## **Minhaj Al Muslim Vol1:**

**Muslim Studies, Vol. 1** Ignác Goldziher, 1967-01-01 This is the first volume of Goldziher's Muslim Studies which ranks highly among the classics of the scholarly literature on Islam. Indeed the two volumes originally published in German in 1889-1890 can justly be counted among those which laid the foundations of the modern study of Islam as a religion and a civilization. The first study deals with the reaction of Islam to the ideals of Arab tribal society to the attitudes of early Islam to the various nationalities and more especially the Persians and culminates in the chapter on the Shu'ubiyya movement which represents the reaction of the newly converted peoples and again more especially of the Persians to the idea of Arab superiority. The second essay is the famous study on the development of the Hadith, the Traditions ascribed to Muhammed in which the Hadith is shown to reflect the various trends of early Islam and in which its collection and the subsequent literature devoted to it is described. Goldziher's name is mainly associated with the critical study of the Hadith of which this essay is the chief monument. The third essay is about the cult of saints which though contrary to the spirit and the letter of the earliest Islam played such an important part in its subsequent development. These essays with the author's marvelous richness of information, profound historical sense and sympathetic insight into the motive forces of religion and civilization are today as fresh as at the time of their original publication and are indispensable for all students of Islam. The editor S. M. Stern has brought the annotation up to date by completing whenever necessary the references by making relevant additions and by indicating the most important later literature dealing with the subjects treated in the studies.

## **Islamic Psychology**

G. Hussein Rassoool, 2021-03-31 Islamic Psychology or ilm an nafs, science of the soul, is an important introductory textbook drawing on the latest evidence in the sub-disciplines of psychology to provide a balanced and comprehensive view of human nature, behaviour and experience. Its foundation to develop theories about human nature is based upon the writings of the Qur'an, Sunna, Muslim scholars and contemporary research findings. Synthesising contemporary empirical psychology and Islamic psychology, this book is holistic in both nature and process and includes the physical, psychological, social and spiritual dimensions of human behaviour and experience. Through a broad and comprehensive scope, the book addresses three main areas: Context, perspectives and the clinical applications of applied psychology from an Islamic approach. This book is a core text on Islamic psychology for undergraduate and postgraduate students and those undertaking continuing professional development in Islamic psychology, psychotherapy and counselling. Beyond this, it is also a good supporting resource for teachers and lecturers in this field.
