major features but also its philosophy. You'll learn how to approach the tasks you may want to accomplish which features might serve you best and which you might want to ignore and how to develop a workflow that makes sense given your needs and preferences. You'll also learn how to extend your DEVONthink experience beyond your main Mac with detailed coverage of the many ways you can sync DEVONthink databases to other Macs and to iPhones and iPads using the DEVONthink To Go app. The book covers newly added DEVONthink 4 features such as versioning, audit proof databases, PDF bookmarking and optionally in the Pro and Server versions, extensive support for generative AI plus user interface changes including significantly reworked inspectors. After covering essential DEVONthink vocabulary and concepts, Joe helps you start using DEVONthink effectively. You'll learn how to decide how many databases you need and set them up. Determine whether to input or index data. Import data from many different apps. Import data from a scanner including OCR options. Use grouping and tagging to organize data. Add and work with DEVONthink 4's extensive metadata capabilities. Use simple and sophisticated techniques for searching. Create smart groups that automatically gather newly imported data. Use smart rules and AppleScript or JavaScript to automate countless activities within DEVONthink. Create documents in plain text, HTML, Markdown and more. Edit documents in DEVONthink or externally. Find the best way to sync DEVONthink data with other devices. Work with reminders, smart templates and other sophisticated tools. Convert documents between formats. Chat with your documents using your favorite large language model (LLM). Effectively use the DEVONthink To Go iPhone/iPad app. Share DEVONthink documents with other people. Export documents from DEVONthink. Back up and maintain healthy databases. Questions answered in the book include: What is DEVONthink good for and what should be left to other apps? What kinds of data can I import? Short answer: Nearly everything. How can I display my data in a way that works well for me? When I import documents from different sources where do they end up and why? Is it better to sort imported documents right away or leave them for later? Should I group my data, tag it or both? What are duplicates and replicants and how can I tell them apart? Which types of data can be created or edited within DEVONthink? How do I make my DEVONthink database accessible via the web using DEVONthink Server? How do I move documents out of DEVONthink using the Share feature? How do I use DEVONthink To Go on my iPhone/iPad? How excited/skeptical should I be about these new AI features? *Designing Products People Love* Scott Hurff, 2015-12-17. The Ultimate Backup Guide Jeff Blum,2023-05-20 NEW EDITION UPDATED MAY 2023 You ve probably been hearing a lot about data backup these days thanks to the increasing popularity of services like Dropbox Google Drive OneDrive Carbonite etc This guide the result of months of research and writing will cover all of those and much more While at first glance backup seems like a straightforward topic it can be complicated by the following common situations Having more data than you can fit on your computer Using multiple computers that need access to the same files Making some files accessible on the Web for times when you can t use your own computer Syncing and accessing some files with your mobile devices phones tablets Protecting yourself from a major system crash theft or disaster Keeping copies of different versions of some files Syncing or backing up only selected files instead of everything My goal is to help you understand everything you need to know about protecting your data with backups I will also show you how to sync your files across all your computing devices and how to share selected files or collaborate with others At its core this is a technology guide but securing your digital data is about more than just technology Thus I will provide a unique framework to help you organize and more easily work with your data You will learn how to match different techniques to different data types and hopefully become more productive in the process I have tried to make this guide complete which means it must appeal to the tech savvy and technophobe alike Thus you will read in simple terms about the different types of backup full incremental differential delta cloud services how to protect your files with encryption the importance of file systems when working with different types of computers permanently assigning drive letters to external drives and other useful tips In many sections of the guide I present a fairly complete listing of backup and syncing tools and services I do this to be thorough and for those who may have special needs or an above average interest in the topic However I recognize you will most likely be more interested in personal suggestions than a full listing of choices which will require time to investigate Accordingly I highlight the tools I have used and recommend Moreover I lay out my complete backup and syncing system which you are free to copy if it suits you Note I am a Windows user and this bias shows in parts of the guide Most of the concepts are independent of operating system and many of the recommended programs are available for Macs as well as Windows but some details e g the discussion of Windows Libraries and some highlighted software and services are Windows only I think if you are a Mac user you are already used to this common bias but I wish to make it clear before you decide to read this guide
