Reading Kenneth Frampton Gevork Hartoonian, 2022-05-10

This book focuses on the first edition of Kenneth Frampton's *Modern Architecture: A Critical History* published in 1980. It searches for clues and positions that will provide the reader with an unprecedented insight into the significance of Frampton's historiography of modern architecture. It explores selected themes in line with Frampton's many-faceted contribution, certain aspects of which can be noted between the lines of his ongoing criticism of the present-day architecture which inevitably lead us to a critical understanding of the past, the modernity of architecture's contemporaneity. The compiled chapters attempt to open a window onto the constellation of themes that allowed Frampton to hold on to his anteroom view of history even amidst the flow of time and flood of temporalities spanning 1980-2020. The book elucidates how Frampton's critical presentation of the history of modern movement architecture and the book's classificatory mode/periodization contribute to our understanding of the contemporaneity of architecture today.

Modern Architecture and Climate Daniel A. Barber, 2023-04-11

How climate influenced the design strategies of modernist architects. *Modern Architecture and Climate* explores how leading architects of the twentieth century incorporated climate-mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture. Focusing on the period surrounding World War II before fossil-fuel-powered air conditioning became widely available, Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control. He looks at projects by well-known architects such as Richard Neutra, Le Corbusier, Lucio Costa, Mies van der Rohe, and Skidmore, Owings, and Merrill, and the work of climate-focused architects such as M.M. Roberto Olgyay and Olgyay and Cliff May. Drawing on the editorial projects of James Marston Fitch, Elizabeth Gordon, and others, he

demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists physicists engineers and social scientists Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design Extensively illustrated with archival material Modern Architecture and Climate provides global perspectives on modern architecture and its evolving relationship with a changing climate showcasing designs from Latin America Europe the United States the Middle East and Africa This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today s zero carbon design

An Accidental Masterpiece Dietrich Neumann, 2020-12-07 The Complex History of a Building With the temporary exhibition pavilion of the German Reich at the 1929 International Exposition in Barcelona Mies van der Rohe designed an architectural icon but also a controversial monument of the way the Weimar Republic portrayed itself The building is one of the most unusual success stories in the history of architecture Despite its short existence its reputation grew steadily in the following decades thanks in part to magnificent photographs It was soon considered the constructed manifesto of the Modern Age and its spatial and ideational ambitions were called a milestone of Modern architecture This comprehensively broadly researched book portrays the building s complex history and its political entanglement up to and including its reconstruction according to van der Rohe s plans at the original site between 1983 and 1986 Presumably the most important and influential architectural icon of the 20th century uniquely documented and depicted On the occasion of the 50th anniversary of Mies death and the Bauhaus centenary Many never before published photographs from archives in the US Germany and Spain

Rethinking Frank Lloyd Wright Neil Levine, Richard Longstreth, 2023-03-03 Among the general public Frank Lloyd Wright remains the best known American architect of the twentieth century And yet his larger than life profile in the popular realm contrasts sharply with his near invisibility in academic and professional circles In Rethinking Frank Lloyd Wright Neil Levine and Richard Longstreth have assembled a group of eminent scholars to address this most puzzling paradox of the great architect s career In a series of engaging and well illustrated essays the contributors draw on their wide ranging understanding of modern architecture to reveal the ways in which Wright continues to play an instrumental role in domestic and international spheres making the case for reevaluating his popular and professional reputations Prompted by the transfer of the architect s archive from its home at Taliesin West in Scottsdale Arizona to the Avery Library at Columbia University and the Museum of Modern Art this volume revisits Wright s relevance for a contemporary audience Contributors Barry Bergdoll Columbia University Daniel Bluestone Boston University Jean Louis Cohen New York University Cammie McAtee independent scholar Neil Levine Harvard University Dietrich Neumann Brown University Timothy M Rohan University of Massachusetts Amherst Richard
