Digital Libraries Fabrice Papy, 2016-01-29 The technological interoperability of digital libraries must be rethought in order to adapt to new uses and networks Informative digital environments aimed at responding to heritage cultural scientific or commercial demands have taken over the global cyberspace and have redesigned the techno informative landscape of the Web However while the technological models demonstrate their effectiveness and explain to a large extent the creation of digital libraries archives and deposits the subjacent concept of uses continues to cause debate The information technologies used by heterogeneous digital libraries enable a technical interoperability of content This is not enough to allow the adhesion of a public connected to very different information profiles and techniques This book explores the avenues of a user orientated interoperability where the questions of consultation interfaces and content description processes are studied Discusses Metadata as a resource for linking Provides a practical approach A valuable resource for anyone involved in digital library developments and digital collections and services *Information and Knowledge System* Pierre-Emmanuel Arduin, Michel Grundstein, Camille Rosenthal-Sabroux, 2015-06-29 The purpose of this book is to question the relationships involved in decision making and the systems designed to support it decision support systems DSS The focus is on how these systems are engineered to stop and think about the questions to be asked throughout the engineering process and in particular about the impact designers choices have on these systems This therefore involves identifying the elements of the problem of decision support systems engineering the main objects and dimensions to be considered and the relationships they involve issues at the levels of the decision maker of the organization and even of society the general approach to which to subscribe and so on **Innovative Concepts for Agent-Based Systems** Walt Truskowski, Chris Rouff, Mike Hinchey, 2003-10-21 This collection represents the proceedings of the 1st GSFC JPL Workshop on Radical Agent Concepts WRAC which was held on 16 18 January 2002 at the Science Applications International Corporation SAIC Conference Center in McLean VA USA Over the past few years agent technology has emerged as a powerful force in computing Agent technology may well form the foundation for the next generation of computing systems New and innovative agent concepts and techniques may bring further developments to this exploding area of research Such work is often strongly inspired by theoretical or empirical studies of human behavior social intelligence psychology arts biology computer science and philosophy This workshop aimed at bringing together an interdisciplinary event or in other words thinkers practitioners and academics with an interest in radical very novel concepts for agent based systems The workshop provided a forum to present the latest research findings in many aspects of agent technology The organizers welcomed participation by those working in agent architectures agent communities agent communications agent modeling agent applications and other agent related areas We were particularly seeking papers on novel and innovative ideas pushing the envelope of current agent technology Contributions without a prototype or working system i e purely conceptual contributions were welcomed and out of the box thinkers were

especially encouraged to participate The workshop was structured so as to allow the participants adequate time for discussion and interaction to exchange ideas and reflect on the motivations scientific grounds and practical consequences of the concepts presented

Sustainable IT Architecture Pierre Bonnet, Jean-Michel Detavernier, Dominique Vauquier, Jerome Boyer, Erik Steinholtz, 2013-03-01 Sustainable IT Architecture The Progressive Way of Overhauling Information Systems with SOA This book focuses on Service Oriented Architecture SOA the basis of sustainable and more agile IT systems that are able to adapt themselves to new trends and manage processes involving a third party The discussion is based on the public Praxeme method and features a number of examples taken from large SOA projects which were used to rewrite the information systems of an insurance company as such decision makers creators of IT systems programmers and computer scientists as well as those who will use these new developments will find this a useful resource

Urbanisation et modernisation du SI Bernard LE ROUX, Luc DESBERTRAND, Pascal GUÉRIF, Xavier TANG, Julien TIXIER, Pierre VERGER, 2004-04-05 Les spécialistes des systèmes d'information SI ont choisi de nommer urbanisation la démarche qui consiste rendre un système d'information plus apte servir la stratégie de l'entreprise et anticiper les changements dans son environnement CIGREF L'urbanisme dans ce contexte vise prendre en compte la nécessaire appropriation du SI par les maîtres d'ouvrage stratégique opérationnel d'ailleurs pour cela une compétence plus grande en matière de SI leur est nécessaire Les techniques d'urbanisme ont également pour objectif d'accroître la communication avec les maîtres d'œuvre La performance d'une organisation entreprise administration service public est aujourd'hui très dépendante de la qualité de son SI dont la complexité est sans cesse croissante Il faut maîtriser le SI pour pouvoir le moderniser le projet d'urbanisation du SI n'est pas un projet en plus C'est souvent celui qui permet de réaliser tous les autres

Software Quality - ECSQ 2002 Jyrki Kontio, Reidar Conradi, 2003-08-01 Software professionals and companies live in a new world today Increasingly complex systems need to be built faster and cheaper While many of the established approaches in software quality are still valid the software quality community is going through a paradigm shift that requires a reassessment of our current method and tool portfolio as well as creating new and more effective solutions We have selected two themes for this conference to highlight this paradigm shift Our first theme production of attractive and reliable software at Internet speed sums up the dilemma many software organisations face In order to be competitive software should contain advanced features and run reliably yet it should be developed quickly and cost effectively for the right market window Finding the right balance between these objectives is a critical question that will determine business success in the years to come Our second theme production of software with a dynamic partnership network highlights the current trend of using partnerships and subcontractors as integral players in the software development process Partnerships sometimes need to be created quickly to respond to a market opportunity yet the costs and speed of cooperation must be competitive Different companies have different processes quality tools and cultures yet

they should cooperate seamlessly for the best result

Validation and Verification of Knowledge Based Systems

Anca Vermesan, Frans Coenen, 2013-04-17 Knowledge based KB technology is being applied to complex problem solving and critical tasks in many application domains Concerns have naturally arisen as to the dependability of knowledge based systems KBS As with any software attention to quality and safety must be paid throughout development of a KBS and rigorous verification and validation V V techniques must be employed Research in V V of KBS has emerged as a distinct field only in the last decade and is intended to address issues associated with quality and safety aspects of KBS and to credit such applications with the same degree of dependability as conventional applications In recent years V V of KBS has been the topic of annual workshops associated with the main AI conferences such as AAAI IJACI and ECAI Validation and Verification of Knowledge Based Systems contains a collection of papers dealing with all aspects of KBS V V presented at the Fifth European Symposium on Verification and Validation of Knowledge Based Systems and Components EUROVAV 99 which was held in Oslo in the summer of 1999 and was sponsored by Det Norske Veritas and the British Computer Society's Specialist Group on Expert Systems SGES *Knowledge Acquisition, Modeling and Management* Dieter Fensel, Rudi

Studer, 1999-06-22 This book constitutes the refereed proceedings of the 11th European Workshop on Knowledge Acquisition Modeling and Management EKAW 99 held at Dagstuhl Castle Germany in May 1999 The volume presents 16 revised full papers and 15 revised short papers were carefully reviewed and selected from a high number of submissions Also included are two invited papers The papers address issues of knowledge acquisition i e the process of extracting creating structuring knowledge etc of knowledge level modeling for knowledge based systems and of applying and redefining this work in a knowledge management and knowledge engineering context *Knowledge Acquisition, Modeling and Management* Rudi

Studer, 2003-06-29 Past Present and Future of Knowledge Acquisition This book contains the proceedings of the 11th European Workshop on Knowledge Acquisition Modeling and Management EKAW 99 held at Dagstuhl Castle Germany in May of 1999 This continuity and the high number of submissions reflect the mature status of the knowledge acquisition community Knowledge Acquisition started as an attempt to solve the main bottleneck in developing expert systems now called knowledge based systems Acquiring knowledge from a human expert Various methods and tools have been developed to improve this process These approaches significantly reduced the cost of developing knowledge based systems However these systems often only partially fulfilled the task they were developed for and maintenance remained an unsolved problem This required a paradigm shift that views the development process of knowledge based systems as a modeling activity Instead of simply transferring human knowledge into machine readable code building a knowledge based system is now viewed as a modeling activity A so called knowledge model is constructed in interaction with users and experts This model need not necessarily reflect the already available human expertise Instead it should provide a knowledge level characterization of the knowledge that is required by the system to solve the application task Economy and quality in system development and maintainability are

achieved by reusable problem solving methods and ontologies. The former describe the reasoning process of the knowledge based system i.e. the algorithms it uses and the latter describe the knowledge structures it uses i.e. the data structures. Both abstract from specific application and domain specific circumstances to enable knowledge reuse.

Modélisation de systèmes complexes avec SysML Pascal Roques, 2013-05-16 Extension d'UML récemment adoptée par l'OMG, le nouveau langage de modélisation SysML est dédié à la conception de systèmes dits complexes : satellites, avions, systèmes de défense, télécommunication, appareils de radiologie, voitures modernes, systèmes de signalisation ferroviaire, de contrôle, commande de centrale d'énergie, etc. Un ouvrage pour pratiquer SysML, langage de modélisation pour l'ingénierie de systèmes complexes. Cet ouvrage explore l'ensemble des diagrammes SysML pour en faire découvrir la richesse et les atouts. Au fil d'une étude de cas, que tout expert peut s'approprier, quel que soit son domaine, l'auteur transmet une démarche cohérente de modélisation avec SysML, commencer par l'identification des véritables besoins utilisateur. Toutes les difficultés inhérentes à la modélisation sont abordées et l'ouvrage explique quelles sont les exigences système induites, comment créer l'architecture interne d'un système et garantir son adéquation aux fonctions demandées. En tant qu'extension d'UML, le profil SysML rend plus aisé le passage toujours délicat du niveau système aux composants logiciels. Les ingénieurs ont ainsi l'occasion de parler un langage compréhensible en grande partie par les informaticiens, puisqu'il est basé sur des concepts et diagrammes similaires. Cela permet notamment d'améliorer la cohérence entre la vision globale du système et les parties souvent critiques réalisées en logiciel. À qui s'adresse cet ouvrage ? Aux professionnels de l'ingénierie système en charge de systèmes complexes : logiciels et matériels, aéronautique, astronautique, automobile, énergie, transports, armement, etc. Aux enseignants et leurs étudiants en école d'ingénieurs. La connaissance préalable du langage de modélisation UML est préférable mais facultative.

Annales des télécommunications, 2003 **Introduction à la gestion d'entreprise** Alain SCHATT, Jacques LEWKOWICZ, 2007-09-16 Cet ouvrage d'introduction à la gestion d'entreprise propose un tour d'horizon des problèmes contemporains de gestion d'entreprise. Fruit de la collaboration de plusieurs enseignants, cet ouvrage regroupe l'ensemble des notions fondamentales en gestion. En 9 chapitres, il est proposé un tour d'horizon complet des problèmes contemporains de gestion d'entreprise : analyse des organisations, comptabilité, contrôle et audit, l'analyse comptable de gestion, finance d'entreprise, gestion des ressources humaines, gouvernement d'entreprise, marketing, stratégie, systèmes d'information. Cet ouvrage s'adresse des étudiants débutants en gestion, ainsi qu'à des spécialistes de gestion soucieux d'élargir leur vision de l'entreprise et d'acquiescer de nouvelles connaissances.

Conception de bases de données avec UML Gilles Roy, 2007-08-29 00:00:00-04:00 De l'analyse à la conception, cet ouvrage accorde une importance prédominante au modèle conceptuel de données et propose des règles des techniques, des astuces et des mises en garde qui doivent guider le modélisateur dans la réalisation d'un bon modèle conceptuel.

Ecosystems Knowledge Samuel Szoniecky, 2018-05-24 To analyze complex situations we use everyday analogies that allow us to invest in an unknown domain knowledge we have acquired in a known field. In this work the author

proposes a modeling and analysis method that uses the analogy of the ecosystem to embrace the complexity of an area of knowledge After a history of the ecosystem concept and these derivatives nature ecology environment from antiquity to the present the analysis method based on the modeling of socio semantic ontologies is presented followed by practical examples of this approach in the areas of software development digital humanities Big Data and more generally in the area of complex analysis

Certifiable Software Applications 1 Jean-Louis Boulanger, 2016-07-15 *Certifiable Software Applications 1* Main Processes is dedicated to the establishment of quality assurance and safety assurance It establishes the context for achieving a certifiable software application In it the author covers recent developments such as the module component and product line approach Applicable standards are presented and security principles are described and discussed Finally the requirements for mastering quality and configuration are explained In this book the reader will find the fundamental practices from the field and an introduction to the concept of software application Presents the fundamental practices from the field Emphasizes the development of quality assurance and safety assurance Introduces the concept of software application Covers recent developments such as module component and the product line approach

Integration of Process Knowledge into Design Support Systems Hubert Kals, Fred van Houten, 2013-04-17 Design is a fundamental creative human activity This certainly applies to the design of artefacts the realisation of which has to meet many constraints and ever raising criteria The world in which we live today is enormously influenced by the human race Over the last century these artefacts have dramatically changed the living conditions of humans The present wealth in very large parts of the world depends on it All the ideas for better and new artefacts brought forward by humans have gone through the minds of designers who have turned them into feasible concepts and subsequently transformed them into realistic product models The designers have been still are and will remain the leading change agents in the physical world Manufacturability of artefacts has always played a significant role in design In pre industrial manufacturing the blacksmith held the many design and realisation aspects of a product in one hand The synthesis of the design and manufacturing aspects took almost implicitly place in the head of the man All the knowledge and the skills were stored in one person Education and training took place along the line of many years of apprenticeship When the production volumes increased assembling to measure was no longer tolerated and production efficiency became essential design process planning production planning and fabrication became separated concerns The designers created their own world separated from the production world They argued that restrictions in the freedom of designing would badly influence their creativity in design

Architecture et transformation de l'entreprise et du SI Hubert Tournier, Alison Hawksworth, Romain Hennion, 2014-05-15 Les demandes changeantes des marchés contraignent les entreprises se transformer pour y répondre au mieux De même les fournisseurs informatiques DSI et SSII doivent passer d'un centre de coûts à un centre de création de valeur pour le métier Face cette recherche obsédante de leviers de croissance pour assurer la performance du métier et du SI l'architecture d'entreprise apporte des réponses La vision globale qu'elle offre permet de mieux

comprendre l'organisation du métier du SI et de l'informatique pour mieux la faire évoluer l'adapter L'architecture d'entreprise est ainsi passée d'une discipline une méthode avec un ensemble de bonnes pratiques de règles et de principes au service de la modélisation de l'optimisation et de la transformation des processus métiers du SI et de l'informatique sous-jacente partir de la méthode TOGAF les auteurs présentent leur démarche d'architecture d'entreprise d'ployée travers le monde

Système d'information et de connaissance Pierre-Emmanuel Arduin, Michel Grundstein, Camille

Rosenthal-Sabroux, 2015-06-01 La série Systèmes d'information avancés approfondit les nouvelles formes du SI qui est devenu avec le numérique le véritable système nerveux de toute organisation Les définitions communes du système d'information ne distinguent pas clairement les notions d'information et de connaissance ces termes sont généralement utilisés indifféremment C'est notamment le cas pour les projets portant sur les systèmes d'information numériques SIN utilisant les applications du Web 2.0 et du big data Cet ouvrage présente les risques inhérents cette confusion et étudie le concept de système d'information et de connaissance de l'organisation SICO Il précise les conditions et les limites dans lesquelles le savoir peut être pensé comme un objet et traité comme une information dans les SIN Les SICO permettent les changes de données mais aussi de s'assurer du sens qu'elles vont prendre et des interprétations qui vont en être faites

Analyse de sensibilité et exploration de modèles

Robert Faivre, Stéphanie Mahévas, David Makowski, Hervé Monod, 2013 La quatrième de couverture indique Afin d'aborder les grands enjeux liés au changement climatique et la gestion durable de ressources naturelles ou exploitées des modèles sont développés par les chercheurs en agronomie écologie environnement halieutique gestion de l'eau océanographie etc Ces modèles intègrent de plus en plus la prise en compte de dynamiques et de processus liés des systèmes complexes Pour explorer leurs propriétés et juger de leur pertinence pour assister la décision il est nécessaire de faire appel des méthodes d'analyse et d'exploration adaptées Il est alors souvent fait référence une grande classe de méthodes les analyses de sensibilité globales Forts de leur expérience dans l'organisation de ces chercheurs les auteurs de cet ouvrage membres pour la plupart du réseau de recherche interinstitutionnel Mexico Méthodes pour l'exploration informatique de modèles complexes ont souhaité transférer par cet ouvrage leur vision globale des différentes méthodes d'analyse de sensibilité et d'exploration et certaines règles d'analyse des modèles développés Ce livre s'adresse aux modélisateurs et utilisateurs de modèles qui souhaitent acquiescer ou consolider leur maîtrise des méthodes d'analyse et d'exploration de modèles par simulation
