High Society in the Third Reich Fabrice D'Almeida, 2008-12-22 This book is the first systematic study of the relations between German high society and the Nazis It uses unpublished archival material private diaries and diplomatic documents to take us into the hidden areas of power where privileges tax breaks and stolen property were exchanged Fabrice D Almeida begins by examining high society in the Weimar period dominated by the old imperial aristocracy and a new republican aristocracy of government officials and wealthy businessmen It was in this group that Hitler made his social debut in the early 1920s through the mediation of conservative friends and artists including the family of the composer Richard Wagner By the end of the 1920s he enjoyed wide support among socialites who played a significant role in his access to power in 1933 Their adherence to the Nazi regime and the favors they received in return continued and even grew until defeat loomed on the horizon D Almeida shows how members of German high society sought to outdo each other in showing zealous support for Hitler how the old elites starting with the Kaiser s sons partied alongside parvenus and how actors aristocrats SS technocrats and diplomats came together to form a strange imperial court Women also played a role in this theatre of power they were persuaded that they had gained in dignity what they had lost in civil rights There emerges a fascinating and disturbing picture of a group that allowed nothing not war the plundering of Europe nor the extermination of peoples to alter their cynical enjoyment of pleasures hunting regattas the opera balls dinners and tennis More than a study of a class or a chronicle this book lifts the veil that has concealed a society that used secrecy to protect itself High Society in the Third Reich makes an important and unique contribution to the current reevaluation of the extent to which German society including German high society was responsible for Hitler s accession to power and the crimes that were committed by his regime

Crafting Tradition Michael Chibnik, 2010-01-01 Since the mid 1980s whimsical brightly colored wood carvings from the Mexican state of Oaxaca have found their way into

gift shops and private homes across the United States and Europe as Western consumers seek to connect with the authenticity and tradition represented by indigenous folk arts Ironically however the Oaxacan wood carvings are not a traditional folk art Invented in the mid twentieth century by non Indian Mexican artisans for the tourist market their appeal flows as much from intercultural miscommunication as from their intrinsic artistic merit In this beautifully illustrated book Michael Chibnik offers the first in depth look at the international trade in Oaxacan wood carvings including their history production marketing and cultural representations Drawing on interviews he conducted in the carving communities and among wholesalers retailers and consumers he follows the entire production and consumption cycle from the harvesting of copal wood to the final purchase of the finished piece Along the way he describes how and why this invented tradition has been promoted as a Zapotec Indian craft and explores its similarities with other local crafts with longer histories He also fully discusses the effects on local communities of participating in the global market concluding that the trade in Oaxacan wood carvings is an almost paradigmatic case study of globalization
