Behavioural Finance By William Forbes:

Behavioural Finance William Forbes, 2009-12-21 Behavioural Finance builds on the knowledge and skills that students have already gained on an introductory finance or corporate finance course. The primary focus of the book is on how behavioural approaches extend what students already know. At each stage the theory is developed by application to the FTSE 100 companies and their valuation and strategy. This approach helps the reader understand how behavioural models can be applied to everyday problems faced by practitioners at both a market and individual company level. The book develops simple formal expositions of existing attempts to model the impact of behavioural bias on investor managers' decisions. Where possible this is done grounding the discussion in practical numerical examples from the financial press and business life.

A Fast and Frugal Finance William P. Forbes, Aloysius Obinna Igboekwu, Shabnam Mousavi, 2019-11-19 *A Fast and Frugal Finance* Bridging Contemporary Behavioural Finance and Ecological Rationality adds psychological reality to classical financial reasoning. It shows how financial professionals can reach better and quicker decisions using the fast and frugal framework for decision making adding dramatically to time and outcome efficiency while also retaining accuracy. The book provides the reader with an adaptive toolbox of heuristic tools and classification systems to aid real world decisions. Throughout financial applications are presented alongside real world examples to help readers solve established problems in finance including stock buying and selling decisions when faced with not only risk but fundamental uncertainty. The book concludes by describing potential solutions to financial problems in the forefront of contemporary debates and calls for taking psychological insights seriously.

The book concludes by describing potential solutions to financial problems in the forefront of contemporary debates and calls for taking psychological insights seriously. Demonstrates how well constructed fast and frugal models can outperform standard models in time and outcome efficiency. Focuses on how financial decisions are made in reality using heuristics rather than how such decisions should be made. Discusses how cognition and the decision making context interact in producing fast and frugal choices that follow ecological rationality. Explores the development of decision making trees in finance to aid in decision making.

Präferenzmuster von Investoren bei Immobilieninvestitionsentscheidungen Petersen, Peer, 2017-11-27 Vor dem Hintergrund des in den letzten Jahren enorm angestiegenen Transaktionsvolumens aufgrund der geringen Zinsen und damit fehlender rentabler Anlagealternativen auf allen relevanten Immobilienmärkten ist die vorliegende Arbeit ein Muss für alle die sich mit den Präferenzen von unterschiedlichen Investoren auseinandersetzen Welche Merkmale von Beroimmobilien für Investoren besonders wichtig sind wurde bisher vom Markt entweder nur geahnt aus Erfahrungen abgeleitet oder an den umgesetzten Objekten erst im Nachhinein ermessend In der vorliegenden Arbeit werden diese Präferenzen auf erkennbare Muster und deren Stabilität über den Zeitablauf untersucht Hierzu wurde ein Analysemodell entwickelt mit dem Präferenzen von Investoren gemessen und so die Objekte noch in der Entwicklung passgenauer gestaltet werden können um Ressourcen zu schonen und Fehlentwicklungen zu vermeiden Die gewählte Methodentriangulation und

insbesondere die Conjoint Analyse als Nutzenpräferenzmessungsmethodik stellen einen innovativen Forschungsfortschritt dar der auch für die Analyse weiterer Nutzungsarten oder anderer Marktteilnehmer wie bspw die Nutzer anwendbar wäre Against the background of the recently tremendously increasing real estate investment volume sparked by the low interest rate environment and a lack of decently yielding investment alternatives the subject dissertation constitutes a valuable source of information for those interested in understanding the different preference patterns of real estate investors To date there has been little research as to which attributes of office real estate are the most important to real estate investors when making their decisions as to which assets to invest in Such preference patterns have until now either only been estimated on the basis of experience or were measured on the basis of the success or failure of realised development projects The subject dissertation develops an analysis model with which real estate investors observable preference patterns and their stability over time can be measured The research results allow the development better fitting real estate investment product saving resources and permitting better resource allocations The chosen triangulation of research methods and particularly the measurement preference patterns using Conjoint Analysis constitute an innovative research approach which lends itself for the application to further real estate other use types and further participants in the real estate universe
