Humans can differentiate as many as a TRILLION different odors, and yet of all the senses, we have the fewest number of words. ... The Bigger Picture on : Besides being annoying, what if the grammar police are. ... In a court of law, your fate can be determined by how a judge interprets a word or sentence... but should judges be acting as. ... Some of the first discoveries about the relationship between language and the brain were made by studying patients with brain. ... Like species, languages can go extinct. But there are different stages of language death, and some can be reversed. We all know that the vowels are A, E, I, O, U and sometimes Y... But the way linguists define vowels may mean R qualifies as well! There are actually good reasons why people tend to mispronounce the same words... and why they often end up being the new. ... Your texts might be cool and clever, but you still get tongue-tied when talking

4. Contextual Analysis (Continued)

Continuing our detailed review of Otherwords 2011 Regformc With Examples, we examine secondary source materials and community-driven data points:

to people face-to-face. Why is that? It's all just words,Â ... You can choose your words as carefully as you want, but your body may be sending other messages you're not even aware of! English has more words than most other languages, but there are still so many familiar things and experiences that we don't haveÂ ... The English spelling system is a MESS... arguably more than any other language. How did it get this way? It's one of the most contentious debates in linguistics, and at the heart of what it means to be human! Can you really invent a language? These people sure tried! But does anyone actually speak them? The way you speak can be as unique as a fingerprint... and as useful for investigators in solving crimes! One of the first words a baby learns is NO! But negation is a deceptively complex linguistic process! SUBCULTURED: Pronouns may be little, but they say a lot, and they're always changing!
