Daszyńska-Żygadło, Agnieszka Bem, Bożena Ryszawska, Erika Jáki, Taťána Hajdíkóvá, 2020-02-04 This volume presents the proceedings of the ZAFIN Finance and Sustainability conference organized by the Wrocław University of Economics in cooperation with Corvinus University of Budapest and the University of Economics in Prague The contributing authors analyze a variety of issues concerning recent finance problems including corporate finance public finance monetary and fiscal policy issues and risk management The book also addresses topics connected to sustainable finance the transition to green economies corporate sustainability and sustainable development The target audience for this book includes researchers at universities and research and policy institutions graduate students and practitioners in economics and finance working for private or government institutions *Alternative Lending* Promitheas Peridis, 2022-09-30 The book covers alternative lending using the emergence of Debt Funds in the EU as a case study The book explores the risks that they can pose to financial stability and the regulatory and supervisory tools available to mitigate these risks Through this analysis the book uncovers the risks and potential risk mitigation tools that can be applied to the alternative lenders including debt funds

and other potential alternative lenders After identifying the reasons behind the growth of alternative lenders using as example the assets of Alternative Investment Funds AIFs and in particular debt funds and the simultaneous decrease of the banks assets the book analyses the systemic importance of the alternative lenders and the risk channels through which the systemic risk can spread to the banking sector and the financial system Then the book deals with the financial innovation market failure theory and demonstrates that financial innovations e g debt funds securitisations can cause market failures resulting in regulatory interventions Of interest to banking and financial regulation academics researchers and practitioners this book analyses the regulatory provisions in place for both credit institutions and debt funds including the Basel Accords the Capital Requirements Directives and Regulations and the Alternative Investment Fund Managers Directive AIFMD and its implementation in various EU jurisdictions before offering a proposal for a new three defensive framework applicable to debt funds and to other potential alternative lenders

Too-Big-to-Fail in Banking Tom Filip Lesche,2021-06-28 This book provides a comprehensive summary of the latest academic research on the important topic of too big to fail TBTF in banking It explains TBTF from various perspectives including the range of regulatory measures proposed to counter TBTF most notably the globally accepted regulation of global systemically important banks G SIBs and its main tool of capital surcharges The empirical analysis quantifies the shareholder value of the G SIB attribution by using quarterly observations from more than 750 global banks between Q2 2008 and Q3 2015 The main finding is that G SIBs are confronted with a substantial relative valuation discount compared to non G SIBs From the end of 2011 until the end of 2015 a stable discount of 0 6x 0 8x price to tangible common equity P TCE is statistically highly significant The results suggest that the G SIB designation effect which positively impacts G SIBs share prices because of funding benefits from IGGs is dominated by the regulatory G SIB burden effect which negatively impacts G SIBs share prices because of lower profitability due to capital surcharges and other regulatory requirements placed on G SIBs The findings re open the debate about whether breaking up G SIBs would unlock shareholder value and whether G SIBs are regulated efficiently

Bank Valuation And Value Based Dermine,2009-12 In this thorough and innovative guide acclaimed professor Jean Dermine presents his highly effective valuation model that enables institutional bank managers bank regulators and risk managers to assess and control both value creation and risk With an insightfully global perspective this thorough guidebook addresses such critical and timely bank management issues as Basel II and other capital management methods securitization resolution for non performing loans and investments and the measurement of interest rate risk *Valuing Banks* Federico Beltrame,Daniele Previtali,2016-06-27

This book aims to overcome the limitations the variations in bank specifics impose by providing a bank specific valuation theoretical framework and a new asset side model The book includes also a constructive comparison of equity and asset side methods The authors present a novel framework entitled the Asset Mark down Model This method incorporates an Adjusted Present Value model which allows practitioners to identify the main value creation sources of a particular bank from asset based cash flow and the mark down on deposits to tax benefits on bearing liabilities Through the implementation of this framework the authors offer a more accurate and more specific approach to valuing banks *Managing Financial Institutions: An Integrated Valuation Approach* Michael Pagano,John Sedunow,2025-06-03

This book takes a novel approach to solving a financial manager s problems by applying a valuation focus to the firm s risk management decisions Rather than concentrating solely on defining and measuring a bank s risks our book goes a step further by explicitly considering how these risks can impact the market value of the bank from a shareholder s perspective The book uses an integrated valuation framework which quantifies the costs and benefits of how a bank should manage its main risks associated with key functions such as lending investing financing and liquidity provision The book s hands on approach to learning also incorporates useful tools for student learning such as helpful mnemonics illustrative examples and a spreadsheet which brings the concepts discussed in the book to life It is a must read for readers eager to improve their risk management skills [Value at Risk and Bank Capital Management](#) Francesco Saita,2010-07-26 Value at Risk and Bank Capital Management offers a unique combination of concise expert academic analysis of the latest technical VaR measures and their applications and the practical realities of bank decision making about capital management and capital allocation The book contains concise expert analysis of the latest technical VaR measures but without the highly mathematical

component of other books It discusses practical applications of these measures in the real world of banking focusing on effective decision making for capital management and allocation The author Francesco Saita is based at Bocconi University in Milan Italy one of the foremost institutions for banking in Europe He provides readers with his extensive academic and theoretical expertise combined with his practical and real world understanding of bank structure organizational constraints and decision making processes This book is recommended for graduate students in master s or Ph D programs in finance banking and bankers and risk managers involved in capital allocation and portfolio management Contains concise expert analysis of the latest technical VaR measures but without the highly mathematical component of other books Discusses practical applications of these measures in the real world of banking focusing on effective decision making for capital management and allocation Author is based at Bocconi University in Milan Italy one of the foremost institutions for banking in Europe

Applications in Finance, Investments, and Banking Diem Ho, Thomas Schneeweis, 2013-04-17

Technological economic and regulatory changes are some of the driving forces in the modern world of finance For instance financial markets now trade twenty four hours a day and securities are increasingly being traded via real time computer based systems in contrast to trading floor based systems Equally important new security forms and pricing models are coming into existence in response to changes in domestic and international regulatory action Accounting and risk management systems now enable financial and investment firms to manage risk more efficiently while meeting regulatory concerns The challenge for academics and practitioners alike is how to keep themselves and others current with these changing markets as well as the technology and current investment and risk management tools Applications in Finance Investments and Banking offers presentations by twelve leading investment professionals and academics on a wide range of finance investment and banking issues Chapters include analysis of the basic foundations of financial analysis as well as current approaches to managing risk Presentations also include reviews of the means of measuring the volatility of the underlying return process and how investment performance measurement can be used to better understand the benefits of active management Finally articles also present advances in the pricing of the new financial assets e g swaps as well as the understanding of the factors e g earnings estimates affecting pricing of the traditional assets e g stocks Applications in Finance Investments and Banking provides beneficial information to the understanding of both traditional and modern approaches of financial and investment management
