Twilight of the Gods Ian W.

Toll, 2020-09-01 New York Times Bestseller No one has told the story of World War II in the Pacific from beginning to bitter end better than Ian W. Toll. This final volume concludes a brilliant trilogy. Alex Kershaw New York Times best selling author of *The First Wave* and *Avenue of Spies*. In June 1944 the United States launched a crushing assault on the Japanese navy in the Battle of the Philippine Sea. The capture of the Mariana Islands and the accompanying ruin of Japanese carrier airpower marked a pivotal moment in the Pacific War. No tactical masterstroke or blunder could reverse the increasingly lopsided balance of power between the two combatants. The War in the Pacific had entered its endgame. Beginning with the Honolulu Conference when President Franklin Delano Roosevelt met with his Pacific theater commanders to plan the last phase of the campaign against Japan, *Twilight of the Gods* brings to life the harrowing last year of World War II in the Pacific when the U.S. Navy won the largest naval battle in history. Douglas MacArthur made good his pledge to return to the Philippines. Waves of kamikazes attacked the Allied fleets; the Japanese fought to the last man on one island after another. B-29 bombers burned down Japanese cities and Hiroshima and Nagasaki were vaporized in atomic blasts. Ian W. Toll's narratives of combat in the air at sea and on the beaches are as gripping as ever but he also reconstructs the Japanese and American home fronts and takes the reader into the halls of power in Washington and Tokyo where the great questions of strategy and diplomacy were decided. Drawing from a wealth of rich archival sources and new material, *Twilight of the Gods* casts a penetrating light on the battles, grand strategic decisions, and naval logistics that enabled the Allied victory in the Pacific. An authoritative and riveting account of the final phase of the War in the Pacific, *Twilight of the Gods* brings Toll's masterful trilogy to a thrilling conclusion. This prize-winning and best-selling trilogy will stand as the first complete history of the Pacific War in more than twenty-five years and the first multivolume history of the Pacific naval war since Samuel Eliot Morison's series was published in the 1950s.

U.S. Navy Codebreakers, Linguists, and Intelligence Officers against Japan, 1910-1941 Steven E.

Maffeo, 2015-12-16 This unique reference presents 59 biographies of people who were key to the sea services being reasonably prepared to fight the Japanese Empire when the Second World War broke out and whose advanced work proved crucial. These intelligence pioneers invented techniques, procedures, and equipment from scratch not only allowing the United States to hold its own in the Pacific despite the loss of most of its Fleet at Pearl Harbor but also laying the foundation of today's intelligence methods and agencies. One hundred years ago in what was clearly an unsophisticated pre-information era, naval intelligence and foreign intelligence in general existed in rudimentary forms almost incomprehensible to us today. Founded in 1882 the U.S. Office of Naval Intelligence (ONI) the modern world's oldest continuously operating intelligence

agency functioned for at least its first forty years with low manning small budgets low priority and no prestige The navy s early steps into communications intelligence COMINT which included activities such as radio interception radio traffic analysis and cryptology came with the 1916 establishment of the Code and Signals Section within the navy s Division of Communications and with the 1924 creation of the Research Desk as part of the Section Like ONI this COMINT organization suffered from low budgets manning priority and prestige The dictionary focuses on these pioneers many of whom went on even after World War II to important positions in the Navy the State Department the Armed Forces Security Agency the National Security Agency and the Central Intelligence Agency It reveals the work and innovations of well and lesser known individuals who created the foundations of today s intelligence apparatus and analysis *Soldiers, Bombs and Rifles* Paola Lo Cascio,Antoni Segura i Mas,Alberto Pellegrini,2014-10-16 This volume is the result of an academic initiative organized by the Center for International Historical Studies of the University of Barcelona CEHI UB in April 2012 with the purpose of bringing Military History to the center of the attention of university and historiographical debate This choice is based on the idea that too often Military History is considered a technical discipline only intended for experts On the contrary we think that on the one hand this research field constitutes an unavoidable tool for the interpretation of the historical processes of contemporaneity and that on the other Military History is among the most interesting research fields because of its intrinsic interdisciplinarity On the basis of these considerations the congress and the resulting book propose the analysis of some of the main war processes of the twentieth century from a perspective that could situate them in the wider background defined by the conflicts themselves The book gathers the contributions of Professors Fortunato Minniti University of Roma Tre Rome Giuseppe Conti University La Sapienza Rome Joan Villarroya University of Barcelona Allan R Millett University of New Orleans and Antoni Segura i Mas University of Barcelona respectively about World War I war intelligence the Spanish Civil War World War II and the asymmetric conflicts ranging from the Cold War to more recent examples **Encyclopedia of the British Novel** Virginia Brackett,Victoria Gaydosik,2015-04-22 Praise for the print edition comprehensive Recommended
