**The Vanishing Face of Gaia** James Lovelock, 2009-02-26 James Lovelock described his previous book *The Revenge of Gaia* as a wake up call for humanity Stark though it was in many respects in *The Vanishing Face of Gaia* Lovelock says that even though the weather seems cooler and pollution lessens as the recession bites the environmental problems we will face in the twenty first century are even more terrifying than he previously realised The Arctic and Antarctic ice caps are melting very quickly and water shortages and natural disasters are more common occurrences than at any time in recent history The civilisations of many countries will be jeopardised and life as we know it severely disrupted Almost all predictions of the likely rate of climate change have been based on estimates which professional observers in the real world now show are consistently underestimating the true rate of change As a global community we continue to be fixated by conventional green ideas which we believe will help save our world Lovelock argues that only Gaia theory which he originated over forty years ago can really help us understand the crisis fully The root problem is that there are too many people and animals for the Earth to carry And there is in fact only one possible procedure which might bring a permanent cure for climate change but we are unlikely to adopt it Our wish to continue business as usual will probably prevent us from saving ourselves says Lovelock so we must adapt as best we can and try to ensure that enough of us survive to allow a more capable species to evolve from us There could hardly be a more

important message for humankind James Lovelock has been an active and accurate observer of the Earth environment since the 1960s and was the first to find CFCs and other gases accumulating in the air His Gaia theory provides insight into climate change in the coming century This is his final warning

**Basic Engineering Thermodynamics in SI Units** Rayner Joel,1971 *Proceedings of the Third World Conference on Floating Solutions* Tomoki Ikoma, Shigeru Tabeta, Soon Heng Lim, Chien Ming Wang, 2024-06-29 This book includes peer reviewed articles from the Third World Conference on Floating Solutions WCFS 2023 Japan with an aim to pioneer the SDGs and Next SDGs by making the most use of oceans and water In recent years the safety and security of people s lives around the world have been threatened by frequent floods and rising sea levels attributable to climate change The COP 26 has set a common global goal of limiting the temperature rise to 1.5 degrees Celsius above pre industrial levels It is an urgent task to cope with climate change as well as to utilize decarbonized and renewable energy The UN is promoting the SDGs which aim to achieve 17 Goals between 2015 and 2030 However efforts to reach the Goals will not end in 2030 but will be an ongoing challenge for humanity beyond 2030 Here we tentatively call the Goals to be achieved after the SDGs as Next SDGs Ocean and water have the potential to provide solutions to the disasters such as flooding and sea level rise due to climate change In this context WCFS 2023 presents ocean and water as the urban infrastructure and explores new technology and feasible solutions In particular it is necessary to consider urban planning marine architecture port planning connecting land and sea disaster prevention renewable energy and food production on the sea and water Further it is indispensable that knowledge experience dream and strong desire to realize these challenges are supported by a diversity of people

The Revenge of Gaia James Lovelock, 2007-02-22 For millennia humankind has exploited the Earth without counting the cost Now as the world warms and weather patterns dramatically change the Earth is beginning to fight back James Lovelock one of the giants of environmental thinking argues passionately and poetically that although global warming is now inevitable we are not yet too late to save at least part of human civilization This short book written at the age of eighty six after a lifetime engaged in the science of the earth is his testament
